Your Power In Safe Hands

THE POWER OF **دبي**

MOHAMMED BIN RASHID SME AWARD

For Manufacturing Business

2013 Winner

24/7 on – Call Services:

Precision industries service division offers, round the clock service, by a team of highly trained engineers & technicians. Our teams have comprehensive knowledge, of the power generation industry, their experience and commitment enable us to provide professional and efficient service to all our clients, regardless the project having a single standby generator or generator banks with load sharing & energy management systems. Our teams undergo continuous training & quality programs thus ensuring that all service calls are completed in accordance with technical, quality & regulatory standards

Genuine spare parts

We at Precision Industries offer a full range of genuine consumables & replacement parts for most models of industrial generators. Our inventory holds oil and air filters, replacement belts bearings and components for complete engine overhaul. Our well stocked warehouse is located in the centre of the Dubai.

We guarantee availability & prompt delivery of any genuine spare parts or any essential components that may be needed to run client systems effectively & efficiently

Generator Servicing & Maintenance Contracts:

We at Precision Industries provide "Generator Service Contracts" offering guaranteed call out response times. Planned periodic maintenance as covered in our service contracts enhances generator life & ensures reliable performance in case of power disruptions.

Each service contract can be tailored to suit client's individual requirements, irrespective that the Generator supplies primary power or is used as a standby power source.

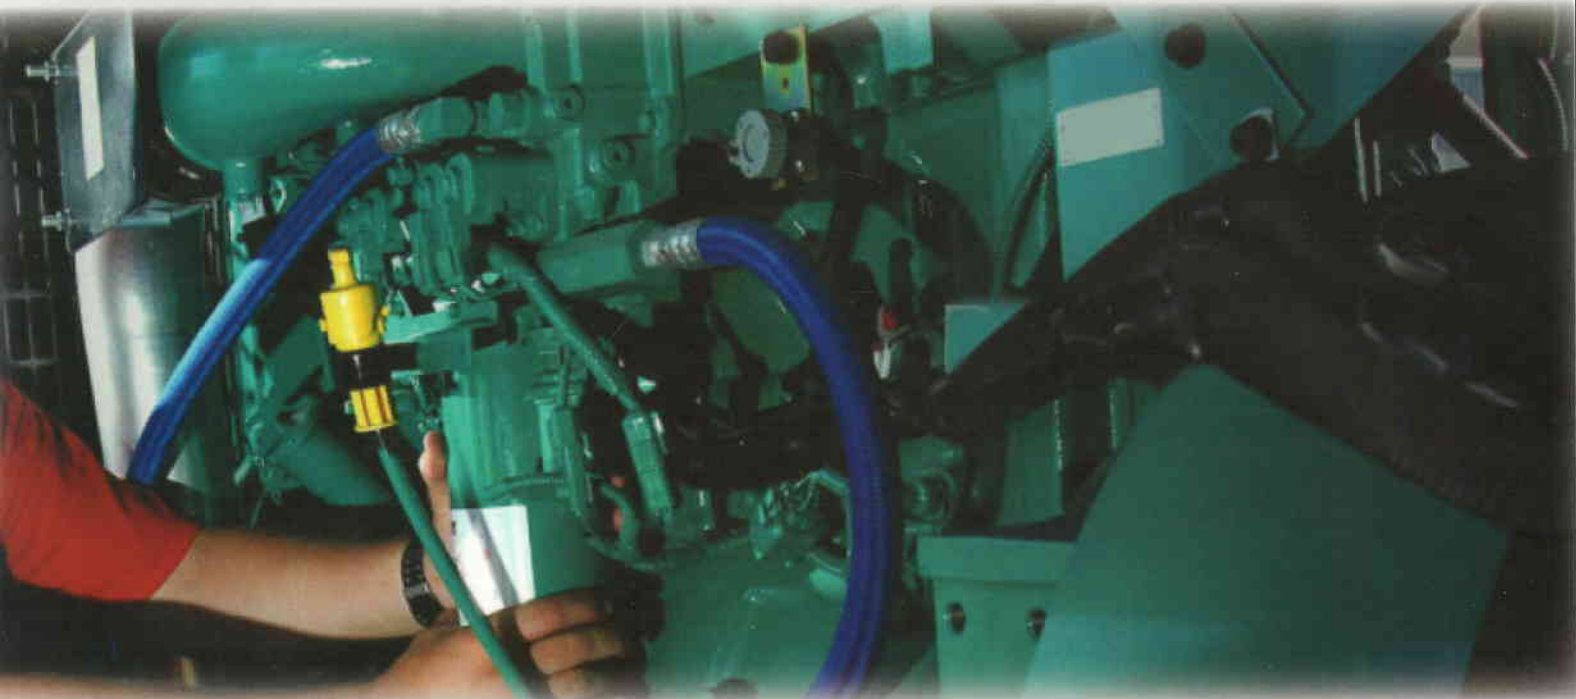

On completion of an "Agreement Acceptance Form" and confirmation of maintenance schedule, our service teams, will visit your premises to carry out testing & maintenance tasks that ensure efficient generator performance.

THE POWER OF **PI**

After Sales Department

Wide range of services as offered by our after sales department for industrial generators Servicing of associated equipments, as manufactured by a wide range of OEM's includes the following:

- Routine Servicing, Maintenance, and Repairs
- Annual Maintenance contracts (AMC)
- Extended Warranty Contracts (ESC)
- Load bank Testing.
- Generator set Commissioning & Site acceptance testing
- 24/7 Breakdown Support, Technician Call Out, and Technical Helpdesk
- Electromechanical installation for all type of Generator set
- Mechanical Diesel Engine Repair & Electric Alternator Rewinds

Extended warranty Contracts:

We at Precision Industries offer an extended warranty plan, which covers the cost of replacing defective components, labor and the travel charges, which far exceeds beyond the standard warranty period.

Extended warranty contracts minimize, downtime caused by breakdowns and stoppages thus avoiding expensive repairs

Commissioning & Site Acceptance Testing:

After The generator set and its associated ATS panel is installed at site .our service teams will test & commission the generator, with on site load. A power failure is simulated to ensure that the generator engages & delivers the required power

we offer load bank testing of our generators at site & or at our premises

In general our testing procedures are designed to include the performance of generator sets exhaust silencers, lube oil make up systems etc

Secure Your power whenever & Wherever You Want it
