## World-Class Experts

Our successful experts are qualified from world-class accredited organizations around the world. Our professionals present state-of-the-art service in various fields with hands-on experience in designing and implementing any project in the G.C.C.

## About Intact Controls

As one of the region's leading engineering corporations, we take pleasure in introducing ourselves as a company, established in the sector of transformer for over a decade engaged in production of various types of dry and oil cooled transformers.

SINCE

then Intact Controls Transformer Industries L.L.C has been a pioneer and has retained its leadership position in the management and application of Transformer Industry.

passion, inspiration and creativity. Our factories are equipped with the latest production and test facilities. Comprehensive component stocks are held to ensure fast deliveries of both standard and customized products.

We provide the world, with one stop diversified investment opportunities whilst building value with each step of the journey that involves integrity,

Our factory is based in Sharjah, U.A.E., promoted by technocrats, with branch offices in Dubai, U.A.E and Riyadh, K.S.A.

3

# Vision

Our mission is to become the leading transformers manufacturer in the GCC and gradually extend our wings to the other parts of the world, by continuing to introduce innovative products and quality services to the clients, observing highest ethical and professional standards in all business dealings, and treatment of its employees by ensuring profitable growth and by adding value through superior quality products, knowledge and commitment.

## Interesting Facts

Firmly believing on our core value of "commit and deliver", Intact Controls constantly strives to become a leading international group by providing a meaningful and satisfied consultancy and design right through our State-of-the-Art for making Power and Distribution transformers etc.

# Business Activity

Our professional executives having a depth of knowledge and obvious passion for the usage of design thinking help every business individually, injecting greater creativity into problem solving to deliver the specific need of every client.

