Quality, Technology & Service

BUILD MAC LLC.

Build Mac LLC is the One of the Leading and reputed trading firms in the U.A.E., Engaged in the procurement and supply of plumbing, irrigation and sanitary accessories to the U.A.E market and G.C.C Countries.

Since 1999, we had served a vast number of MEP contractors for their medium and large scale construction projects in the U.A.E., Oman & Qatar, Most of the project consultants have also certified and approved our range of products for application at their concerned projects.

We source out and procure these products from reliable and quality manufactures in Germany, Italy, Switzerland, Netherland , USA and the Indian- Sub- Continent. We are holding stockist agreement premium german and italian Manufactures

We had also been exporting these products to the Europe & GCC countries. We never compromise on quality, performance and endurance of the items being marketed by us at all times. Our commitment to the above qualities and prompt services have helped us to grow along with the vast changing scenario of the Middle East & Asian region.

PRODUCT DETAILS

- **PP Sound Proof – Pipe System**
Skolan 20 dB- Ostendorf, Germany
HT PP 26 dB- Ostendorf, Germany
- **KG PVC – Ostendorf, Germany**
PVC Drainage Pipes and Fittings
- **U- PVC Pressure Pipes and Fittings**
- **U- PVC Soil Pipes and Fittings**
- **U- PVC Duct Pipes and Fittings**
- **PPR Pipes and Fittings**
- **Polyethylene Pipes and Fittings(HDPE)**
- **GI Hanging Clamps & Nail Clamps**
- **Equipment Installation(Sales & Service)**
- **Pex Pipes, Fittings and conduits**
- **U-PVC Fabrication**
- **Valves etc..**

HT-PP, DN 32–DN 160

The modified house discharge system made of Polypropylene. It unites all the requirements of a modern house discharge system from sound insulation and fire protection to easy centimeter marking installation. Of course, all the established properties such as low inflammability, chemical resistance and hot water resistance have been taken on.

HT Sound Proof Pipe System 26db Level II

HT- System (PP)
Discharge Pipes and Fittings

Ostendorf
Kunststoffe
Made in Germany

Skolan dB, DN 50–DN 200

Skolan dB is a top quality pipe system made of mineral reinforced Polypropylene. Skolan dB soundproof pipe system provides excellent sound insulation properties, thus creating ideal pre-requisites for forward looking use in area building constructions (houses, flats, industrial buildings and hospitals as well as hotels).

20dB Level III

Skolan^{dB}
Soundproof Pipe System
(Polypropylene)

KG-System (PVC-U)

KG PVC, DN 110–DN 500

The PVC pipe allows to have a highly solid structure for this underground waste water system. The unique coextrusion technology is the basis of the system that offers a wide range of fittings. According to - BSEN -1401 - Standard With Kitemark Certification

UPVC Pipes & Fittings- Soil and Waste System

The Soil and Ventilation systems are manufactured in 32 to 400mm sizes in light grey UPVC. They include Traps, Push-fit Waste, Solvent weld waste system, Push-fit Overflow system, Soil and Vent Systems, Floor Gully Range, Solvent Weld Overflow systems.

All of the company's ranges are supported by comprehensive sales, technical and distribution services. A significant feature of the System is the patented Push-fit jointing method. The solvent jointing methods makes these systems particularly suited to prefabrication also available in major Brands

PPR Pipes& Fittings

We have now developed a complete range of Polypropylene Random (PP-R) pipes and fittings for cold and hot water distribution systems via Megatheram Brand.

These pipes and fittings are suitable for potable water distribution systems in addition to a wide range of hydro-sanitary applications.

The exceptional heat stability of the polypropylene Random copolymer and its extraction resistance coupled with ease of installation make the PP-R system a reliable piping system for hot and cold water applications.

Polyethylene (PEX-X) Pipes

PE-X Pipes allow the distribution of pressurized hot and cold water both sanitary and heating systems. The techniques of water distribution using PE-X Pipes present many of advantages in comparison to the traditional distribution systems using iron or copper pipes.

PE-X Pipes is manufactured from high density Polyethylene, which is a thermo plastic material formed by numerous long chains. This high quality material is thus limited by relatively low working temperature. We are trading some premium branded PEX system.

HDPE Pipes& Fittings

HDPE pipes and fittings are available in sizes from diameter 32 mm to 315 mm. Bigger sizes can also be fabricated on request. Encompassing diverse fields such as irrigation to fire-fighting and district cooling to domestic water supply, complete systems and individual components can be sourced from one professional outlet. PE Pipes are available in ranges from 20 mm to 800 mm. Black and blue colours are available for water applications whilst yellow is commonly used for gas. PE system consists of large variety of fittings of Butt fusion, electrofusion compression and push-fit types. We are holding distributing agency with Elofit-Italy Brand.

EloFIT

Site Joining and Installation - Pipe system

Buildmac technical team providing onsite technical support for pipe installation via Electrofusion and Butt fusion machines. Our trained technician can undertake site joining for HDPE, PE, PPR and PB pipe system. Our welding machines are available for rental and sales.

HÜRNER
SCHWEISSTECHNIK

Pressure Pipe&FittingSystem - PVC

UPVC pipes and fittings satisfy the increasing demand for metric and imperial sizes . PVC pipes and fittings for plumbing and infrastructure applications, pertaining to cold water distribution, underground drainage, Air conditioning (A/c) drain and ducting applications .

Pipe support- clamps

Build Mac pipe support clamps are available with Rubber, without Rubber and Nail Clamps. Sizes are 20 mm to 200 mm. Clamps are made from high grade cold rolled carbon alloy steel as per international std. Product specs are the EPDM rubber lining, Electro Galvanised Zinc Chrome etc. Buildmac associated with one of leading manufacturing company in Delhi, India for pipe support clamps . We used to export Nail Clamp and Rubber Clamps to Germany, Netherland and Italy . We are certified to use the same to our sound proof pipe system as well.

Build Mac-just more than trading, i.e. selling solutions is more than supplying materials in the Build Mac-just more than trading,i.e.selling solutions is more than supplying materials in the required quality.To guarantee safe installations, to understand the correct applications and identifying the strength as well as the weak points of various plastic pipe systems we are offering a wide range of training and seminars.

Our experts are holding detailed training about product handling, storage and installations.An overview about the right applications is part of our training sessions.

What is quality ? What are the differences between certificates? What is the correct material to apply ?

If you are interested in questions like that,you should ask Build Mac for a technical support.

Technical seminars will be held by qualified German technicians (Ostendorf ,Kunststoffe) certified welders and experienced persons to reduce your doubts.

Do you have any questions regarding the installation of one of our systems ? Questions Like:What should be the advantages between PVC,PE or PP installations ? Do we need to insulate the pipe system to reduce noise level? Or our PP Products can support?

It will be our pleasure to support you in answering technical or material questions.For issues on site our staff will be happy to develop solutions together with our partners for better understanding and safe installations.Additionally Build Mac can give assistance on site, in case of issues like joining, welding , and fixing ,non-standard fittings incorrect installations or other tasks. Any testing and certificates.

PVC Fabrication

Build mac holding is one of the leading fabrication design & Manufacturing for special plastic fittings facility . Build mac engineered fittings have been installed in sewerage, water supply,soil & waste contractors in UAE.

Our Major products are : Grease traps,land drain slotted pipes,long radius bends for street lighting bends,road gullies & catch basins.

Our skilled workforce produced high quality products engineered in PVC ,GRP and PB
