Welcome to Al Arif Group

AAG Construction strives to grow our organization through investigating advancing technology, industry changes and the varying needs of our clientele as our industry evolves. We will continuously diversify our skill set to distinguish us from our competition and foster loyal customers as we build infrastructure projects that improve the quality of life in UAE and the Region. (OR) The Company continues to move forward in become the leading Engineering and Construction firm in UAE and eventually the region, by consistently delivering projects that meet international standards.

Success Built on Experience Al Arif Group Our success is built on over 40 years of experience, strong relationships with our clients and consistently effective innovation. We start by understanding the commercial and technical drivers of their business, then work with them to devise solutions that will meet current needs and cater for future expansion and technology. The traditional 'contractor' is focused on just that – contracts. We believe this essentially adversarial approach with its paperwork, corporate bullying delivers poor value to clients. Cheap initial prices steadily rise with endless contractual arguments. Opportunities that arise can't be taken without risking crippling 'variations'.

Chairman's Message

With the grace and blessings of God, sailing back to 1975's on a peaceful morning, Mr. Abdul Karim N. Al Arif and Mr. Abdul Razak A. Al Mutawa together formed a contracting company in the family name of Al Arif. When I look back at our humble beginnings, I can hardly believe our business and our country have come so far, so fast. We have faced many challenges in our journey to excellence and we have been always competent enough to surpass them. Today the world is moving towards the innovations in digital technology and evolution of mobile communication. All the countries in the globe were challenged due to the globalization and liberalizations. Due to our feet firmly on the ground and our vision far beyond the horizon, we will continue to be a partner in this development of the United Arab Emirates. For the last three decades our Group has moved through immense stages from inception to its growth and expansion. Our Group itself has witnessed and is still witnessing major developmental activities in many sectors such as construction, real estate, investment, manufacturing, travel and tourism, trading, and food and beverages to name a few. With the growth of Dubai as the commercial hub of the region, the Group has emerged as a strong The flag off to our growth started in the year 1995. Today, Al Arif Group is set to expand its influence in the GCC as well as to other parts of the globe,

Insha Allah.

Hamad Abdul Karim Al Arif

About Al Arif Dewatering

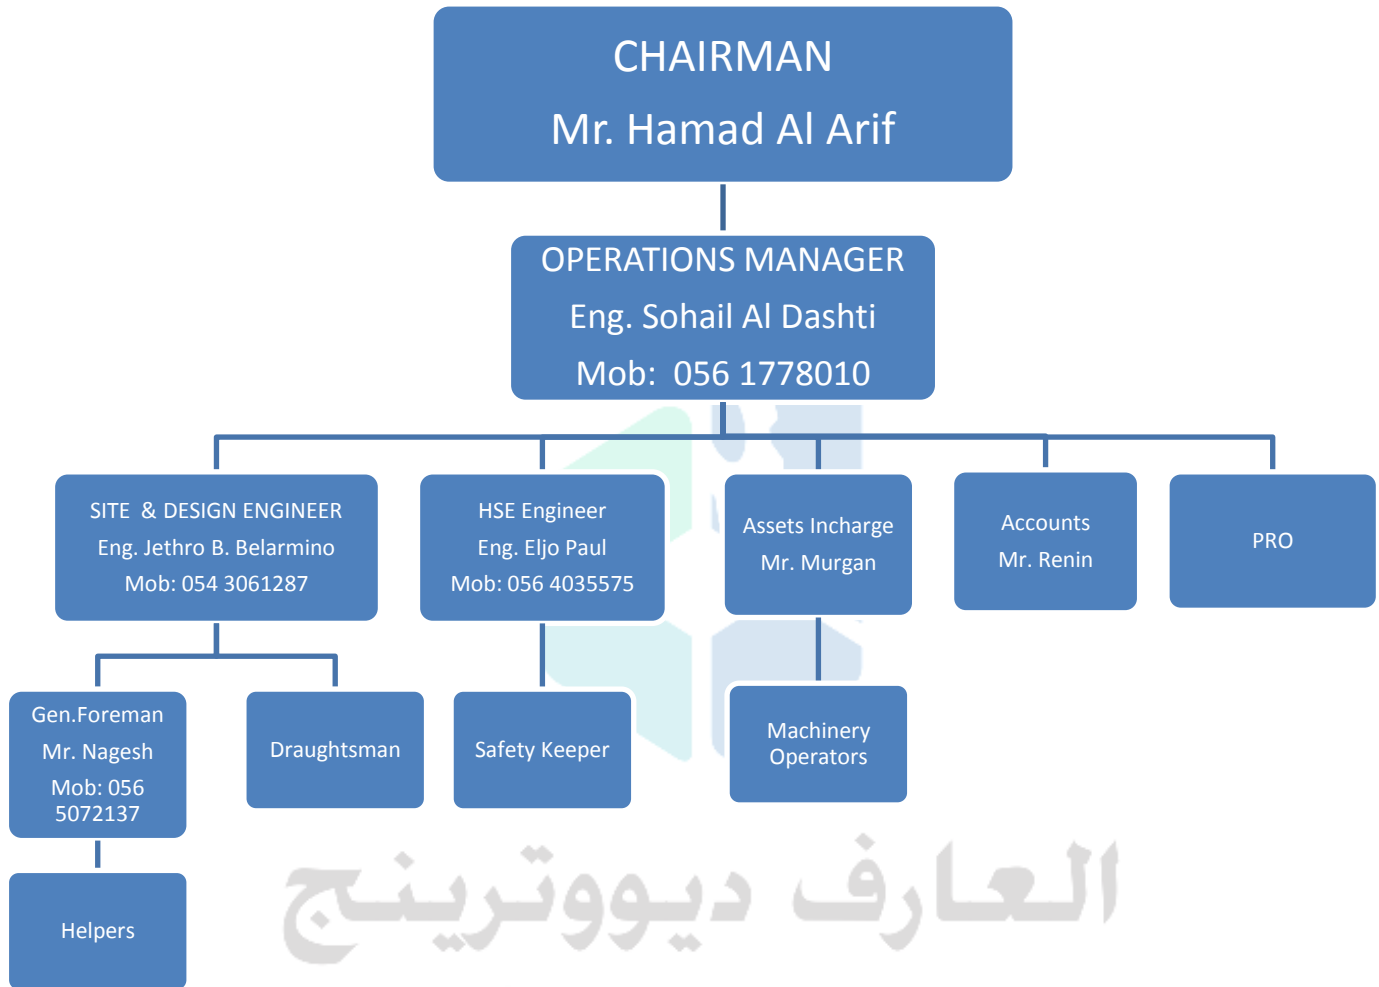

العارف ديوترينج Al Arif Dewatering

Al Arif Dewatering Company- (part of Al Arif Group) was established in 2013 as a specialist dewatering contractor after it was an active department in Al Arif Contracting company since 1975, making it one of the oldest dewatering expert companies in the UAE. It is renowned for its quality and has completed a number of major projects under Al Arif contracting umbrella that includes prestigious commercial and residential buildings, hotels, towers, warehouses and costal projects in Dubai and northern emirates. Since its inception in 1975 Al Arif Contracting has earned an excellent reputation thanks to its professional management, experienced technical staff and large scale plant and equipment capacity. Al Arif Dewatering Co. is known for timely completion of projects and for providing excellent services within the prescribed budget.
