Project Cargo Solution

Three Lines Shipping can manage project logistics for all types of cargo from all around the world, land, sea or air. We specialize in major Oil & Gas industrial projects, we can organize the transport, delivery of heavy and oversized items to & from remote locations around the globe.

Through our worldwide group of agents, we have the management capability to take care of every aspect of the project freight movement, from initial planning and preparation to final delivery.

We will organize all the necessary equipment, resources, documentation and labor required to successfully and efficiently complete the project.

Through our expertise and alliances with shipping agents, owners, operators and aircraft personnel, we are able to offer our clients competitive prices for any sort of freight handling requirement.

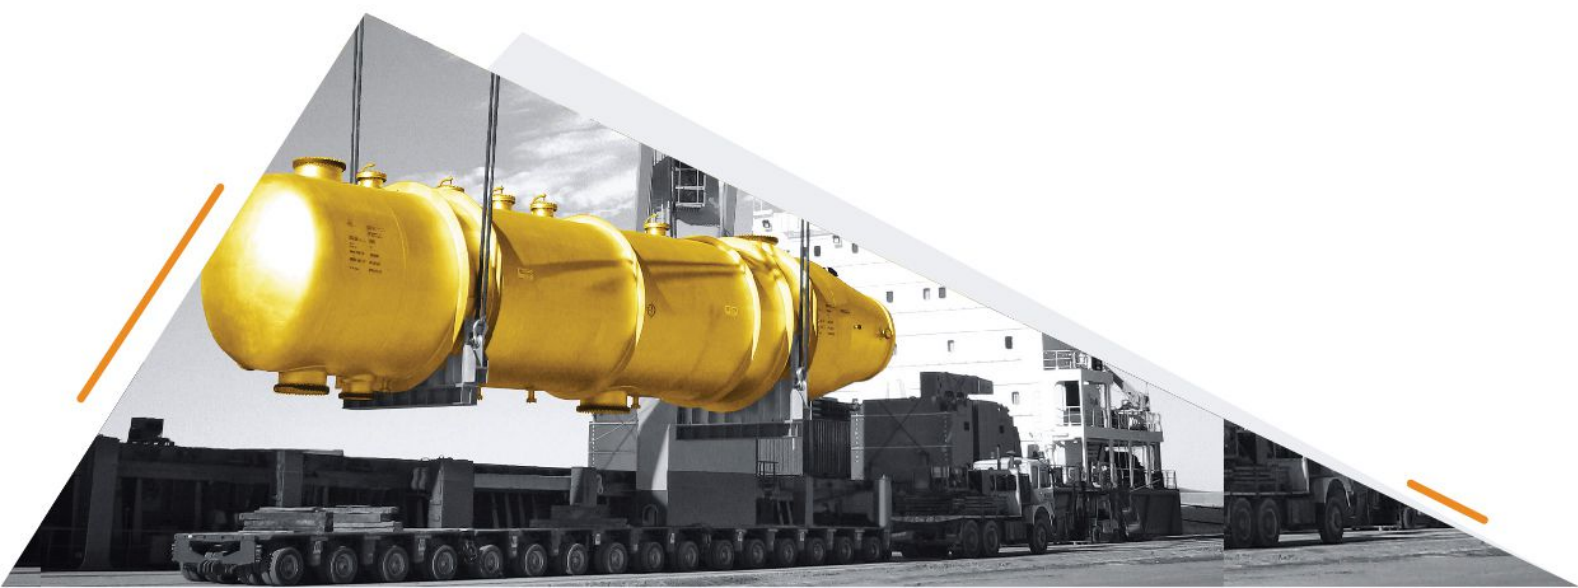

We are fully conversant in all national and international customers, quarantine and statutory regulations.

We can guarantee that every cargo and documentation requirements will be met throughout the entire pick up, transport and delivery process.

With up-to-date knowledge of current national and international regulations and tariffs, we are able to provide our clients with accurate costs of all applicable duties and taxes at the outset.

Our inhouse engineering Team of Jacking & Skidding have the knowledge and expertise required for machinery extraction and the relocation of industrial cargoes in confined and restricted environments.

Air Freight

Providing general and express air freight services throughout the Middle East. Three lines Shipping offers tailored services to meet specific needs of our clients. We specialize in express collection from overseas suppliers, direct airfreight and delivery to remote inland destinations. With the access and support of our strategically nominated global freight agents, who work in tandem with TLS and operate with the same principles, all of our clients are able to upgrade their consignments at any time during transit, should their delivery requirements change.

From our extensive experience in importing goods in Middle East, we provide a superior service by working closely with procurement and logistics professionals around the world. Through regular liaison with suppliers and manufactures, we will guarantee that correct procedures are followed and appropriate document-tation is always supplied, ensuring that your order is presented intact and delivered on time.

Sea Freight

Providing Full Container Load (FCL) service, Less Than Container Load (LCL) services and Break Bulk services (including static and mobile freight) to and from most global destinations. We can collect equipment directly from suppliers and oversee the packing, load-ing and securing of equipment to ensure safe transportation and delivery.