## Applications

AIRPORTS

CONSTRUCTION INDUSTRIES

MARINE INDUSTRIES

SWITCHGEAR INDUSTRIES

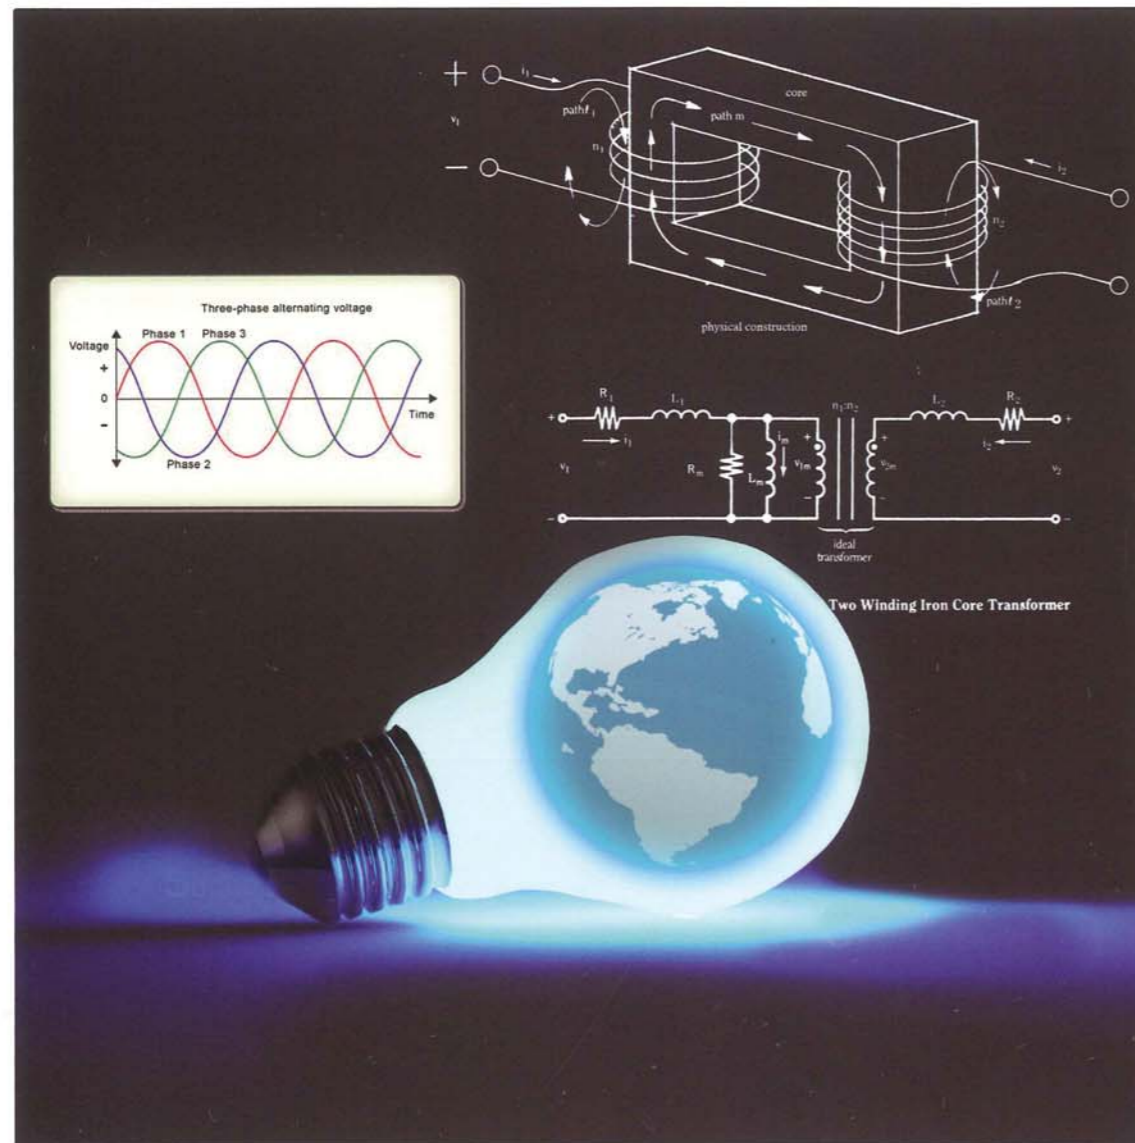

OIL FIELDS

## Who can Benefit?

A technology-enabled management philosophy is to accelerate integration and installation of high-end products with the speed of now. All materials used to make transformers such as clamps, laminations, bobbins, winding wire, terminal blocks etc. are imported from the world recognized European brands. Our esteemed customers are from leading industries, marines, oil fields, control panel manufactures.

Dubai Dry Dock, DEWA, SEWA, DUCAB, Petrofac, Siemens, Schneider, Specialist Services, Red Sea, Belhasa, Gulf Adhesive Labels Factory, Six Constructions, SBM Offshore, Ferrari World, Al Jazeera Port, Dragon Offshore (UAE); SSEM, SEM, RISAS (KSA); Qatar Fertilizer, Verger et Delporte (Qatar) are some of our valuable customers.

## Why Intact Controls?

At Intact Controls, we emphasis on professional integrated commitment that enables us to understand the need of client to ensure quality service.

Our premium quality services reflect an enthusiastic team of specialists and technocrats, equipped with not only the entrepreneurial spirit but also an in-depth understanding of clients' needs; enabling them to focus on innovative

methods, top of the line designs, effective, efficient and productive management and establishing an everlasting bond of trust and loyalty with our customers.

# Our strength

With many years of successful manufacturing experience and research and development, we have acquired the technology to manufacture Power and Distribution Transformer up to rating as under:

### Distribution Transformers:

Power rating up to 2000KVA  
Voltage rating up to 36KV

### Power Transformers:

Power rating up to 5MVA  
Voltage rating up to 36KV

We can provide special type transformers of impregnation dry type, Cast – resin and Oil immersed types as per the requirement of customers. Our range of transformers includes but are not limited to:

- Control Transformers
- Current Transformers
- Safety Transformers
- Auto Transformers
- Automatic voltage stabilizers
- Motor starting auto Transformers
- Rectifiers
- Cast Resin Transformers
- Reactor Transformers
- 400Hz Transformers

