# Introduction

As a leader in the field of electrical and mechanical engineering, we have more than 30 years of experience with all types of electrical motors and generators. Kohinoor electrical generator services was established in 1986.

A staple across the industry, we have developed our technical expertise in repairing and overhauling electrical motors and generators. Repair and rewinding services of electric motors to the motor industry. AC & DC motor, slip ring type motor, generators and pumps can be repaired. HV & LV motor rewinds, electric motor overhaul, modifications, dynamic balancing and full machining services are available.

Here are some of the repair and overhaul services we provide:

- Induction Motor Rewinding
- Slip Ring Type Motor & Rotor Repair & Rewinding
- Submersible Pump Repair & Rewinding
- Generator Rewinding & Servicing
- AC Motor Repair
- Transformer Coil Rewinding
- DC Motor Repair
- AC & DC Motor Overhauling
- Chiller Compressor Stator Rewinding & Overhauling
- Pump Repair & Overhauling
- Laser Alignment
- Dynamic balancing
- Vibration analysis
- All types motor rewinding & overhauling

Since the time of its establishment Kohinoor aim has been to achieve a record of excellence second to none.

After considerable investment in talent, energy and time Kohinoor electrical generator services developed their Quality Management System and Environmental Protection Management System and when coupled to our Lean and Continuous Improvement Program this confirms the Companies target of improved all round performance reflected in better economies of scale, customer satisfaction and gives us the competitive edge over our competitors.

**Generators**

**Induction Motor**

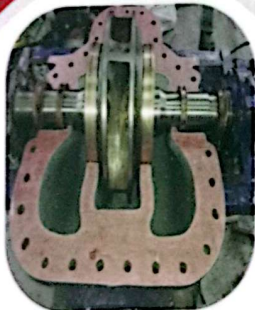

**DC Motor**

**Chiller Compressor**

**Transformer Coil rewinding**

**Centrifugal Pump Overhauling**

**Double Suction Pump**

**Double Speed Motor Rewinding**

**Gearbox Repair**

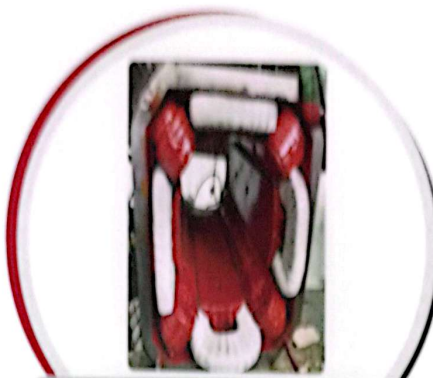

**HT Motor Overhauling**

**Overhead Crane Motor**

**DC Motor Rewinding**

**Submersible Pump**

**Slip Ring Rotor Rewinding**
