INTERIOR COMMUNICATION NETWORK CONT. LLC

Being Safe...is in your own hand...

About us

Our primary focus is on our clients. We believe that the success of our company is due to our unprecedented priority to promote efficient customer service. All calls are attended promptly and rectified quickly in order to reduce the client's downtime.

Friendly and effective service is the hallmark of our success.

Most of the cost of operating and maintaining a building and its associated infrastructure is a significant cost. We offer a comprehensive management service which is not only satisfying the general maintenance requirements of the building, but also its long term sustainability. We have proven track record in both Public & Private sectors (healthcare, education and business industry etc ....). We constantly review our partnership with our clients, accessing how and where our services add real value to their business.

Our heritage of working in almost the entire field of business across the region is the evidence of high standards of service, quality and process. AL NAHAR AL SAFI has grown rapidly and built a loyal and varied customer base through a high level of technical expertise and quality of service.

Our Mission / Vision

At **AL NAHAR AL SAFI,** our goal is to deliver the highest standards of services, reliable solutions and customer satisfaction.

Our mission is to be the leading provider of affordable technology solution in the UAE. Regardless of the size and scope of the project, our mission is to provide professional consultation, custom design and expert installation of a wide range of technologies. We understand that integrity, trust, commitment and reliability are the pillars of lasting customer satisfaction.

Our vision is to become a leading solution provider in the field of information technology by giving excellent support & care to our valuable customers.

Our Services

CCTV System, Access Control System, Intruder Alarm, Audio/Video Intercom, CATV/SMATV, BMS, Hotel Management System, PA System & BGM System, Gate Barriers, Structured Cabling, Home Automation Systems, PABX.

CCTV System

As the name implies, Closed Circuit Television (CCTV) is a system in which the circuit is closed and all the elements are directly connected. This is unlike broadcast television where any receiver that is correctly tuned can pick up the signal from the airwaves. Directly connected in this context includes systems linked by microwave, infrared beams, etc. This article introduces the main components that can go to make up CCTV systems of varying complexity.

We provides CCTV design and installation for all kinds of projects from small to big. Choose from variety of analog to IP cameras with high quality Digital Video Recorders. Remote surveillance through Internet.

The Applications for CCTV

Probably the most widely known use of CCTV is in security systems and such applications as retail shops, banks, government establishments, etc. The true scope for applications is almost unlimited. Some examples are listed below.

Monitoring traffic on a *bridge.*
Recording the inside of a *baking oven* to *find the cause* of *problems.*
A *temporary system* to *carry out* a *traffic survey in* a *town centre.*
Time lapse recording for the animation of *plasticine puppets.*
Used by the stage manager of a *show* to *see obscured parts* of a *set.*
The well-publicised use at *football stadiums.*
Hidden in buses to *control vandalism.*
Recording the birth of a *gorilla* at a zoo.
Making a *wildlife program using* a *large model helicopter.*
Reproducing the infrared vision of a *goldfish!*
Aerial photography from a *hot air balloon.*
Production control in a *factory.*

Access Control System

We have partnered with world's leading security solution providers such as Anviz, Spectra, HID, Nedap, Paxton, S2. We have in-house software development team, which can support clients with installation, integration, customization and new feature development. We provide access control software developed with web based attendance software, which can be integrated with existing **ERP**, payroll, SAP, etc.

We delivers solutions which control access to restricted areas by using latest innovative technologies such as smart cards, fingerprints, Hand geometry, face recognition and many more. Our Access Control System include the latest technologies and wider applications:

Control access for single to hundreds of doors using our Access Control System. Code Locks, Single Door solutions and Sipass advance systems are available depending upon the requirement.

Technology

- *Fingerprint* Access *Control System*
- *RFID* Access *Control System*
- *Turnstile*
- *NFC*
- *MIFARE*

Applications

- *Door* Access *Control*
- *Vehicle* Access *Control*
- *Long Range* Access *Control*
- *Hotel Lock Management*

Intruder Alarm System

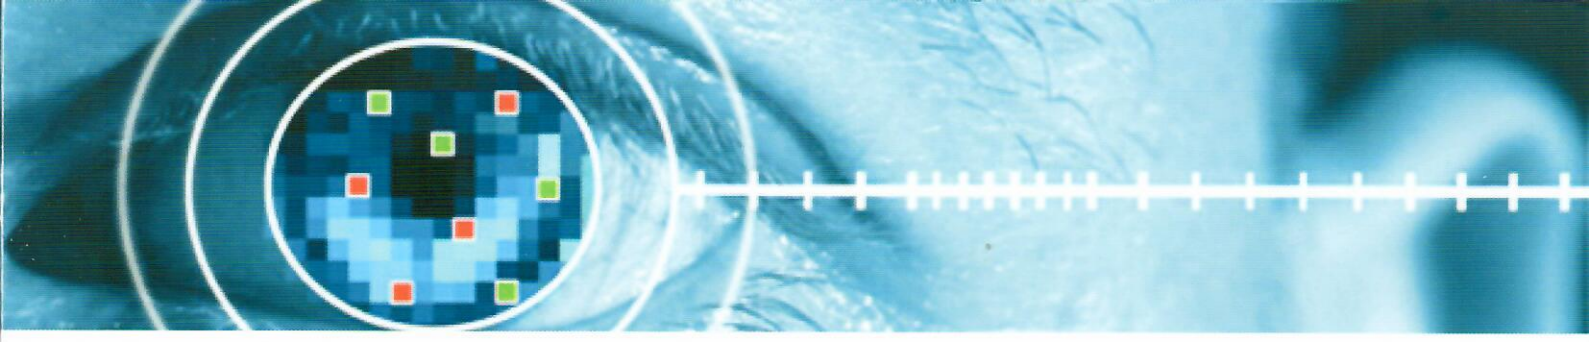
Intruder Alarm System is also called Burglar Alarm is a very important tool in Security Systems. Incase of intrusion or burglary the siren will make very loud sound which can scare the intruder, at the same time the GSM-Dialer can dial the police control room to send the alarm signal with the site information so that the police can reach the site to take appropriate action.