## Our main features

Product ranges from 50VA and up to 5MVA  
Computer aided design center  
Imported high quality materials  
State of the art technology  
Highly trained work force  
Dedicated sales and service team  
Competitive Prices

# Technical Specification of Transformers

## Voltage Regulation ( $\Delta v$ )

The voltage regulation of a transformer is the numerical difference between the rated secondary and the actual secondary voltage.

$$\% \Delta V = \frac{V_{\text{No-load}} - V_{\text{Full load}}}{V_{\text{Full load}}} \times 100$$

## Impedance Voltage ( short Circuit voltage )

It is the voltage required to be applied to drive the rated current under short circuit condition. It is a vector sum of resistance and reactance voltage.

## Insulation Level

It is a combination of the rated voltage, power frequency withstand voltage, impulse withstand voltage values which characterizes the insulation of the apparatus. Basic Insulation Level ( B.I.L ) is a term which includes the following characteristic of a transformer.

- Power frequency voltage withstand level.
- Lightning impulse voltage withstand level
- Switch impulse voltage withstand level.

[Applicable to transformer windings above 200KV]

## Standards

Transformers are manufactured & tested in accordance with the following standards.

- IEC-60076 : Power transformers
- EN-61558-2-1 : For less than 5KVA
- EN-61558-2-2 : Control transformers
- EN-61558-2-4 : Isolating transformers for general use
- EN-61558-2-6 : Safety isolating transformers for general use
- EN-61558-2-12 : Constant voltage transformer
- EN-61558-2-13 : Low capacity auto transformers
- EN-61558-2-15 : Isolation transformer for medical use
- EN-61558-2-16 : Power supply unit
- EN-61558-2-17 : Switch mode power supply transformer
- EN-61558-2-18 : Transformers for medical application
- EN-60947-4-1 : Motor starting 3phase auto transformers
- EN-61558-2-20 : Reactors

## Windings

Windings are made with dual coated enameled copper wire round and rectangular type.

- Class B : Maximum temperature 130°C.
- Class F : Maximum temperature 155°C.
- Class H : Maximum temperature 180°C.

Insulation Class	Y	A	E	B	F	H	C
Maximum Temperature °C	90	105	120	130	155	180	>180

## Core

- CRGO lamination grade M6, Maximum guaranteed loss. 1.10W/Kg. @ 1.5 Tesla 50Hz
- CRGO lamination grade M5, Maximum guaranteed loss. 0.97W/Kg. @ 1.5 Tesla 50Hz
- CRGO lamination grade M4, Maximum guaranteed loss. 0.89W/Kg. @ 1.5 Tesla 50Hz
- CRGO lamination grade M3, Maximum guaranteed loss. 0.79W/Kg. @ 1.5 Tesla 50Hz

# Technical Specification of Transformers

## Vacuum Impregnation

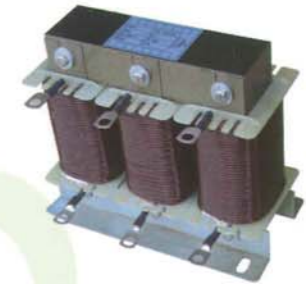

All transformers are systematically impregnated with class F or Class H insulating varnish, in order to avoid moisture absorption, to stop wear due to vibration, to improve thermal exchange and to reduce the noise level.

## Dielectric Strength

The property of insulating material which enables it to withstand high voltages without detonation or failure is expressed in terms of minimum electric strength/ electric stress which will cause breakdown. It is expressed in terms of breakdown voltage per unit thickness of dielectric.

$$E_{br} = \frac{V_{br}}{t} \quad \text{where} \quad \begin{aligned} E_{br} &= \text{Breakdown stress KV/mm} \\ V_{br} &= \text{Breakdown voltage, KV} \\ t &= \text{Thickness of dielectric, mm} \end{aligned}$$

