OUR SERVICES

NETWORK SYSTEM

For the best IT solutions in the UAE, get in touch with Interlink Technology. We are a reputed name in the market and serve clients by providing I.T related solutions. Aided by a team of professional employees, we specialize in the area of networking and assist clients in boosting their business by installing WAN, LAN, PAN, CAN, and DAN.

WIRELESS SYSTEM

Interlink Technology is at the leading edge of Converged Wireless Networks — an emerging technology that offers a broadband solution that truly converges voice, data and Internet of Things (IoT).

STRUCTURE CABLEING

Interlink Technology is engaged in providing structured cabling solutions to clients. We have brought together teams of award-winning professionals that understand the concept of structured cabling for building the network solution. Our engineers use standard methods for ensuring the acceptable system performance from complex arrangements.

IT INFRASTRUCTURE

FIBER OPTIC SOLUTION

For the trusted fiber optic solution services in UAE, feel free to approach Interlink Technology. We are a reputed organization in the I.T firm and provide fiber optic solutions to clients. It is a system that comprises fiber optic cable that carries signals from end to another swiftly. Indeed, it is way faster than the usual copper cable as copper makes the wire heavy to transfer signal instantly.

CCTV SYSTEM

Interlink Technology is one the MCC approved company in Abu Dhabi, UAE. Interlink Technology is agile and prompt in providing different types of CCTV security and camera systems to its clients at affordable prices. Engineered with precision, our CCTV Surveillance Systems are the perfect choices for assuring the 24x7 security of the building premises. The residential, commercial, and industrial sectors are making the best use of our CCTV security services.

TIME ATTENDANCE SYSTEM

At Interlink Technology, you can buy different time attendance machines. Apart from the impression scanner machine, we also provide the code-reader machines. Such machines record the time attendance by reading a unique code etched on the identity card carried by an employee.

SECURITY SYSTEMS

INTRUDER ALARM SYSTEM

The security alarms are a modern-day requirement for security purposes. Interlink Technology provides the best security solutions to its clients. At us, you can purchase the right intruder alarm system from a gamut of different security alarms available at us. Right from the basic noisemaker to the advanced monitoring console, clients approach us for buying different intruder alarm systems.

ACCESS CONTROL SYSTEM

Access Control Systems are devices that are used for controlling access to a limited number of people. Interlink Technology is the one-stop destination that is the leading supplier of access control systems. We have stocked different access control systems that are widely purchased across the globe.

AUTOMATION SYSTEM

For the best and smart home automation system, contact Interlink Technology. Our team of learned professional engineers specializes in designing and implementing different types of the automation system. Based on the latest concept, our automation systems reduce manual labor.

TELEPHONIC SYSTEM

Interlink Technology is a connoisseur in the telecommunication realm of UAE and specializes in providing a telephonic system to clients. We are aided by a staff of diligent professionals that work collectively for the client and bring the finest quality telephonic systems based on the latest technology. Interlink Technology holds expertise in providing telephonic systems manufactured by Avaya, NEC and Panasonic.

PUBLIC ADDRESS SYSTEM

Interlink Technology is an expert in providing systems for addressing the public. The robust structure combined with the modern-day technology makes our public address system a major choice in the global market. The amplifiers, speakers, and microphones are designed by professional engineers that incorporate the wiring for enhancing the human voice.

AUDIO VISUAL SYSTEMS

VIDEO INTERCOM SYSTEM

Our IP Video clip Intercom System combines style with function using true IP modern technology. The trendy intercom terminals, with high resolution images, allow for contacting us to entryway as well as display stations within our integrated IP communication system. This permits swift system growth, with the adaptability to satisfy every customer, whenever.
