

SAFEMAX

SECURITY AND SAFETY SYSTEMS

SIRA CERTIFIED

INTRODUCTION

SAFEMAX GROUP formed in 2007 and has quickly grown to become an independently recognized and highly regarded fire protection company. Our core business is Security and Safety Systems Engineering.

We work in conjunction with Interior Contractors, Building Contractors, Building Managers, Project Managers, Architects, and Home Owners to ensure the planned and systematic installation, inspection, testing, Commissioning and rectification of Fire, Security and Life Safety Essential Services. The installation and maintenance of these systems is critical to the protection of life, assets, productivity and reputation.

SAFEMAX enables clients to have service around the clock throughout the year. The company provides businesses with a complete professional Fire protection service with a team of highly experienced & qualified Engineers, Technicians and Technical team trained to handle all types of fire protection and security systems. This also enables us to design our systems, operations and communications to better assist our clients to meet their expectations in a time and cost-efficient manner.
