Our solutions are in the field of providing IT infrastructure, Systems & Services.

Your IT solution provider since 1990...

IT INFRASTRUCTURE

FIBER OPTIC & STRUCTURED CABLING SYSTEMS

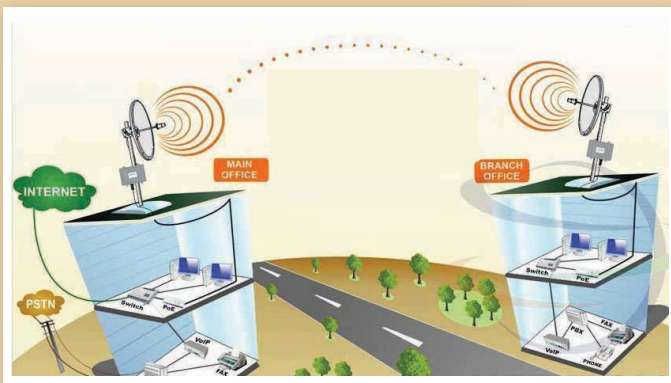

- Delivers high performance copper & fiber optic cabling solutions for data centers, local area networks and converged low voltage applications.
- Our experienced and dedicated team provides and 'end to end' network solution from design to implementation
- Our Expertise in copper cabling enables us in providing high quality solutions in CAT6, CAT6A, CAT7 AND Intelligent Cabling Solutions from all major brands.
- Provide tight buffered & loose Tube cables with the specific cable construction that suits your indoor/ outdoor applications in both Single Mode and Multimode.

TELEPHONE SYSTEMS, ACCESS CONTROL, CCTV & WIRELESS CONNECTIVITY

- Telephone Systems & IP Telephony solutions for secure, reliable and scalable communications from world's leading manufacturers including Panasonic & AVAYA with varied features like Voice Mail, IVR, Auto Attendant, Telephone Billing & Call Recording Solutions.
- We provide state-of-the-art access control systems where programmed cards are controlled from a central location producing reports of personnel movement at all times.
- Offer a range of analog and IP CCTV systems which can provide comprehensive surveillance solutions.

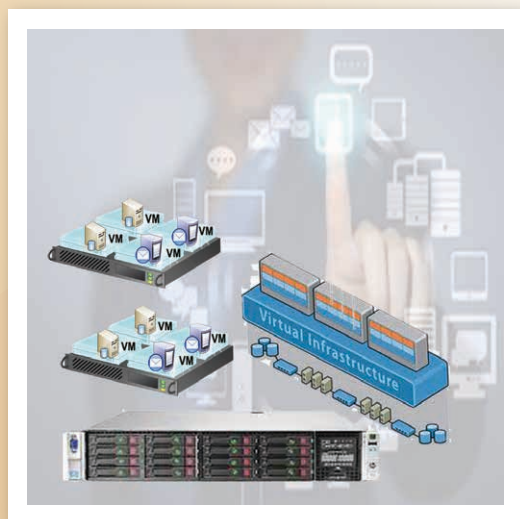

- Provide a standards-based, field proven, high speed wireless networking solutions for both in-building and building-to-building WLAN applications.

DATA CENTER SOLUTION, UPS & COOLING SYSTEMS

- We design and build data centres specifically tailored to a business' current & future needs and with the ability to seamlessly position resources - servers, applications, storage and services.
- Offer a complete physical data center with core elements including cooling, raised flooring, UPS, generators, racks, fire suppression systems, water detection and regular maintenance services.
- Install UPS systems to ensure a continuous supply of power. Our wide range of UPS systems start from 300 VA through to 300KVA.

NETWORK, STORAGE & SECURITY SOLUTIONS

Provide Virtualization infrastructure that supports one's business objectives and growth.

SERVERS, VIRTUALIZATION & DATA STORAGE

We offer a full range of servers & workstations from world's leading vendors.

Regardless of your organizations' size, we have the storage solution to ensure your information assets are secure. Our offer includes SAN, NAS, Enterprise backup, archiving, Disaster Recovery Solutions and Tape Libraries.

PERIPHERALS, SWITCHES, ROUTER & SECURITY SOLUTIONS

- Design & install an innovative line of multilayer Fast Ethernet and Gigabit Ethernet switches that allows customers to build a unified, highly resilient switching system
- We provide best-in-class routing with a new portfolio of integrated services routers that are engineered for secure, wire-speed delivery of concurrent data, voice, video, and wireless services.
- We integrate the industry's broadest suite of security technologies and UTM appliances, including firewall, VPN, antivirus, intrusion prevention (IPS), Web filtering, Anti-spam, and traffic shaping.

SOFTWARE & ANTIVIRUS

Being a Microsoft Certified Partner, we offer an array of products and business solutions that can help you automate processes and accelerate your company's growth.

We supply, deploy and renew antivirus software from world's leading Antivirus software providers and that can detect & disable both known and unknown viruses, Trojans, worms, adware, spyware, rootkits.

IT OUTSOURCING AND MAINTENANCE CONTRACTS

For Small and Medium sized businesses we offer outsourcing services that take care of the day to day IT support. You can think of us as your Outsourced IT department. We aim to provide IT services catering to all your IT needs, including technical and software support for servers, systems, networking, security and training.

ALAN Technology enters into comprehensive maintenance contracts to ensure that your critical networks are supported. These contracts range from traditional warranty support, to maintenance during office hours, to 24*7 critical support.