Intruder Alarm System is designed using Control Panel, Sensors, Siren or Sounder and auto dialer. The Control Panel is the heart of the system which receives signals from all the sensors. Different types of sensors are used for different locations. for doors and windows door contacts or magnetic contacts are used. When the door is opened or closed the signal is sent to the control panel. For glass doors and windows glass break detectors are used. This sensor sends the signal to the control panel when the glass is broken. If there is movement in the protected site Motion Detectors are used. There are two types of motion detectors available. Passive Infra Red (PIR) or dualtech where the sensing is through both IR and Microwave rays.

Protect your Villas and Commercial properties using Intruder Alarm System against intrusions. Police Alarm Monitoring facility is available.

Audio Video Intercom With PABX System

Success in business these days takes more than the telephone and traditional PABX equipment. It requires IP telephony solutions to support voice over IP (VOIP), open standards like SIP, mobile workers and the unified voice and data communications business now demands. Interactive Intelligence offers everything the modern enterprise needs in your choice of all-in-one IP telephony solutions to fit your organization, scaling from 100 users to more than 15,000 users.



Surveillance, Security Solutions

We can provide you with the specialist assistance that you need to implement security solutions that will enable your company to realize the benefits in cost savings and productivity that the Internet can bring without exposing your internal systems to attack from hackers, viruses, mail relay and password thieves. Now that the internet has come of age, your company faces new threats such as spam, worms and spy ware, and needs to accomodate new technologies such as instant messaging and streaming media. We can help you to implement the latest web security and email security technology that will allow your company to make the most efficient use of internet bandwidth whilst enforcing your company's acceptable usage policy.

We recommend multiple levels of security solutions:

- Gateway level securities.
- Firewall (Software / Hardware): Protects your network & Data from Intruders.
- Intruder detection systems.
- Anti spam
- Desktop level security.
- CCTV / IP Camera: 24/7 Video recording, Monitoring & Recording services.
- Access Control: Restricts access to your office.
- Biometric Attendance System: Keep track of employ attendance (Including reports for payroll).
- Business Edition Antivirus: Centralized Virus protection & monitoring for your Server, PC & laptops.
- Solar System
- PA System

Our Services

Low Current System

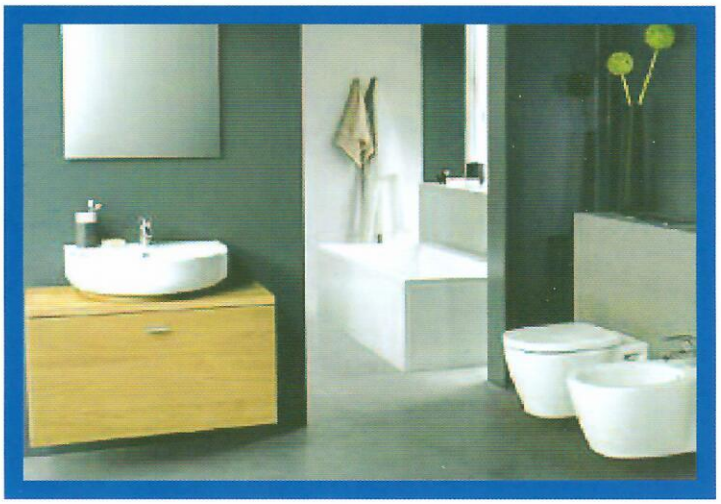
- Power Distribution Systems
- Lighting Control
- Power Generation
- Low Current Systems
- Telephone & Data Systems
- Home Automation
- SMATV Systems
- CCTV, P.A. Sound systems
- Fire Detection & Alarms
- Access Control Systems
- Audio / Video Intercom Systems
- Industrial Process Services.
- Network System
- PA System

MEP Service

- Electricals
- Plumbing
- MV Pannel
- MDB, SMDB & DB
- Air Condition

Plumbing & Public Health Engineering

- Hot & Cold water Supply system
- Water Filtration System
- Irrigation System
- Swimming Pool
- Drainage
- Sanitation
- Rain Water
- Sewage Treatment
- LPG/NG System



Hvac Installation & Ducting Systems

- G.I & P.I Ducting Installation System
- Chilled Water Piping System
- Package units, DX units & Fan Coil Unit Installation
- Ventilation systems
- Ecology Unit Installation Systems
- Kitchen hood exhaust and fresh air system
- Chemical Flushing & 3rd Party Testing Reports
- Air Balancing System and Certifications

Fire Fighting & Fire Alarm Installation Systems

- Fire Fighting - Sprinkler Installation & Modification System
- Fire Alarm - Installation & Modification System
- FACP Programming, Testing and Commissioning
- Emergency / Exit Lighting System
- Civil Defense Approvals & EHS Certification.
- Fire Suppression System

Electrical Systems

Supply, installation, testing & commissioning for new installations

Maintenance of all Electric systems

Design & approvals

Electrical Up gradation works

Authority liaising and approvals

General Building Infrastructure
