P2HN SUPER EIGHT HIGH PERFORMANCE HARD HATS

FEATURES AND BENEFITS

- Provides an extra margin of high heat protection up to 500°F for extreme conditions.
- SuperEight™ Roughneck™ hard hats are the industry standard. And now, after years of research and testing, we've made them even better. Here's why:
- New P2N's proprietary injection molded fiberglass compound is 37% stronger than before – and eight times stronger than common high density polyethylene (HDPE) cap shells.
- For added assurance of performance, all Roughneck™ caps are factory assembled and SEI ANSI Type I, Class G (including quick lock model) and CSA approved Type 1 class G or C (Class C for Quick-Lok™ model) in both forward and reverse orientation.
- They meet ANSI-Z89.1-2003 impact resistance tests at extreme temperatures: up to 325°F (P2N) and up to 500°F (P2HN).
- Injection-molded solid color resin for a permanent, no-chip, no-peel finish. You can choose from nine popular colors.
- Available with Fibre-Metal®'s famous non-slip/non-strip ratchet, SwingStrap™ or Tab-Lok™ headgear.
- Ready to use with the industry's most versatile Quick-Lok™ or Speedy-Loop™ faceshield or welding helmet attachment system.

WELDING HELMETS AND FACESHIELDS

The risks and dangers linked to welding

All welding operations involve a constant risk for the welder and for those located in his direct environment (assistant welder, co-workers or anyone close to the welding application). Wearing the appropriate protection enables the welding process to be performed without any danger, provided that the welder is aware of the different types of risks incurred as well as the body parts to be protected.

HEARING PROTECTION

Noise-induced hearing loss rarely happens overnight. Rather, it accumulates over time with every unprotected exposure to hazardous noise. We are born with around 20,000 hair cells in each ear. Above 80 decibels (for 8 hours), noise can destroy these hair cells and gradually lead to deafness. This deafness is sadly irreversible, but it is entirely preventable.

Let's put an end to hearing loss! Choose the hearing protection that suits you best and that you can wear comfortably 100% of the time when you are exposed to noise.

RESPIRATORY PROTECTION

Air polluted by gases, vapors, dusts, chemical or biological aerosols, or even oxygen-depleted air... These are just a few examples where the use of respiratory protection is required.

Honeywell offers the most extensive range of single-use masks, reusable facepieces elements, powered air purifying respirators and air supply equipment as well as self-contained breathing apparatus for a wide range of applications. With 100 years of experience in respiratory protection, Honeywell concentrates its efforts on developing efficient and comfortable equipment in collaboration with actual users to continuously better meet their needs.

Disposable & Reusable Respirators - NIOSH Approved

H801V & H801 Disposable Mask

- The H801V protection: filters at least 95% of solid and liquid aerosol's that do not contain oil.
- The nose clip is metallic which is easy to shape around the nose.
- Twin, latex-free, straps are elasticated fabric, fully welded to the mask. These are sweat absorbent and provide an excellent degree of tightness.
- EVA nose foam seal to control leakage and increase comfort.
- High performing, humidity-resistant & low breathing resistance filter media
- Lightweight design (12.7g) to reduce wearers' fatigue
- High performance exhalation valve to breath out easily
- Easy to wear with safety spectacles, goggles, giving an excellent field of vision: comfort and versatility means greater efficiency on the job.
- The shell incorporates an arc shaped ribbing for anti-deformation.

BIO-S-CAPE

FEATURES AND BENEFITS

THE BIO-S-CAPE IS AN EMERGENCY ESCAPE BREATHING DEVICE (EEBD), WITH 15 MINUTES DURATION. AS IT IS EASY TO PUT ON IT CAN PROVIDE IMMEDIATE RELIEF IN EVACUATION SCENARIOS, SUCH AS TOXIC OR LOW OXYGEN LEVEL ENVIRONMENTS.

- Regulator triggered automatically upon opening of the bag.
- Automatic positioning of the hood thanks to the inflatable air cushion behind the user's neck.
- Non-metallic end of duration alarm whistle.
- High visibility hood, large, adaptable to all face shapes and all types of facial hair, resistant to moisture, chemical environments and extreme temperatures.
- Fully airtight, comfortable and tear-resistant neck seal due to a double anti-tear layer.
- Ultra light weight 3.58 KG

PROTECTIVE CLOTHING

Honeywell Industrial Safety offers a complete range of personal protective clothing.

Honeywell clothing provides workers with outfits and equipment that are adapted to the risks to which they are exposed. To meet the expectations of different users, a wide range of clothing is available, depending on the nature and level of protection required.

