

FIRE PROTECTION & SAFETY

(Dubai Civil Defense Approved)

PROFILE

P.O Box: 81063 Dubai, United Arab Emirates Tel: +971 4 2588773 Fax: +971 4 2588778 E-mail: safeco@eim..ae. www.safelineuae.ae

SAFE LINE, the best formatted unison and synchronization of well equipped and accomplished fire protection engineers has the capability of designing full fledged in-house Fire Protection Systems. Our Projects Department, Maintenance, Service & Trading Departments employ experienced Engineers and Technicians to install and maintain equipment's delivered by us as well as to service systems/equipment's installed by others. We have vast experience in the Fire protection field and are capable of handling any system for design, installation, testing and commissioning and also to periodically service and maintain the Systems.

SAFELINE'S Design Engineering facility offers a comprehensive package for most type of fire protection systems consisting inter alia, the following

FIRE FIGHTING

- 1). Water based Fire Fighting System
- 2). Dry Riser System
- 3). Wet Chemical Fire Suppression System
- 4). Clean agent Fire Suppression System
- 5). Foam Deluge System
- 6). Deluge Sprinkler System
- 7). Fire Extinguishing System
- 8). Fire Stopping Materials
- 9). Smoke Control & Fire Resisting Duct works System
- 10). Fire Fighting Pump set

FIRE ALARM

- 1). Analogue Addressable System
- 2). Conventional System
- 3). VESDA System
- 4). Voice Evacuation System

EMERGENCY & EXIT LIGHT

- 1). Central Battery System
- 2). Central Monitoring System
- 3). Self Contained System

ACTIVATES

- DESIGN
- SUPPLY
- INSTALLATION
- SERVICING AND MAINTENANCE

DESIGN

Our Engineers together with the client's representative conduct frequent site surveys to ensure that the best design and service is offered to the end user of the Fire protection & Alarm system.

Our DESIGN department has vast knowledge, unparalleled experience and well versed with regards to creation of advance and state of the art systems for your projects utilizing the latest trends in the technology of design and following a strict compliance with NFPA and UAE Life and Safety Code. We have the skills, credentials and necessary experience to handle simple to complex types of fire protection systems base on your requirements and standards.

SUPPLY

Safe line represents major suppliers of whole Fire Fighting, Fire Alarm & Emergency-Exit lights and Equipment's as well as Smoke Control & Fire Resisting Duct System supplier.

INSTALLATION

Our installation department is well equipped with experienced consultants and Project Engineers and are well versed to discuss, Prepare and meet your needs and requests during construction and in line with the project guidelines. Our installation crew is efficient and well trained to several technologies applied to meet the standards.

SERVICING & MAINTENANCE

Maintenance :24 hours efficient services.

Maintenance Work: Monthly, Quarterly or Yearly basis of a brand of Fire Alarm and Fire Fighting System.

OUR QUALITY POLICY

To implement high standards of services in the field of fire detection and fire protection systems.

To ensure all materials, machines and equipment's to be used in each project has been Subjected to quality inspection.

To attain high level of customer satisfaction through the quality products and services offered by the company.

Verifying and validating both existing and new programs.

Continued research on the improvement of the quality of our products and services.

Conduct a regular internal quality audit and management review for an on going evaluation and improvement of our quality system.

To implement acts of professionalism in the work environment, whether at the office or at the site and ensure that the quality procedures are well communicated among the company employees.

Bureau of Assessment Services

Managing Assurance with Confidence

Certificate of Approval

Quality Management System

SAFETY POLICY

The personal safety and health of each employee of Safe Line is of primary importance. The prevention of occupational-induced injuries and illnesses are of such untoward consequence that as a curative policy they are being addressed whenever felt expedient, preference and precedence over the Company's own operational productivity. To the greatest degree possible, management will provide all mechanical and physical facilities required for personal safety and health of the workers, being highly conscious and concerned a company in these realms and also in the business as we are. We maintain a safety and health program conforming to the best practices of organizations of this type. To be successful, such a program must embody the proper attitudes toward safeguards against injury and prevention from illness of both supervisors and employees. It is also required to resort to concerted efforts to maintain cooperation in safety and health, not only between supervisor and employee, but also between an employee and his fellow workers. Our objective is a safety and health program that will reduce the number of disabling injuries and illnesses to a minimum if not a cipher, not merely by keeping abreast with, but also by surpassing, the best experience of other operations similar to ours. Our goal is ZERO accidents and injuries. Our safety and health program will include:

- Providing mechanical and physical safeguards to the maximum extent possible.
- Conducting a program of safety and health inspection to identify and eliminate unsafe working conditions or practices, to control health hazards, and to comply fully with the safety and health standards for every job.
- Training all employees in good safety and health practices.
- Providing necessary personal protective equipment and instructions for its use.
- Developing and enforcing safety and health rules and requiring every employee to co-operate with these rules as a Condition of employment.
- Thoroughly and promptly investigating every accident to determine and uproot the cause, correct the problem and prevent recurrence.