Reference values of Insulation level

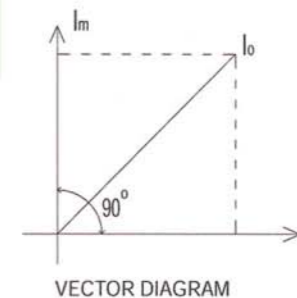

Normal system voltage KV rms	Highest system voltage KV rms	One minute power frequency test voltage KV rms	Impulse test voltage KV peak
3.3	3.6	16	45
6.6	7.2	22	60
11	12	28	75
15	17.5	38	95
22	24	50	125
33	36	70	170

## No-load Current

No-load current is equal to the vector sum of the magnetizing current ( $I_m$ ) and Hysteresis current and eddy current ( $I_{h+e}$ ).

$$I_0 = \sqrt{I_m^2 + I_{h+e}^2}$$

The magnitude of No-load current is measured at rated voltage and 112.5% over voltage.

## Percentage of Impedance

Percentage impedance is the vector sum of percentage reactance and percentage resistance.

$$Z\% = \sqrt{X(\%)^2 + R(\%)^2}$$

$$R\% = \frac{\text{Calculated load loss in KW}}{\text{Rated KVA}} \times 100$$

$$I_{sc} (KA) = \frac{KVA \times V_L}{\sqrt{3} \times Z\% \times 100}$$

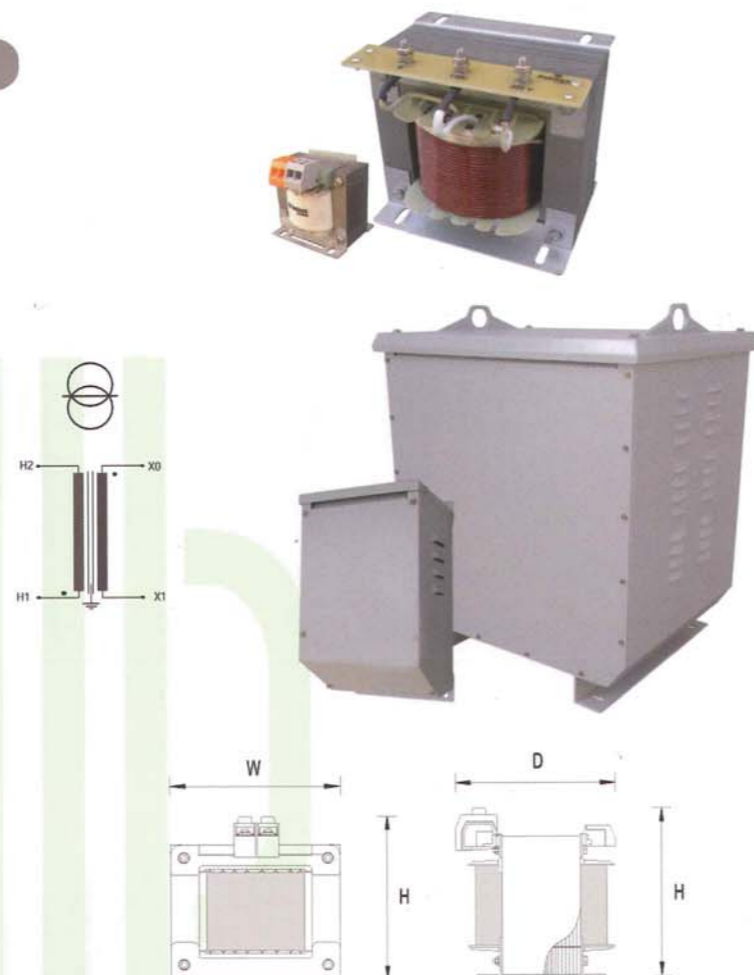

Where :

- I = Rated primary current
- V = Rated primary voltage
- Z = Impedance percentage