SOFTWARE SOLUTIONS

WORLD'S FIRST
POWER MANAGEMENT
SYSTEM BASED ON
ARTIFICIAL INTELLIGENCE

ENERGY CONSERVATION SOFTWARE

This is one of our flagship products and is one of the world's first Power Management System based on Artificial Intelligence for PCs. The Energy Conservation Software (ECS) saves in many ways, electricity, money and the environment.

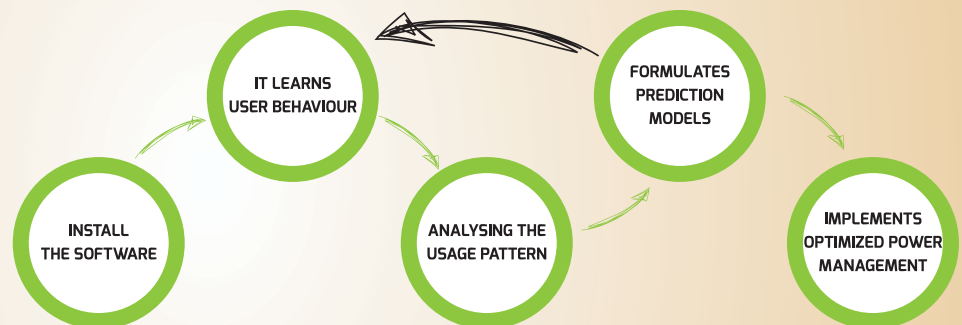

It is estimated that 26% of the world's energy losses are caused by electronic devices being left in standby mode. Even more alarming is the fact that about 51% of these losses are accounted for by computers.

It is estimated there are 2 billion computers in the world today which amounts to an awful lot of wasted electricity.

The ECS uses pattern analysis to actually learn how you use your computer.

It learns when you don't use your computer and is able to anticipate and power down accordingly, so by understanding how and when you are using your computer, substantial energy (electricity) can be saved.

All this is done without interference with the way your computer performs and has no effect on your anti-virus or firewall settings; in fact you will not even know it is working away in the background.

average savings achievable from using ECS are in excess of 33% and this improves over time as the above graphic illustrates.

WEB DEVELOPMENT

ALAN is one of the trusted partners for in web application development and maintenance. Other than the application development team ALAN is a full service web application development company focused on the small to mid-size business community, worldwide. We endeavor not only to understand your business, but also to understand your competitors and customers to determine the most appropriate and efficient solution to make your organization more visible and marketable to your existing and potential customers.

Web Designing & Development

- ☐ Quality HTML, Flash website designs and development

WHY US?

- A renowned Global web application development company, we enjoy extensive national and international Prominence.
- Our designs are backed by years of creative experience and genuine talent. We don't just offer eye-grabbing website designs, but websites with massive impact, retention and revenue generative value.
- We are NOT template-vendors. Our designs are highly customized to suit your unique business needs. We work in close tandem with you to ensure this.
- We provide world-class website design solutions at economic rates. Our state-of-the-art infrastructure and advanced development software allow our team of highly knowledgeable and certified professionals to design websites that not only meet your quality standards, but exceed them as well.

SOFTWARE SERVICES

ALAN business application services deliver IT-enabled solutions using the Intellectual Property (IP) created at our Centers of Excellence.

Application Development

Our application development services help you address evolving business and technology challenges by defining, designing and building applications tailored to meet your business requirements.

Application Maintenance

Our application maintenance services maximize your existing IT applications through offshore-ability analysis, maintainability analysis, maintenance, and enhancement.

Application Management

Our Application Management practice offers a wide range of support services for various platforms and technologies.

Application Re-Engineering

ALAN can rapidly and effectively re-engineer your legacy software applications to contemporary platforms with optimized architectures, simultaneously retaining or enhancing the value of those applications. We bring together our proven processes, technology expertise and tools to re-engineer your software applications to modern technologies such as .NET and J2EE

TECHNOLOGIES & PLATFORMS

“CHANGE IS INEVITABLE

How are you preparing for it...?”

Some say 100% customer satisfaction is a myth, but our clients know better. Some said their business is just perfect, but when we pushed it to another level they shook their heads in amazement. And there were some who missed out on what could've been an amazing vacation just because they had to stay at their office and work on that big project – But ALAN ERP gave them the freedom of working out of their 9-5 cubicle with just a laptop.

ALAN ERP is not your typical ERP software; it is a highly customizable platform which can be configured for YOUR business. No matter what your business is, no matter what your business volume or your business model is. ALAN Engineers will study your business process and provide a cost effective customizable solution for you.

- CUSTOMER RELATIONSHIP MANAGEMENT
- HUMAN RESOURCE MANAGEMENT
- FINANCIAL AND ACCOUNTING
- WAREHOUSE MANAGEMENT
- SERVICE MANAGEMENT
- INVENTORY MANAGEMENT
- QUALITY MANAGEMENT
- FEEDBACK FORUM
- CHEQUE MANAGEMENT

ALAN ERP integrates all elements of your business into one system and gives you the ultimate power. ALAN ERP is like having a bird's eye view over your business. If your business is powered by ALAN ERP, you no longer miss any clients due to the lack of attention of your sales team, you can gain a deeper financial insight across the enterprise, you can control the manpower of your organization within a few mouse clicks, you can change the managerial structure or even organization structure with in few minutes, you can gain access to the all happenings of each department of your organization

**a trusted partner for all your
IT solutions over 20 years**
