

**THE LEADING SPECIALIST CONTRACTORS
FOR MOISTURE & THERMAL PROTECTION
AND SPECIAL COATINGS**

SINCE 1996 — *Leading the Way in Moisture and Thermal Insulation*

Welcome to AMC Protection

Established in 1996, **AMC Protection** has protected its Client's investment across the complete spectrum of the Construction industry in the GULF. **AMC** has been the trusted Thermal & Moisture Protection expert in a vast range of projects; from airports to architectural masterpieces, skyscrapers to shopping malls & luxury hotels. **AMC** has provided a full variety of innovative sustainable waterproofing & EIFS solution to its range of Clients working on everything up to multi-billion Dollar investments. We pride ourselves on providing peace of mind and stability in this ever evolving and challenging world of construction in a desert environment.

Crowned with the Internationally recognised ISO 9001:2015, ISO 14001:2015, ISO 45001:2018 Certificates. **AMC** is one of the most sought after companies in the specialist field of concrete treatment and protection.

"I established **AMC Protection** 25 years ago. We cater for the ever-increasing demand for highly advance solutions in Thermal & Moisture Protection for the construction industry here in the UAE. With offices in Abu Dhabi & Dubai, **AMC** continues to be a recognised leader in its field, providing our Clients with leading edge technology. We carefully source our specialist products from a broad range of international manufacturers, sourcing solutions for the increasingly technical challenges of the UAE Market."

Founder and CEO – Monzer Akibk

Our Quality Guarantee

Successful delivery of hundreds of projects is testaments to **AMC's** commitment to quality assurance and exemplary customer service-founding principles of the Company since the start in 1996.

Our Mission

To maximise the return on investment for all our Clients, we pledge to provide the highest degree of technically advanced, innovative and environmentally friendly solutions in Thermal & Moisture Protection.

Our Vision

Our vision is to continue being the UAE's technological leader within the ever-evolving Thermal & Moisture Protection market. We will keep pushing the boundaries of innovation, quality, execution and customer service, while efficiently delivering solution-focused packages for our Clients.

SINCE 1996 — *Leading the Way in Moisture and Thermal Insulation*

The Professional Team

AMC Protection takes a pride in employing only the most highly skilled and disciplined professionals across all layers of our organisation. This allows us to execute and deliver projects to the highest standards, at the most competitive cost: On time, *every time*.

BASEMENT TANKING SYSTEMS

These systems are by far the most important waterproofing application in the Emirates due to the ground water level. AMC offers a turn-key solutions for all types of Basement Tanking systems starting from the design process through to final execution. We utilise the best certified systems from globally renowned manufacturers, whether the application is raft or deep foundation, provided with an extended guarantee.

SINCE 1996 — *Leading the Way in Moisture and Thermal Insulation*

EIFS SYSTEM

Exterior Insulation & Finish System (EIFS) is an energy efficient thermal wrapping applied to the exterior surface of the building, finished with long-time, decorative and protective coating system.

AMC Protection has executed EIFS since 2013 with many Client projects delivered in UAE. Examples of our work can be seen at the Family Hotel in Abu Dhabi, Al Ain Stadium & Mixed Used Development and Residential villas in Palm Jumeirah Dubai.

ROOFING SYSTEMS

Whether your construction is a concrete, steel or wooden structure, the importance of Roofing Systems is an essential element. **AMC** has a vast experience in 'green roofs' design and execution. We also provide complete solutions – both conventional and inverted – thanks to the vast variety of Roofing systems at our disposal in the AMC range. This suite of solutions has distinguished us from the other Contractors who generally only offer one system for all cases.

SINCE 1996 — *Leading the Way in Moisture and Thermal Insulation*

PROTECTIVE COATING & INDUSTRIAL FLOORING

Due to the increase in the number of covered & multi-storey car parking structures in the Emirates, there was a sharp rise in the demand for Industrial & Traffic Coating Systems in recent years. **AMC Protections**'s team of specialists in Protective Coating & Industrial Flooring provide all types of flooring works for our Client's needs – such as polyurethane and epoxy coating, cementitious and epoxy self-levelling screeds, protective coatings for concrete others.

