The Clear Choice For Packaging

Global Technology,
Excellent Quality Standards,
Affordable pricing &
Top-class performance.

Your brands are indeed good products. Packaging these products calls for investing in the right solutions that complements the quality. Lower packaging material usage, minimizing waste, low energy consumption and lesser carbon footprint are important considerations for the packaging solutions we propose.

Every solution we deliver reflects our approach to maximize returns for our customers.

Total solution for your packaging needs

Primary Packaging

From standalone machines to line integration.

Unscrambler

Rinser/Filler/Capper

Pouch Filling

Flow Wrapping

Labellers

Our primary packaging solutions are built on the most innovative technologies, in order to provide customers with all technological and performance related advantages.

Be it sachet, stand up pouch (doypack), stick pack, pillow bag or bottles we have right machines to choose from. Strength, ease of operation, ergonomic design and reliability are the main characteristics of our machines.

Secondary Packaging

From simple packaging to innovative solutions.

-Overwrapping Machines
Cartoning Machines

In many case secondary packaging is used for variety of reasons, and often this is the packaging most visible to the consumer. Our solutions for secondary packaging are both reliable and performance oriented, helping customers achieve their objectives with Fast ROI.

Case Packing and Shrink Wrapping

Cost effective and highly reliable End of Line automation

Case Erectors

Top Load Case Packers

Side Load Case Packers

Wrap Around Case and Tray Packers

Case Sealers

High Speed Shrink Wrappers

Automation of end of line packaging process, while desirable, is often compromised due to challenges of ROI. By being cost effective and highly reliable at the same time, our end of line automation solutions help to resolve this dilemma for our customers.

Training and Documentation

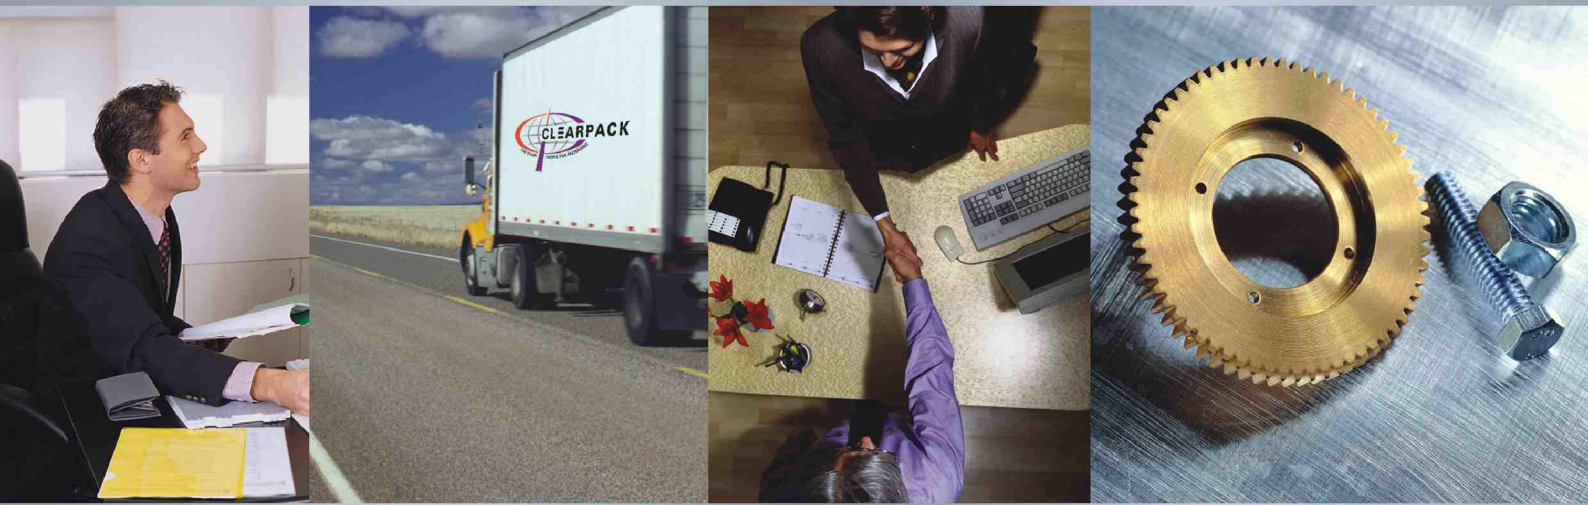

Complete Project Management

Clearpack has proven capabilities to provide its customers with turnkey packaging solutions.

Our team of project managers and engineers undertake all the activities right from concept to commissioning. A turnkey project typically begins with understanding your stated and unstated needs, detailed layout of the project followed by equipment support, complete integration, testing, personnel training and documentation, to conclude with successful running.

Our aim is to execute projects at optimal cost to enhance ROI for our customers.

Our Machines deliver
superior performance.

Our services ensure
they continue to do so.

- After sales support is something that differentiates us.
- With Global presence and team of trained service engineers we aim to keep high 'up-time' for the machines we supply.
- Our team of engineers test machines before dispatch, install & commission machines as per acceptance parameters and train your staff to complete new machine supply.
- Documentation in local language, proactive preventive maintenance visits, AMC's, re-training are some of the services we provide to ensure that your machines, are always in good condition and production ready.
- We continually invest in training our service engineers to be able to deliver under tight time constraints.

Why choose

● Solution Orientation

- Provides solutions at optimal cost through license manufacturing strategy where possible
- Long term partners to customers - not mere suppliers

● Localisation

- Local service and training support
- Quick response time enhances equipment uptime
- Local project management teams

● Best-in-Class Focus

- Offer products from industry leading supplier-partners
- Vast packaging knowledge & industry experience available to our customers

Presence across key markets

Our facilities in China and Malaysia manufacture end of line systems under the license of our European partners. In-house fabrication shop, quality control, assembly & testing allow us to build these systems to same exacting standards as our partners.

Be it supply of stand-alone machine or a complex integrated turnkey packaging line, we put our experience and engineering know-how to work for our customers.

Over the last 23 years, we have installed and commissioned several hundred machines successfully across Asia and Middle East for various applications in primary, secondary and end of line packaging. We provide our cumulative expertise and industry knowledge to our customers to solve their packaging problems and build innovative packaging solutions.