European Standards

The European Economic Community adopted Directive 89/686/EEC in 1989, which defines the requirements that must be met by Personal Protective Equipment in order to preserve the health and safety of users.

THE HAZARD ARE DIVIDED INTO THREE CATEGORIES:

Category 1 Minor hazards

Category 2 Intermediate hazards

Category 3 Serious or fatal hazards

To ensure proper grounding, static electricity cannot be managed in an separate garments (jacket, pants, etc.) but always within a complete system of antistatic equipment.

** Does not protect against radiation - *** Does not protect against flames - Limited burning if it catches fire - Not for use in the event of fire.

HAND PROTECTION

Combining comfort, protection and ergonomics for user safety, designing gloves suited for all uses in a work environment demonstrates our commitment towards maximum user safety. With solid experience in industrial risk, Honeywell Industrial Safety designs and manufactures all of its gloves with the aim of guaranteeing comfort, safety and suitability in the workplace. Our business know-how at each stage of production ensures a uniform level of quality. Furthermore, close relationships have been entered into with large industry companies (automotive, agri-food, glass, foundry, metallurgy, Oil & Gas, Petrochem, etc)

ELECTRICAL SAFETY SOLUTIONS

Honeywell Industrial Safety is the most complete Personal Protective Equipment (PPE) provider for all electrical workers. The need for a comprehensive electrical safety program that's easy to use has never been more critical. The NFPA 70E Standard and OSHA Regulations have been established to protect workers from electrical shock and arc flash hazards and to educate workers about the protection needed from these dangers.

Honeywell Industrial Safety is the world leader in Electrical Safety PPE and live line tools. For over 150 years, our products have helped protect electrical workers from the hazards of their job.

ELECTROSOFT LATEX INSULATING GLOVE

Test Requirements For Hi-Tech Products

In order to meet these specifications, our gloves undergo rigorous testing:

- Visual and dimensional checks.
- Dielectric tests (automatic-test cabins verified periodically by the Central Laboratory for Electrical Industries - LCIE).

BATCH AND TYPE TESTS (FULL LIST AVAILABLE ON DEMAND):

Mechanical tests moisture absorption test (AC proof current test after conditioning for moisture absorption by total immersion in water for a period of 16 h) ageing (in an air oven for 168 h at 70 °C)

TESTS ON GLOVES WITH SPECIAL PROPERTIES:
(The majority of ELECTROSOFT gloves comply with RC category requirements)

Electrosoft Latex Insulating Glove

FEATURES AND BENEFITS

- Electricity is needed to satisfy growing global energy needs and isolating gloves are one of the most important pieces of equipment of personal protection for electricity professionals. They form the first barrier by blocking contact with electric currents.
- Areas of application include production, transportation, generation and distribution of electricity in industries such as railways, telecommunications and construction and for the installation and maintenance of solar panels and hybrid car batteries, etc.
- Non-supported Latex insulating gloves are recommended to be worn in conjunction with a suitable leather overglove to provide mechanical protection from abrasion, cuts, tears and perforation.
- The natural Latex glove is available in beige or red with a rolled or cut edge, according to the needs of the user.
- The natural Latex base offers excellent dielectric characteristics.
- The thicker the glove the higher the electrical resistance.
- An ergonomic design increases comfort by providing additional softness and allows the glove to be put on and taken off very easily.

OVERGLOVES AND ACCESSORIES

OVERGLOVES

FEATURES AND BENEFITS

Overgloves are used to provide mechanical protection from abrasion, cuts, tears and perforation. Three different overgloves are available for low, medium and high voltage.

- Cowhide silicone grain leather is flexible, water repellent and provides excellent mechanical protection.
- Velcro® strap closure for good maintenance.
- Protects Electrosoft gloves against mechanical risks.
- 1.1mm thickness.
- Length 31cm.

GLOVE INFLATOR WITH ADAPTER

FEATURES AND BENEFITS

The G100 is a simple and easy to use, portable glove inflator with adapter to also inspect Class 00 and 0 and smaller gloves. To use the adapter, the glove is secured to the adapter using a nylon strap with a hook and pile closure. The adapter, with glove attached, is then placed on top of the inflator to be inflated for inspection.

GLOVES BAGS

FEATURES AND BENEFITS

Salisbury glove bags are constructed of heavy duty canvas duck and are double stitched at stress points for extra durability. Canvas bags feature a snap hook for hanging on work belts. Bags feature tapered gussets with wide opening tops for easy insertion.

