2024 EDITION

ABOUT US

The Shading Company has more than 2 decades of experience in operation in the UAE. Formerly Falaknaz – the Warehouse LLC, we began focusing solely on shading solutions in 2019. The Shading Company provides a unique range of shading solutions for customers in the UAE and Gulf region. The Shading Company is headed by technical and operations expert, Stephen Foot, who brings almost a decade of Gulf Shading experience to this role. Thomas Joy heads the Finance and Administration Department and has over 15 years experience in the field.

The shading company is located in Al Quoz, Dubai. Our premises contain a production and assembly unit as well as a display space to allow customers to view the range of models and designs we have on offer. We have an extensive range of brands we supply including Glatz Umbrellas, Awnings by Llaza, Shade Sails by Soliday, Pergolas by Llaza. We can also supply a range of fabrics to allow our customers to have a unique shading solutions.

TWIST UMBRELLA

Centre Pole Umbrella

Nominal size cm

Ø 300

The flat parasol roof, handy crank and ergonomic swivel mechanism reflect our ambition to create sustainable inventions. Twist is easy and convenient to open at hip height with just a few rotations of the crank, offers stepless tilt adjustment thanks to the rotary handle, and can be rotated 360° using the practical clamping lever.

The epitome of simple yet elegant parasol design. Together with the flat parasol roof, the white and anthracite powder-coated aluminium frame and ribs create a modern, floating look. The high-quality canopy is self-tensioning, thanks to the flexible ends. The mast features an internal steel pipe for which a lower pole is available, so that the parasol height can be adjusted to ensure the right amount of shade at all times. Typical Swiss precision.

RUSTICO

Nominal size cm

Ø 220

The Rustico is an Elegant and stylish Centre pole umbrella that can be tilted via a hinge half way down its pole. It allows a wide arc of shading to be achieved. It is easy to open and close and can be easily stored away. Installed with a 40KG base.

It can be optimally adjusted to the current position of the sun at any time. The canopy fabric provides 98% UV protection

FORTINO® RIVIERA

The little wind resistant sunshade

Nominal size cm

Nominal size cm

Ø 300	200 × 200
	240 × 240

The new FORTINO® Riviera is a Strong and capable centre pole umbrella ideal for shading terraces or sitting beside loungers at the pool. Where the FORTINO® beats other umbrellas is that it has a system allowing it to close upwards thereby allowing it to clear obstacles underneath it such as tables and chairs. The double rib support means it is able to withstand strong winds. A tensioning lever to open and close means it's simple and easy to use. The pole is in two parts allowing easy storage and transportation.

MORE DETAILS & VIDEO

PIAZZINO
The low priced classic

Glatz

Nominal size cm	Nominal size cm
Ø 300	300 × 300
Ø 350	

This functional sunshade dispenses with high technology and is easy on the wallet: the PIAZZINO!

The natural - colored maple wood gives the charming sunshade roof a romantic touch and provides guests with lots of space to relax in cozy shade.

The tough and long - lasting maple wood used for the wood construction guarantees that this sunshade will work flawlessly for years. The PIAZZINO is at the top of its game in the league of timeless format and style at an affordable price.

FORTELO®
The perfect balance

Glatz

FORTERO®
The big wind resistant sunshade

Nominal size cm	Nominal size cm	Nominal size cm
Ø 350	250 × 250	300 × 200
Ø 400	300 × 300	350 × 250
	350 × 350	

The FORTERO® giant sunshade is big enough to stand up for itself: wind resistant, resilient and easy to operate, this model is ideal for large spaces and windy places. It certainly lives up to its name: FORTERO® the strong one. Thanks to the counter rotating servo principle, the FORTERO® is easy to open and close.

Its simple design and size mean that the FORTERO® is ideally suited for large spaces or by the pool. Optional attachments include concrete or granite bases as well as bases with castors, support tubes and plates, mounting plates with support tubes and various wall clamps together with support tubes.

Thanks to its stable construction, FORTERO® can withstand coastal and mountain wind conditions.