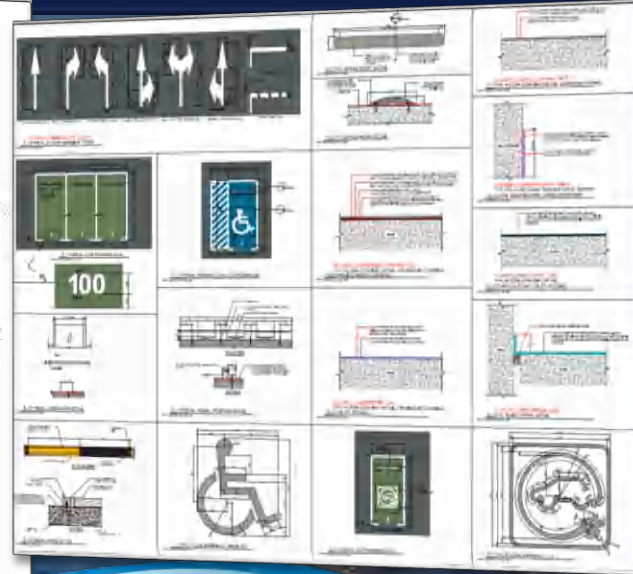

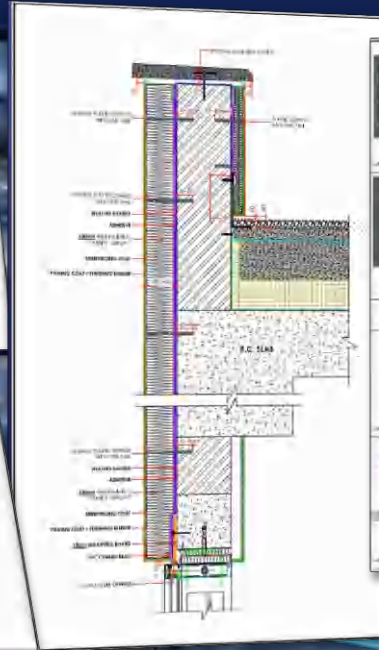

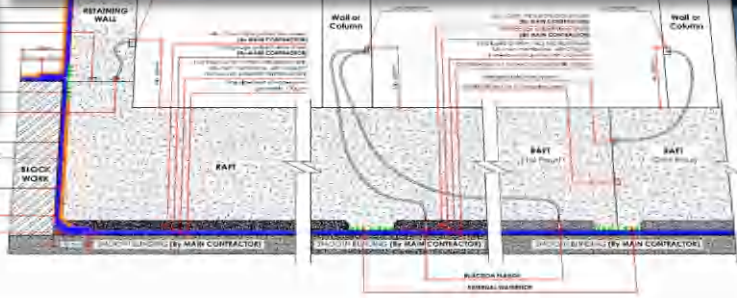

AMC also specialises in structural crack repair using the Injection Method with Epoxy and Polyurethane.

SINCE 1996 – *Leading the Way in Moisture and Thermal Insulation*

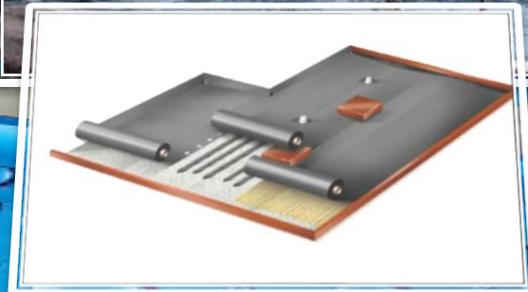

DESIGN & ENGINEERING

AMC Protection follows an important principle, that no successful and quality engineering work is possible without a complete design package that covers all angles and details. Designs including detailed CAD Drawings, Method Statement and Quality Control plans, are adopted for each bespoke project. These include full coordination and cooperation with the related manufacturers requirements and recommendations.

SealEco Waterproofing offers quality water & weather protection systems to vastly increase the service life of buildings and all types of construction. Their range of products is divided in two application areas; Buildings and Infrastructure. SealEco manufactures EPDM membranes with their unique seaming technique using 'Hot Air Welding' – this method allows the prefabrication of panels as per the actual site requirements, thus reducing execution time errors.

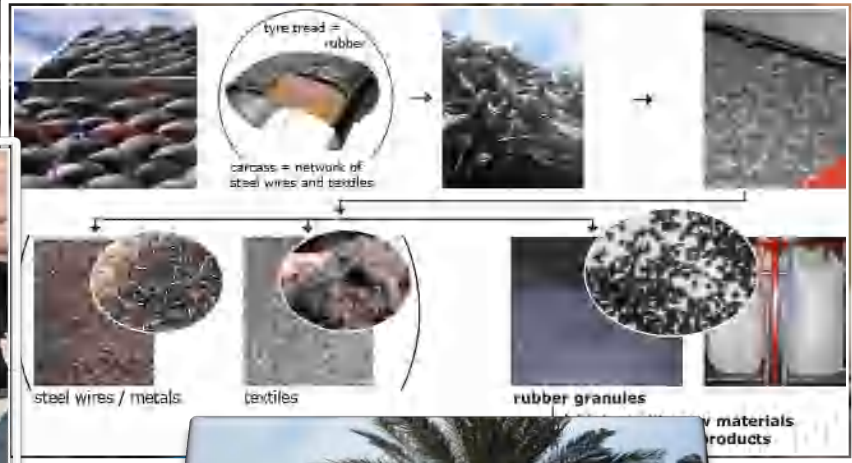

eternoivica

Eterno Ivica produces accessories for waterproof coverings and finishing elements for roofs and terraces: Products compatible with any type of waterproofing membrane, products for laying exterior raised floors, products for drainage and canalising water.

KRAIBURG

KRAIBURG relastec uses recycled rubber to manufacture new products for the Building industry such as recycled rubber protection mats for waterproofing membranes. Kraiburg takes an active part in protecting the Environment and conserving natural resources.

FAMC PROTECTION