CAT. NO.	GLOVE LENGTH IN. (MM)	DIMENSIONS IN (MM)	WEIGHT LBS. (KGS)

GB116	16 (406)	9" X 18" (229 X 457)	1.2 (.6)

ATTENTION: TO REMAIN EFFECTIVE, INSULATING GLOVES MUST BE USED ACCORDING TO THE FOLLOWING RULES.

Storage: gloves are delivered in a UV resistant plastic bag suitable for transport and storing. Store the gloves in a dry and dark place at a temperature between 10°C and 21°C; do not compress, fold or store in proximity to sources of heat, light or the ozone.

Verification: before each use, conduct a visual examination and check the glove by inflating it. Any puncture or perforation makes the glove unusable.

Warnings: Do not expose the gloves with chemicals or solvents that may cause deterioration, for example oil, grease, turpentine, white spirit, paraffin or any strong acid. Do not use the glove when damp.

Cleaning: With soap and water. Dry below 65°C with ambient humidity.

Labelling: The date of the electrical test carried out at the end of production and the batch number is printed on each glove bag to ensure product traceability

FACESHIELDS & HOODS

FACESHIELDS & HOODS

FEATURES AND BENEFITS

The AS1000HAT, AS1200HAT & AS2000HAT Kits make your Personal Protective Equipment purchasing even easier. These convenient kits contain a AS1000HAT or AS1200HAT or AS2000HAT, a 10 cal/cm² or 12 cal/cm², or 20 cal/cm² ATPV rated AFHOOD, safety glasses and an ASBAG.

The AS2000HAT has an ATPV rating of 20 cal/cm² and utilizes nanotechnology to provide a clearer, more transparent window for improved visibility. The AS1200HAT has an ATPV rating of 12 cal/cm² and includes ventilation ribs that allow a natural convection air flow through the top of the face shield. The AS1000HAT has an ATPV rating of 10 cal/cm². The lens provides a 7.5" x 20" viewing area with an extra light tint.

The SKA kits are an ideal kit to use with PPE programs that exceed 8 cal/cm² or with 8 cal/cm² to 12 cal/cm². ATPV rated coveralls and coats.

Note: Due to AS1000HAT ATPV rating of 10 cal/cm², protection greater than 10 cal/cm² cannot be achieved.

Due to AS1200HAT ATPV rating of 12 cal/cm², protection greater than 12 cal/cm² cannot be achieved.

CAT. NO.	DESCRIPTION	DESCRIPTION

AS1000HAT-PPC	12 cal/cm ² weight balancing arc flash protection face shield unit with hard hat	2
AS1000HAT	20 cal/cm ² weight balancing arc flash protection face shield unit with hard hat	2

Note: In order to achieve 360 Degree 20 cal/cm² protection, a 20 cal/cm² balaclava must be worn. NFPA 70E: An arc rated hood shall be used when the anticipated incident energy exposure exceeds 12 cal/cm².

Important: The maximum Arc Flash Protection of a kit is equal to the lowest cal/cm² rating of any component in the selected safety kit.

ARC FLASH PRO-AIR FLOW HOOD SYSTEM

ARC FLASH PROTECTION HOODS

FEATURES AND BENEFITS

Integrated with Salisbury’s PRO-HOOD® Arc Flash Protection Hood. Now, all Salisbury PRO-HOOD® Arc Flash Protection Hoods are available with an optional integrated cooling system. This newest addition to the PRO-AIRTM line of products provides additional air flow and cools the worker.

This unit is excellent in warm conditions or confined spaces. The easy to wear system is light weight, compact and easy to use. The system is designed to provide the worker with approximately 80cfm of air flow throughout the breathing zone. The unit is powered by 8 AA batteries and is designed to maintain a useful continuous life of up to 35hrs at 80cfm. The unit is non-filtered and is not considered a respirator.

Product Number: 1412210-Coat 1412211-Overpant

CERTIFICATIONS

Category PPE
PPE Meets ASTM F1506 and NFPA 70E

FEATURES AND BENEFITS

- Comfort of 100% cotton,
- Flame resistant
- Improved moisture management and breathability
- Fit optimized to local demographics
- Elasticized waist
- Leg openings for coverall and overpant
- Velcro fastening for coverall and coat
- Easy to put on and take off
- Consistent Quality
- Washable at home or Industrial Laundries, according to Care Instructions