AMBIENTE NOVA

Glatz

	
Nominal size cm	Nominal size cm
Ø 400	400 x 300
Ø 500	450 x 350
	350 x 350
	400 x 400

The successor to the legendary AMBIENTE, the AMBIENTE NOVA free-arm sunshade presents itself in a completely new design with a touch of exclusivity. A patented drive system makes crank operation child's play. While the sunshade cover automatically aligns itself horizontally when opening, it does not touch any tables or seating furniture underneath when closing. In the evening, a directly and indirectly individually controllable and dimmable warm white LED lighting system integrated in the struts brings light into the darkness. The rear-mounted LED strip in complete pole length provides an atmospheric accent.

CASTELLO® PRO
The ideal host

Glatz

		
Nominal size cm	Nominal size cm	Nominal size cm
Ø 350	300 × 300	400 × 300
Ø 400	350 × 350	450 × 350**
Ø 450	400 × 400	500 × 400**
Ø 500	400 × 400**	
Ø 500**	450 × 450**	
Ø 550**	500 × 500**	
Ø 600**		

Designed for large outdoor areas, the CASTELLO PRO doesn't just impress on the catering scene with its robust design and corrosion-resistant materials. The trend towards purism is also reflected in its design. Equipped with simple die-cast parts, the CASTELLO PRO captivates with its flat sunshade cover, which provides an even greater degree of wind stability than its predecessor. The cover can be opened and closed in no time at all using the tensioning lever. The electronics are also integrated discreetly in the frame and the struts. Material and technology:

The frame is made from seamless, anodised natural aluminium profiles, while the aluminium slide and crown are coated with Rilsan. The steel parts are corrosion resistant. The tensioning lever is made of glass fibre reinforced synthetic material, which can be secured with a padlock.

Operation:
The telescopic principle allows for the rapid opening and closing using the slide and tensioning lever.

PALAZZO® Noblesse
The star performer

Glatz

		
Nominal size cm	Nominal size cm	Nominal size cm
Ø 450	400 × 400	450 × 350
Ø 500	450 × 450	500 × 400
Ø 600	500 × 500	600 × 400
Ø 700	550 × 550	600 × 500
	600 × 600	

High performance and easy operation are what makes this large space sunshade impressive. Depending on the size of the sunshade, the PALAZZO® Noblesse can withstand wind speeds of up to 95 km/h, as proven by numerous wind tunnel tests. It opens and closes with just 12 manual turns of the crank or optionally via the integrated remote controlled motor. Thanks to its construction and high - quality materials made of dyed acrylic fibres, it is not only wind - resistant: it also offers optimum protection from the sun and rain and keeps its colour year after year. For corrosive environments at the sea or close to pools, a special stainless steel kit is available. The PALAZZO® Noblesse is available in 14 standard designs - with options including a crank, motor, heating and aillumination. Customised models can be produced in almost any shape and size.

PALAZZO® STYLE
For Large Outdoors

Glatz

		
Nominal size cm	Nominal size cm	
Ø 350	300 x 300	450 × 450
Ø 400	300 x 350	500 × 400
Ø 450	400 x 300	500 × 400
Ø 500	400 x 400	500 × 500
Ø 600	450 x 350	550 × 450

The PALAZZO® Style is suitable for large outdoor areas, protects you from sun and rain and can withstand winds of up to 115 km/h.

The younger of its two brothers carries the big family name with pride. And rightly so. It combines both comfort and strength at the same time - in the face of wind speeds of up to 115 km / h, it protects you from both the sun and the rain and wins you over with a multitude of additional functions. The PALAZZO® Style is available in 15 standard models as crank or motorised variants and can optionally be supplemented with heating and LED or conventional lighting. Robust and durable, the all - rounder can be opened or closed with a maximum of 9 turns of the crank by hand or remotely via the integrated motor. We are happy to fulfil your personal requirements in size and shape.

