HYDROFLOW

HIGH PRESSURE WATER JETTING RENTAL & SERVICES

Your Professional Water Blast Partner

www.hydroflow-me.com *info@hydroflow-me.com*

Dubai | Abu Dhabi | Oman | Kuwait | Saudi Arabia

Company Profile

HYDROFLOW was established in 2002 to promote the rental and sales of high pressure water jetting equipment to local UAE and Gulf-wide companies working in industrial services in the oil and gas, ship repair facilities and civil construction.

HYDROFLOW has since then established one of the largest and most diverse rental fleets in the GCC. The group now has offices in Abu Dhabi, Dubai, Oman and representative offices in Saudi Arabia and Kuwait, from where we supply our specialized services.

HYDROFLOW management and personnel have practical on site water jetting experience, enabling us to provide you with water jetting applications, equipment, training, and advice.

Services Offered

- Rental of high and low pressure water jetting units and accessories to suit all applications.
- Rental of 45 Ton Aerial Bundle pullers.
- On site assistance with experienced **HYDROFLOW** technicians.
- Spare parts, services, and advice for most brands of waterblast pumps.
- Training on applications, equipment, and safety.

Equipment Selection

HYDROFLOW rental fleet comprises predominantly of diesel driven high quality pumps ranging from 125hp to 340hp, with pressures ranging from 5,000psi to 40,000psi at variable flow. Our high quality and well maintained pump units are manufactured in the USA, by members of the Federal Signal Environmental Products Group. For more details see fsesg.com.

Along with our pumps we can offer an extensive range of manual, semi-automatic and automatic market leading accessories from internationally recognized suppliers.

HYDROFLOW has established a successful reputation by concentrating solely on offering quality hydro jetting services thus allowing our clients to concentrate on their core business while supplying a more effective service to the end user.

Applications

- Low to medium pressure surface preparation
- Ultra high pressure (UHP) surface preparation
- Cleaning of a wide range of equipment, such as:
  - column and vessels
  - heat exchanger tubes
  - general industrial cleaning services
  - industrial boilers and furnaces
  - pipe work systems (between 75mm to 2m diameter)
  - drain & sewer systems
  - storage tanks
  - GRP lining removal
  - pre-commissioning of piping systems
- Camera survey of pipe lines
- Cold cutting of steel pipelines & tanks
- Concrete hydro demolition
- Pile driving assistance
- Under water maintenance
- High volume flushing
- 45 ton bundle puller rental

Industries serviced by Hydroflow

- Marine industry - offshore and onshore
- Petrochemical oil and gas - offshore and onshore
- Construction industry - civil, marine and oil & gas
- Utilities and power generation industries
- Subsea maintenance and pipeline projects
- Process Manufacturing Industries

Specialized Services

Tube Bundle Cleaning

The cleaning of all tube bundles (internally and externally) using HP & Ultra High Pressure units along with specialized automated equipment and nozzles.

Cold Cutting

We supply a comprehensive range of versatile and spark-free applications for the cold cutting of tanks, vessels and pipelines, for demolition or repair purposes. Our equipment are tailored to the client's requirements and most adverse site conditions.

Hydro-demolition

Hydro-demolition is the removal of concrete and aggregate using ultra high pressure water blasting. This method is vibration free, which prevents any micro crack formation and leaves the reinforcement and existing structure intact.