Product Number: 1412209-Coverall

WARNING

- Prior to use of this garment a hazard assessment must be made by a trained safety professional
- It is necessary to assess hazards in the work environment and to match the appropriate personal protective equipment to hazards that may exist
- At a minimum, a complete and thorough hazard assessment must be conducted to properly identify the appropriate personal protective equipment to be used in a work environment
- Failure to read and follow all product warnings and instructions and to properly perform a hazard assessment may result in serious personal injury, illness or death
- This garment is not intended for entry or structural fighting and will provide no protection from chemical exposure

- This garment is constructed from fabric that is self-extinguishing upon removal from a flame source
- Flammable contaminants reduce the thermal performance of any flame resistance garment
- Wash garment to ensure that no greases, oily soils or other flammable contaminants are present when garment are worn. Repairs to the garment must be made with the same thread and fabric
- The user is responsible for determining that this garment is appropriate for intended use and complies with all laws and regulatory standards
- Do not reuse this product after an arc exposure

ELECTRIGUARD™ 20KV DIELECTRIC OVERBOOTS

20kv dielectric overboots are intended to provide protection against step and touch potential and worn over standard leather work boots or steel toe work boots. They are recommended for use when working in high risk task environments with voltages ranging between 750V and 20,000V.

STANDARDS INFORMATION

HONEYWELL INSULATING MATS

TECHNICAL SPECIFICATIONS

Applications

- Near HT and LT control panels;
- In front of electric switchboards;
- Power transmission rooms;
- Substations;
- Around busbars;

Has an indoor or outdoor portable protection element for site engineers working on live equipment.

Material

Elastomer PVC mats to meet the varying requirements of every client. The insulating mats are manufactured using state-of-the-art machinery and undergo rigorous quality controls.

Classification

Safety mats for electrical applications are divided into three main classes based on voltage ratings.

Color

Black top layer and yellow bottom layer.

Surface

Specially designed small aberration to make upper surface anti-skid.

Size

Standard width is 1 meter with a length up to 10 meters per roll.

Marking

Every meter of mat is marked with class symbol, lot number or batch number, and Honeywell brand name.

Packing

Packed in gunny bags of Jute Hessian Cloth to avoid mechanical damage of material during transit.

Bottom Surface

Grips well to the surface to prevent mat movement when heavy equipment or forklifts are in transit.

THE HONEYWELL HARD HAT MOUNTED VOLTAGE DETECTOR

RELIABLE SHOCK PROTECTION FOR LIVE FIELDS

The new HHVSB11 Hard Hat Mounted Voltage Detector (HVD) of Honeywell has been designed to keep the user safe from possible electrical hazards. It is an essential safety equipment for all professionals working in and around high voltage equipment and installations. When a person wearing the Honeywell HVD approaches a high-voltage source, the device emits a warning alarm, and its LED light indicators start flashing – alerting the wearer and others around that a high voltage current source is present in the immediate vicinity.

PRODUCT NUMBER	DESCRIPTION
HHVSB11	Honeywell Hard Hat Mounted Voltage Detector

TECHNICAL SPECIFICATIONS	
Application	Detection and alerting of high tension lines (11 KV) at a distance
Type	Non-Contact
Operating Temperature	0 °C to 55 °C
Detecting Frequency	50Hz / 60Hz
Sensitivity	For an 11 KV high tension line with 50 Hertz / 60 Hertz the sensing threshold will be at a distance of 6.5* feet minimum (first buzzer beep). The HVD will only detect AC voltage.
Detecting Voltage	11 KV
Humidity	20% to 50% relative humidity
Product Dimension	Approx. 50 mm X 90 mm X 60 mm
Package Dimension	Approx. 136mm X 94mm X 57mm
Weight / Mass	100 gm Approx.
User Interface	Push Button – Power On / Off
Ingress-Protection Rating	IP65 per IEC standard 60529
Audio Visual Indications	Alarm: Audible – Buzzer Visual – RED LED Power On Visual – Power on (Blinking Green LED at a rate of 5 sec)
Buzzer Interface	Yes
Buzzer Sound Level	80 dB \ 10 cm
Battery Voltage in Volts	3 Volts
Battery Type	2 X 1.5V AAA
Typical Warning Distance	About 6.5 feet (1.98 Meters) from a 11 KV AC Line

SAFETY FOOTWEAR

Across its footwear brands, Honeywell Industrial Safety has developed a culture of innovation and expertise, to offer footwear with high added value that meets the requirements of a job, a specific environment or a geographical region. Our products combine advanced technology, comfort and ergonomics to satisfy the needs of all our customers. The knowledge and understanding of our partners' expectations ensure that we develop quality footwear that is durable and reliable, to provide functional, comfortable and attractive protection.