PALAZZO® ROYAL

Glatz

		
Nominal size cm	Nominal size cm	Nominal size cm
Ø 450	400 × 400	450 × 350
Ø 500	450 × 450	500 × 400
Ø 600	500 × 500	600 × 400
Ø 700	550 × 550	600 × 500
	600 × 600	

The PALAZZO® Royal is ideal for hotels and restaurants, and has a great range of wonderful details. It can be opened and closed with a maximum of 19 manual turns of the crank or remotely with the motor. This leaves the seating below undisturbed, as the shut height is higher than 70 cm. All control components and cables are integrated into the mast and frame and can be operated by remote control. The PALAZZO® Royal also shuts down automatically if the motor overheats, has an emergency function for rapid closing and is available in many XXL sizes.

Material and technology: The frame is made of stamped, natural anodized aluminium sections. With anti-twist pole (including reinforcing ribs).

Operation: The sunshade can be opened and closed using the hand crank or the motor with remote control.

The Arond 350 (formerly Complet Pro-350) support system combines all of the qualities most valued by professionals. Designed by and for professionals, Arond-350 incorporates the latest in practical and advanced features to make installation fast and safe. Its dual-adjustment system means you can make sure the arm is parallel by easily accessing the internal tightening stud under the cap. The unit's inclination can be set from 0-85° thanks to its reliable and accurate double-pivot system. Its 100% metal structure gives it uniform colour and an elegant look. This unique feature also makes it exceptionally sturdy, extending 6 meters width without the need for intermediate supports, with projection of up to 3.50 m.

- Up to 350cm projection
- Up to 600cm width
- Install on Ceilings, on walls and between walls.
- Manual or Motor
- Led Lighting in arms option
- Cost Effective shading solution

MORE DETAILS
& VIDEO

AROND-350 Stands out for:

- Elegant and functional design, easily adaptable to different façade styles.
- The covers are made of aluminium, lacquered in the same color as the support and do not deteriorate in the open.
- Protects large spaces reaching 6,00m. line x 3,50m. output with only two arms.
- The wide range of inclination it offers makes it ideal for sun protection on terraces.
- Functional design that provides solutions for front, ceiling and wall installations.
- Simplification of tools for assembly and adjustment.
- Cassette system with self-supporting winding group for a more comfortable and safe installation.
- Assembly and regulation in a few steps. Get significant time savings.
- Safe and reliable regulation of the alignment of the arms and the inclination of the assembly.

ART MONOBLOCK AWNING 400

The Monoblock awning is an adaptable awning ideal for a range of solutions from gardens and to restaurant terraces. The Awning can be installed with a pair of arms or extended up to 12meters in length. The projection ranges from 150cm up to 400cm. The Awning can be manually operated with a hand crank or motorised via Somfy. Additional smart accessories can be added such as mobile control, wind and shake Sensor.

KUADBOX 400

The aesthetic of the KUADBOX-400 cassette awning makes it perfect to integrate into the façades thanks to its stylized construction and straight lines design. It fits with the minimalist architecture styles offering, at the same time, advanced technical features to build up great dimensions incorporating more sets of arms. The arms in the Splendor range are designed to ensure that the fabric is kept properly taut at all times, thanks to the self-adapting transmission system. The operation of the joints is precise and efficient, as they have a duplex ball bearing system which is unique on the market. The concealment of all the transmission components in the joint, its metal design and the slimness of the profiles give the Splendor arm range a smart, compact, exclusive look. Up to 400cm projection.

Size: Up to 7m Wide
Projection: Up to 4m

MORE DETAILS
& VIDEO

DROP ARM AWNING PR7

This is a system with front-drop arms and a tensioning system that is an improvement over traditional drop arm systems, allowing it to stand up better to wind without losing its shape. The most interesting feature of this system is its arms, which provide both technical and aesthetic advantages such as preventing wear on the lacquer, extending the lifespan of the awning, etc. PRT-07 arms have an internal tension transmiss-ion system which uses the flat, flexible tape of the ART SYSTEM, which considerably extend the lifespan of the awning. The system is especially designed to reduce the tension as the fabric is rolled up to prevent sub-jecting the fabric or the brackets to unnecessary force when the awning is retracted.