# Impregnated Single Phase Transformers

## Specifications

- Standard : According to EN-61558
- Open construction degree of protection IP-00
- Enclosure type Degree of protection IP-23, IP-44, IP-55 etc..
- Winding : Enameled copper wire Class F, B, H Galvanically isolated
- Temperature class insulating materials : B
- Insulation class : F
- Max. ambient temperature : 25°C to 50°C
- Electrical protection class : I
- Max. temperature rise : 95°C
- Insulation between PRI and SEC ( for V ≤ 450V ) : 4.8KV
- Frequency : 50Hz, 60Hz, 50/60Hz
- Fixing system : Through angles DIN 41307
- Type : Dry type, Vacuum impregnation

## Portable Safety Transformers

- Metal enclosure, IP-55, RAL 7032
- Dry type, Vacuum impregnated
- Temperature class insulating materials : B
- Terminals : Terminal blocks at primary & Industrial sockets at secondary
- MCB & ELCB protection at output
- CEE panel mounted receptacles, DIN VDE 0623, EN 60309-2

Standard Voltages :					
Primary : 220-230-240-320-380-400-415-440-460-500-600-660-690V					
Secondary : 110-115-220-230-240-380-400-415V

IT3-20KES	20	790	580	500	89.3

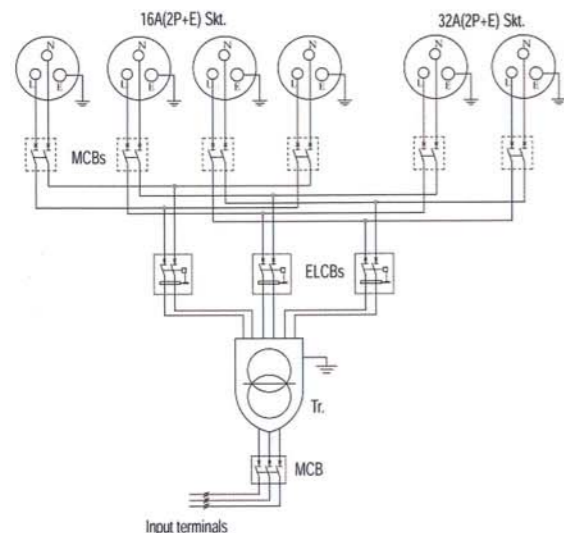

Note : Tolerance on the given dimension  $\pm 2$ mm

- Portable safety transformer for power tools
- Lighting & Machinery application on construction sites
- Transformers & Enclosures shall conform to safety standards
- Number of sockets, its current ratings, ELCB / MCB ratings,
- ELCBs are provided in order to avoid electrical shock

Standard Voltages :					
Primary : 220-230-240-320-380-400V					
Secondary : 110-115-220-230-240V

