***Ideal Storage Solutions***

***Less Space! More Storage!!!***

For the maximum utilization of space we offer a wide range of pallet storage racks. These are manufactured using superior quality raw material (high tensile strength steel) and can easily store heavy and bulky items. Durable and precision engineered, our range can store commodities of different sizes.

#### Features:

- Efficient storage capacity and durability
- Direct access to every pallet
- Each Pallet can be removed without moving or displacing others
- Makes stock control easy, since each pallet has its own location
- Can be adapted to any size or weight of pallet

Heavy Duty Storage Racks are extensively used in various industries like automotive companies, warehousing, supermarkets, logistics companies and many more. We also provide the customization facility in our product range according to the requirement of the customers. Main benefits of this product are easy accessibility and non-uniform loading ability.

## Features:

- This product range is available in various sizes and weight capacity
- Easily configured to meet your load volume
- Adjustable beam level for various pallet heights
- Hardly require any truck training

Drive-in Pallet Racking is used for maximum space utilization. It is a first in last out (FILO) system and is best used with a large quantity of few products that are not time critical, to best utilize space. Access aisles are kept to a minimum with drive-in rack achieving virtually double or more storage capacity. Drive in pallet rack systems can be designed to store 2 to 10 pallets deep.

## Features:

- Very dense storage, ideal for few Stock Keeping Units (SKU) with high pallet quantities
- Prevents product crushing and offers damage free storage
- Floor single or double stacked pallets - always accessible
- Low capital costs using conventional handling equipment

We offer Long Span Shelving which is a modular frame and beam shelving system that caters easily for large bulky items. Long Span Shelving is constructively similar to light pallet racking but designed to store non-palletized goods.

#### Available Standard Sizes:

Span: 1200/1500/1800/2100/2440mm

Depth: 600/900mm

Height: 2400 to 3000mm

Sizes can be customized as per the specific requirements of the customers.

#### Features:

- Easily configured to meet your load volume, weight and handling requirements
- Adjustable beam levels for varying heights

# Slotted Angle Shelving System

Bolted slotted angle shelving is a versatile system best suited for storage of small components like bins, cartons, office files etc., having light load.

## Available Standard Sizes:

Span: 900mm | Depth: 300/380/450/600mm

Height: 2400 to 5000mm

Size can be customized as per the specific requirements of the customers.

## Features:

- Each loading level (shelf) can be adjusted for varying heights
- The system can be covered from side and back with steel claddings or wire meshes to prevent spillage of material
- Each loading level can be divided into compartments depending on customer's need
- Light duty system can be offered for varying heights as single tier, two tiers or three tiers
- Walkways can be provided depending on the load requirements offered with steel panels, perforated panels or gratings

Mobile Shelving Systems are a cost effective way of increasing storage capacity and utilising valuable floor space. The system with roller racking shelves can double storage capacity compared to conventional static shelving.

## Features:

- All mobile bases, uprights, shelves and deco panels are pre-galvanized and polyester powder coated making them rust and corrosion proof
- Decorative front panels made of box sections with with push knob foldable handle that prevents unintended movement of the system – with index module for the name tag

The rack supported platform can increase the storage capacity of any place to a great extent. It creates extra floor space using heavy duty frames and beams decked with open steel floor planks to create a second storey.

## Features:

- A strong stable new floor to hold additional storage.
- Can be designed to offer the greatest clear space on the ground for additional activities/storage.
- Additional storage levels can be provided below the platform for more volume of storage
- Gives additional space without adding ratable value to your property
- Can be easily enlarged, modified or moved.

Structural Mezzanine Floor is a strong and stable structure that creates additional useful space in warehouse, factories, commercial building etc; without the need to construct a new building or alter the existing installation.

This Mezzanine Floor is built of formed steel section that are normally used in building structures, so is very strong and durable. In addition to standard configurations, it can be designed for a wide range of loads & spans as required by the customer.

#### Features:

- Load: 250kg to 850kg/m<sup>2</sup>
- Spans: 3 to 6 mtr.

Cantilever racks are designed for the safe and organized storage of long and heavy load ideal for timber or metal storage. Our cantilever rack systems are an effective and efficient alternative to conventional lighter weight storage solutions.

## Features:

- Racks designed specifically to suit your needs
- Rack heights of upto 4m are available
- Loads of upto 1.5 tonnes per arm can be carried
- Cantilever racks can be painted in a variety of colors and can be galvanized for external applications
- Sizes can be customized as per the specific requirements of the customers

Superior quality and highly functional stainless steel sinks, worktops, cabinets, shelving and sanitaryware to meet your specific needs and requirements.

Our stainless steel shelving cabinets are strong, durable and carefully designed. Stainless steel cabinets are available in a variety of styles and sizes.

We have a comprehensive range of stainless steel worktops that are ideal for kitchens and work areas in all situations. Stainless steel catering equipment is strong and durable, ideal for heavy use.

They work particularly well in commercial kitchens where cost effective kitchen equipments are needed. Stainless steel sinks do not rust or corrode and are durable enough to take the strains of commercial use.