We provide total peace of mind to our esteemed customers by offering the option of receiving detailed lashing reports and plans from licensed surveyors and provide all insurance requirements.

Through our regular use of major shipping lines and consolidated services, we are able to offer ultra competitive prices from and to any port worldwide.

Road Freight

We at TLS, offer the best possible solutions for land transportation. We can handle heavy, over-sized, or otherwise unconventional project cargo with the most reliable and economical manner possible. We offer Land Transportation in all major G.C.C. & Middle East countries With special expertise in Oman, Kuwait, Qatar, Saudi Arabia & Iraq. Our expertise in Land transportation has gained prominence over the years and is now one of the most popular modes of transport for local and in-transit cargoes.

Containers Services

With our own fleet of flat bed and Low bed trailers, we provide intermodal container land transportation services to our clients. The trailers are maintained to top condition with wide variety of chassis for container haulage. The specification varies as per requirements. We also deliver Standard/Non Standard containers either from ports to client's premises or vice versa.

Over Dimensional Cargo (ODC)

At Three Lines Shipping, ODC as its core specialty service ranks among a very few of such specialized service providers. We play a key role in the transport of ODC by road all over UAE and GCC countries. We have our own vehicles and faculty for deployment and transport and handling of Over dimension-al cargo with our expert team dedicated for risk analysis for seamless movement of your commodity. Over-dimensional shipments require the acquisition of special permits issued by the various governmental agencies, states, and other municipalities through which your shipment will move.

We guide and acquire those permissions as value-add-ed services. It's a TLS way to ensure that cargo is lashed and choked onto trailers with respect to load calculations. It's our principle to handle with complete and careful coor-dination keeping in mind project schedules as well as all aspects and possibilities available.

Jacking & Skidding

Our qualified engineers utilize various methods that enhance in fewer manpower hours and safety to the commodity. Various types of equipment are used ranging from cranes and gantries. We have enough sources to provide certified equipment like Boom cranes, Tower cranes Conventional & Hydraulic Gantry systems, Hydraulic Jacks(Climb-ing, Straight, Strand), Winches, Skidding & rolling Systems. The tonnage varies from 10-500 applicable to individual units mentioned earlier.

Cargo Consolidation/ Less Than Truck Loads

For shipments that will not fill an entire truck, less than truckload (LTL) offers unparalleled convenience and cost savings for domestic and overseas shipping. TLS has its own fleet of trailers moving to different GCC countries with the best possible rates and developed tools to allow shippers to easily manage the shipping process. Standard LTL trucking is the most cost-effective over-the-road service. Expedited, LTL is available for shipments on a deadline or scheduled basis.

TLS Supports Shipment With Extra Care Including

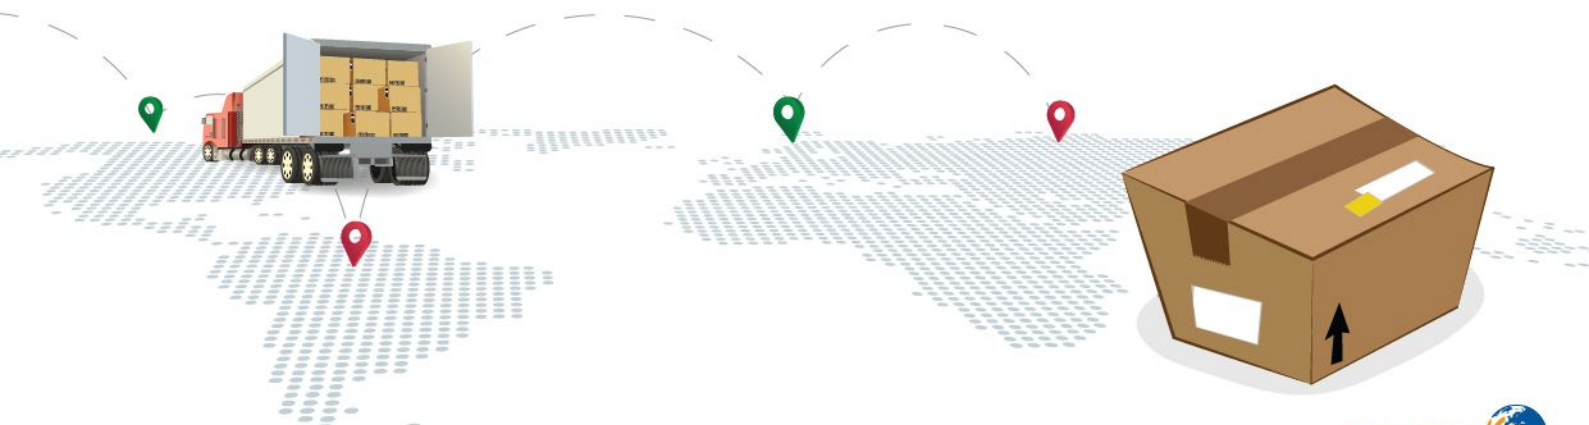

Security Planning

TLS security planning includes procedures for each shipment covering:

