DEALERS

OUR SERVICES

TIRE CHANGING

Al Qouz Star Tyres installs your brand new tires for you. We strive to treat all with the best service, using machinery suited to all makes and models.

WHEEL BALANCING

Correctly balanced wheels help to eliminate vibration and avoid premature wear caused by an imbalance in the rotating wheel and tyre assembly.

If you leave your vehicle's wheels balanced inappropriately it will lead to a comfortless drive and negative effect for your vehicle's performance

WHEEL ALIGNMENT

Poor alignment can shorten a tire's life by thousands of miles and compromise very crucial steering and suspension parts

Proper wheel Alignment will help your tires last longer, your vehicle drive smoother, ultimately keeping your wheels pointed in the right direction

NITROGEN FILLING

Compare to Oxygen; Nitrogen is less likely to migrate through tire rubber, which means that your tire pressures will remain even more stable and constant; you may reduce the tire-maintenance costs.

SOLID TIRE TRADING AND FIXING

We deal with many brands of solid tires which is available in the market for all different kind of forklifts.

TYRE MAINTENANCE AND CHECKUP

It could be a real pain when you get a puncture in a perfectly good tire on your travel, so do not throw it away; our experts will assess your tire and have it on the way to being like brand new one.
