BIOLOGICAL TREATMENT

## LIFT STATION CLEANING

### LIFT STATION CLEANING

Let MAZMO assist you in effective and complete draining of the sum pit/ lift station and removal of sludge accumulated in the tank. MAZMO will also efficiently wash the walls and motor to remove stains and ensure trouble free waste water movement four months ahead.

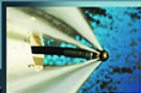

## LIFT STATION CLEANING

## DRAIN LINE JETTING

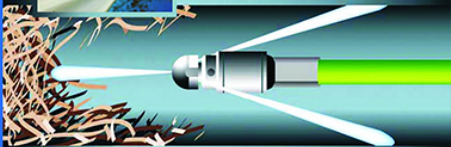

### DRAIN LINE JETTING

MAZMO uses high pressure water jetting to ensure that a non functional drain functions like its new without having to replace it. This specialist treatment removes the clog and blockage that occur in the drain line thereby allowing for easy flow of waste water through the drainage. Fast and cost- effective, just the way you want it.

### DRAIN LINE JETTING

## ROOT CUTTING

*In* pursuit of water, the roots of garden trees break into drainage pipes and grow inside to block the flow of drainage water.

We use high pressure Water/Electrical powered cutting equipment for retrieving tree roots and other fibrous plant material which penetrates into drain line causing blockage.

## ROBOTIC CAMERA INSPECTION

*Since* light rays moves straight line only , to see what is beyond the bend camera inspection is the best solution.

Robotic Camera inspection of drain line or entry restricted areas, to display the finding in monitor or record in DVD/ Memory card.

Know one can decide the course of action to rectify faulty drain lines without breaking it .

## PEST CONTROL