## Safety Transformers & Swimming Pool Transformers

### Cast-Resin Encapsulated

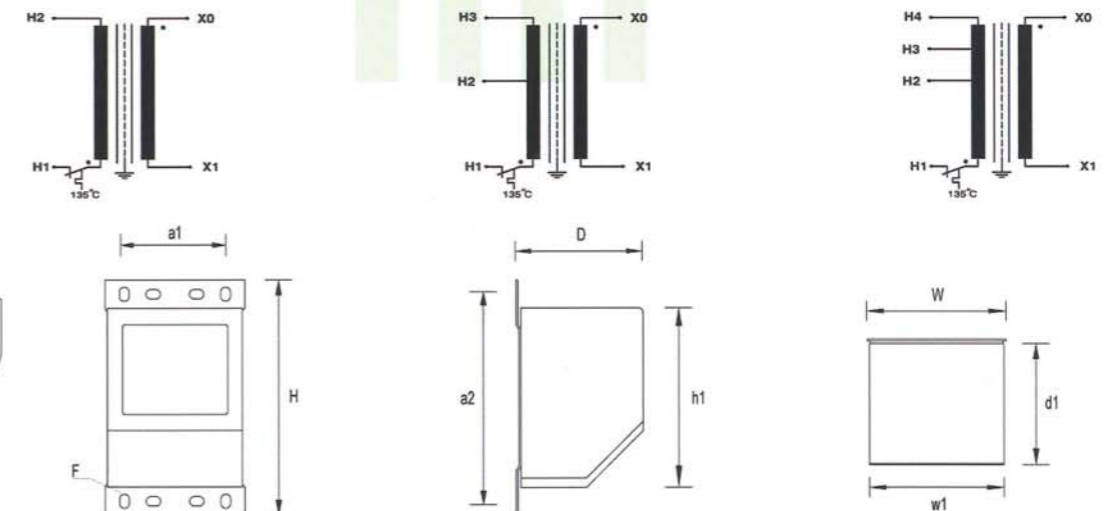

- Fiber encapsulated enclosure, Protection index IP-55
- Vacuum-pressure impregnation with thermo setting polyester resin
- Terminals : Bolt terminals ( M4, M6, M8... etc ) at primary & Industrial socket at secondary
- MCB & ELCB protection at output
- Cast resin encapsulation
- Floor mounted Yellow color fiber enclosure
- Cast resin encapsulation

Standard Voltages :					
Primary : 200-220-230-240V					
Secondary : 110-115V					
Model. No.	Power ( KVA )	Overall Dimensions (mm)			Total Wt. Kg.
		Height (H)	Width (W)	Depth (D)	
IT-3KFE	3	410	360	285	32.3
IT-5KFE	5	520	425	410	61.0

- Lighting and machinery applications on building sites.
- Housed in reinforced fiber glass enclosure providing safety security and durability.
- Various power input / output voltages can be made on request.
- The sockets shall conform to DIN VDE 0623, EN 60309-2 and 40A, 2P, 30mA ELCB is provided at the output in order to avoid electrical shock.
- Protection from fire hazard, air and water, Sealed type and easy to handle.
- Cable gland is provided for incoming cable access.

### Swimming Pool Transformers

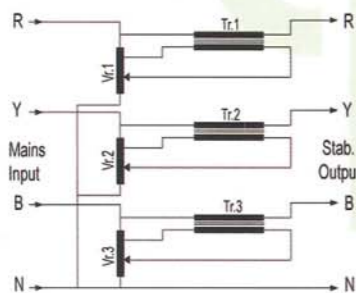

Model No.	Power ( W )	Primary Amp.	Primary Volt.	Secondary Amp.	Secondary Volt.	No-Load Losses W	Short-Circuit Voltage %	Efficiency %

# Automatic Voltage Stabilizer

Operation principle	Electromechanical, by electronically controlled regulating transformer
Input voltage range	$\pm 10\%$ , $\pm 15\%$ , $\pm 20\%$ , $\pm 30\%$
Output voltage regulation	$\pm 1\%$
Response time	$< 1.5\text{ms}$
Frequency	47 ~ 63Hz
Stabilization principle	Maintain each phase voltage stable irrespective of load balance
Power factor	$> 95\%$
Harmonic distortion	$< 1\%$
Efficiency	$> 96\%$
Protections	MCB in input, Under voltage and over voltage protection
Delay timer	10sec. to 30min
Enclosure	Metal enclosure, Powder coated RAL 7032
Protection degree	IP-23, IP-44, IP-55
Includes	Signal light
	Output voltmeter
	MCB
Options	Digital voltmeter, Ammeter and Frequency meter
	Under/Over voltage cut off
	Overload protection
	Bypass control switch
	Input circuit breaker

14

## Our Promise

At Intact Controls we believe that quality means an appealing and enduring business. We are providing customer care service of products for all clients with a proven track record of success and improving efficiency. We are integrating these approaches, which provides results that exceed expectation of each individual.

## Partners

As a leading company, we are very proud of our client relationships. Yes, our clients are our business partners, but they are also our neighbors.

And that means our commitment goes far beyond just getting the job done – it also extends to building communities, providing vital support to client operations and meeting goals beyond expectations.

Our focus is about consistent and unwavering professionalism, service and quality. And that's why many Intact Controls Transformer Industries L.L.C clients have retained their partnership with us.

We partner with our clients in a way that we provide them with the best of our quality products and maintain a long-term relationship.