Size: Up to 5m Wide
Projection: Up to 1.4m

MORE DETAILS
& VIDEO

SPLENBOX 400 CASSETTE AWNING

This cassette strikes the perfect balance between efficiency, robustness, lightness and elegance. It is designed entirely in metal, giving it an impeccable appearance of high aesthetic value and top quality.

Thanks to the relationship between the size of the unit and the possible projection, it is a highly versatile model which can provide sun protection for anything up to 6 metre wide and a projection of up to 4 meters.

Size: Up to 6m Wide
Projection: Up to 4m

ELITE PERGOLA

Retractable Shade System

The Elite Pergola is a retractable Shade System that can be installed on walls, installed with 4 posts or between spaces. It can be operated with a Motor or Manually with a rope and pulley. It Can be installed to a max size of 7x5 with 1 cord and to a maximum dimension of 10m x 7m with multiple cords and leg supports.

Meticulously designed for great aesthetics, all of the elements used to support the awning are hidden. Angle brackets in the corners make the structure very stable. Inclined hem system keeps water from accumulating in the pleats when it rains. A second piece of fabric can be installed above the awning in order to help keep the fabric in top condition while creating an insulating thermal barrier (with 4-slot hems). Latticework makes it easy to increase the size of a garden awning without having to add additional columns.

SOLIDAY CS SHADE SYSTEM

In contrast to traditional awnings, the SOLIDAY-CS provides an extraordinarily large area of shade combined with the convenience of fully automated remote control. SOLIDAY CS is rolled up by means of a horizontal, motorized shaft attached to the wall of the building. Using an innovative, patented system solution, at the touch of a button the sail is automatically extended as much as 7m. The sail can either be in triangular form with a single pylon, or square with two pylons – and stretched out horizontally or at an angle, as desired. This innovative sail concept for sun and rain protection opens up whole new design dimensions – an architectural highlight for those cool hours during summer.

MORE DETAILS

RETRACTABLE SHADE SAILS

Retractable Shade Sails are fully customised and made to measure from our workshop in Dubai. They are often called Roman Shades, Wave Shades or Velum Shades. The Shade is installed between two points with steel wire cables and pulleys and shade fabric run along the cables. A Rope and pulley set is used to manually open and close the system. The System is ideal for installations over large areas such as terraces, Swimming pools and gardens. We can offer Shades up to a maximum size of 650cm wide and 10m in Length. The fabric can be fully customised to customers needs.

OUTDOOR MOTORISED BLINDS

Outdoor blinds are ideally motorised for ease of use. They can be integrated with existing system so that they can be scheduled for opening and closing at specific times of the day. Crucially in the hot gulf climate they reduce heat entering the home reducing cooling costs. The two models we offer and with an external wire guide or integrated zip system. Maximum width is 500cm and maximum height up to 300cm. The frames can be powder coated to customers preferred colour and a range of fabric options are available. Available in motor or manual options.

FABRICS

Outdoor Fabrics are supplied for all our canopies including Umbrellas, Awnings and Shade Sails and pergolas. We primarily offer acrylic Solution Dyed Fabric due to its excellent lifespan and resistance to rot, fading and deterioration. Solution dyed ensures that the outdoor fabric lasts a long time and does not degrade and fade in the Sunshine of the Middle East. Furthermore, we can offer fabrics from Sauleda, Recasens, Sunbrella, Dickson and many more worldwide brands. Outdoor fabrics offer water resistance and also waterproof capabilities. Additionally FR outdoor Fabrics can also be supplied for projects.

Sauleda Outdoor Fabrics

Sauleda from Spain Supply high quality acrylic solution dyed fabric for Awnings, umbrellas and other shades. 300GSM with a 10 year Warranty against Specified defects. The fabric also offers water repellency features.

Recasens Outdoor Fabrics
