Sign

**Abustan sign is the uae' s well known signage company since 2000.
we cover all aspects of the supply, installation and application of signs, including**

-  **Illuminated Signs**
-  **Vinyl cut graphics**
-  **Large Scale Digital Printing**
-  **3D Signs**
-  **Building Signage**
-  **Promotional Paraphernalia**
-  **Vehicles graphics**
-  **And of course, we're always up for something a wee bit different**

Albustan sign has a team with a wealth of knowledge and expertise in signage production and digital print management collectively spanning over 17 years.

Wherever possible we have proactively sought new technologies and opportunities, and by adopting these into our factory and processes, we've stayed at the forefront of our industry.

We pride ourselves on challenges, and innovation which is at the forefront of our organisation. Our culture is one of continuous improvement, and this is reflected in our workplace and the manufacturing process that has become an integral part of our business.

With a purpose built building size of 1200sqm and a workshop of 900sqm it gives us the ability to handle any job no matter the size.

We are a truly uae based company, with a purpose built signage workshop in Ajman .

Our client base is varied from small "one man bands" to large scale multinationals and work with customers all over uae with application partners in almost every regional center.

- Vehicle Graphics
- One Way Vision

- Exhibition Stands

LED SIGN ,FLEXFACE & STICKERS

Illuminated signs are a fantastic way to increase the visual impact of your signs, to get your signage to stand out from its surroundings and in some cases, giving your sign two distinct looks; day and night.

We only use high quality LED lighting in our illuminated signs, which are not only durable, more consistent in brightness output, offer unmatched control of light output for effects, but also running at 12volts, are safe in case of incident and incredibly cost effective to run.

Little Surprises

3D SIGN

As an attention grabbing option to a two dimensional digital printed graphic or cut text can be, adding the third dimension of depth can bring your signage alive, catching the eye and putting your logo, brand, or name ahead of those signs around it.

There are many various options when producing 3D signage, to achieve the distinctive look you are after for your signs. The use of multiple colours, finish textures and depth of offset can give a changing effect of your signage as the perception changes adding a dynamic element to a static sign.

Adding internal or external lighting can offer a further element of intrigue, between the day and the night.

Discussing your ideas with one of the Team at Capture Signs could unlock a dynamic look for your signage, which exceeds your expectations, and sets the tone of your business to those who use it, as a company that is more than just two dimensional in its thinking and approach.

Signage is our primary and main business from shop fascias to corporate branding, to vehicle sign writing and office display

Vinyl sticker cutting

As with Digital prints, the start point for this is either providing us with a dimensioned photo (or we can do this for you) and your durability needs and we can start the process by making a computer generated image of your requirements so you can see what you'll be getting.

Pick from a selection of over 6000 fonts (if lettering is what you are after) and colour/ type matched to a roll of one of the 850 different coloured, frosted, translucent or even reflective vinyl's.

This is a great way for us to work together to optimize your signage investment before the job is even started, getting the creative juices flowing and often resulting in getting far more than you ever expected or hoped for.

Once we get things looking exactly the way you want them, this is sized to within millimeters, In addition to the huge range of colours, types and fonts we have available, to control costs we can also match the vinyl quality to your specific requirements, from the very best long life to a range of short-term easily removed temporary products that require no clean up after removal.

CUT GRAPHICS

KIOSK DESIGN

We have the capabilities and resources to provide innovative and bespoke solutions that will optimise your specifications in terms of quality, value and durability using quality sign making materials and state of the art manufacturing facilities for each project

A kiosk is a small, temporary, stand-alone booth used in high-traffic areas for marketing purposes. A kiosk is usually manned by one or two individuals who help attract attention to the booth to get new customers.
