Air Misting System

A  SURE™ group Presentation

Rainmist

SURE Technologies FZC, introduces RAINMIST an ultimate solution in misting and cooling systems which are perfectly engineered to blend pure water droplets with hot air creating flash evaporation forming mist and cooling surrounding ambience when the weather is intolerable in the peak of summers where the temperature is highest and humidity lowest.

The Sure team has an experience of 18 years in air-conditioning, water conditioning and now weather conditioning. We possess the ability to provide complete customized misting solution using the best technical know-how, using the world's best components, shortest execution time and also provides long term Annual Maintenance contracts.

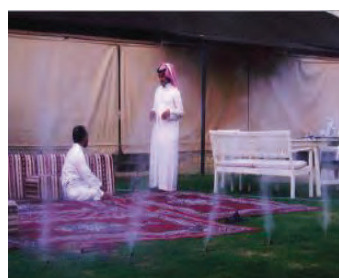

Our misting systems are hassle-free, cost-effective, and are made for longevity.