- Shipment Disruptions.
- Shipping Delays
- Unforeseen Events

Secure Shipping

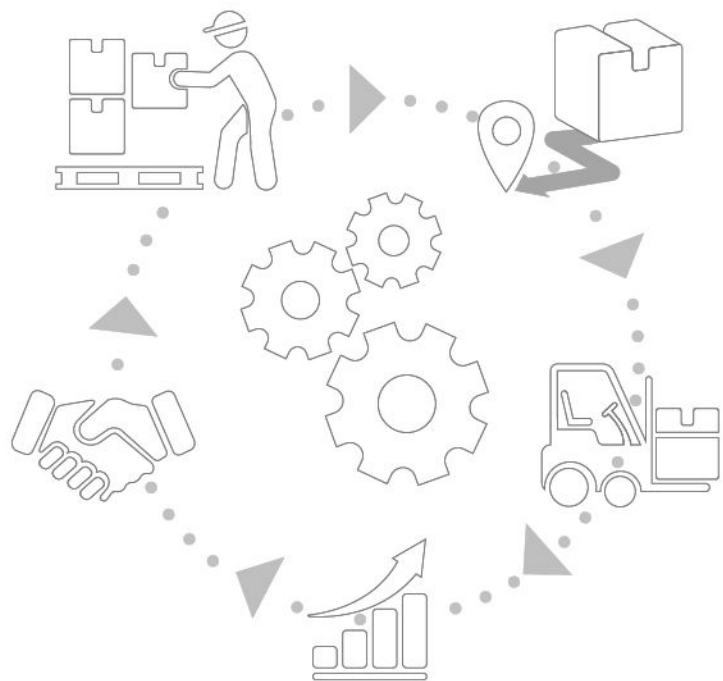

- Satellite (GPS) tracking of trucks Upon request
- Direct communication with drivers.
- Security bolt seals
- Road Safety compliant.

Value Added Services Include

1. Palletization:

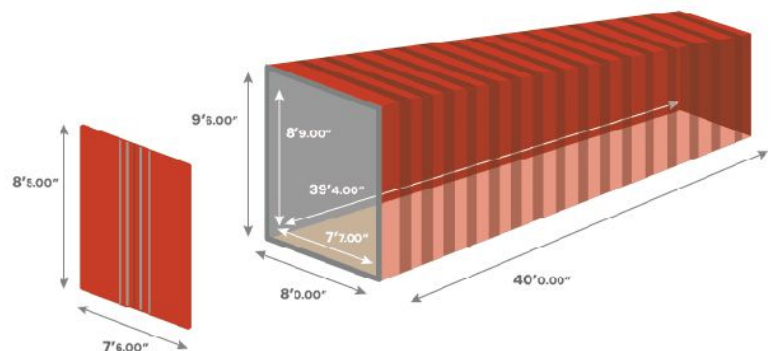

Three Lines has designed and developed customized packaging solutions specifically for the requirements of various industries to prevent from transit damages like breakages, scratches, dents, abrasions and corrosion. The divisions have vast product range that includes thermoplastic PE foam sheets and profiles, cross-linked and blended PE foams (block & extruded), as well as air bubble films and composites thereof. We at TLS also offer customized products like corrosion resistant, anti-static, UV resistant and metal laminated foam & bubble films, besides EPDM and other speciality rubber foams. We design and build crates specifically for your commodities.

2. Fumigation:

Empty Container Fumigation, Anti Fungal Treatment for pallets used in export packing, heat treatment for packing wood cases, vessel fumigation and aluminum phosphate fumigation. In addition to these, TLS offers tobacco fumigation, anti fungal treatment for wood packing material, heat treated wooden crates and fumigation of food processing machinery etc. We can provide 3rd party fumigation certificates.

3. Lashing:

Lashing is highly recommended in order to ensure a commodity is not damaged during transportation. Our own division of Industrial lashing is carried out by professional surveyors and riggers. We use first quality lashing belts & accessories with certificates.

Health, Safety and Environment Policy

THREE LINES SHIPPING is committed to protecting its personnel and other resources from accidents or loss, thus promoting greater business efficiently while maintaining the environment-friendly approach. This will be achieved through:

- Suitable assessment of risks to which employees and third parties may be exposed and acting upon the root causes.
- Promoting Safety, Health & Environment Protection awareness amongst the company's personnel through continuous familiarization and training.
- Suitable assessment of accidents and near misses in order to adopt the most effective corrective and preventive actions.
- Continuous improvement of the company's Safe Working & Environment Protection practices through regular reviews and audits.

Health, Safety & Environment protection is an integral part of every function of our company. Our management team will systematically Organize, Plan, Implement, Measure and Review the level of the company's compliance with statutory and industry-relevant standards. The level of compliance will be audited and the results openly communicated. The success gained through the application of this policy statement is depending upon the development of an open culture where cooperation and communication are actively pursued and endorsed by all staff. All employees are therefore encouraged to promote Health, Safety & Environment Protection within the company and to make a personal commitment to carrying out their activities within the spirit of this policy.
