VISION

To set the highest standards of creative work with a rich motivational and edifying content, to provide efficient and prompt services to clients eager to create a name in the excellence arena and to be the leading innovative service provider in terms of inventiveness and revolutionary possibilities.

OUR MISSION IS TO SERVE THE HUMANITY BY PROVIDING THE BEST QUALITY HEALTH CARE UNITS WITH EXCEPTIONAL PRICING.

MISSION

Project of 100 Toyota Hi Ace Hi Roof BLS (Basic Life Support) For Sudan, Africa

Project of 50 Toyota Land Cruiser Hard Top BLS (Basic Life Support) for Kenya, Africa

InterSafe Int'l - UAE is a well-established company since 2011 with a strong reputation in the specialized vehicle conversion industry. Our vast knowledge within the medical field and maintaining quality standards (ISO 9001) gives us a huge advantage in the competitive market worldwide. From ambulances to fire trucks to mobile clinics, we can fabricate just anything on wheels for our valued customers. Enjoying a big share in the African and European market in the manufacturing of EU standard ambulances and health care units.

Our product line includes:

- ❖ Ambulances
- ❖ Healthcare Units
- ❖ Fire and Rescue Vehicles
- ❖ Mobile Work shops
- ❖ Refrigeration/Chiller Units
- ❖ Mobile Homes

AMBULANCE ON 4X2 VEHICLES

An ergonomically customized ambulatory cabin is added to the pickup (4WD or 4x2) in an integrated fashion. The reinforced GRP/FG gives light weight durable body structure which accommodates spoiler system of external warning and flood lights. All types of life saving medical equipment can be installed inside.

Utility Panel contains O2 flow meters, O2 cylinder changeover switch, central suction control & etc.

Spoiler warning lights with built-in PA system gives customized shape to external front, back & side top roof.

Sufficient LED room lights & intelligently utilized space allow convenient working with medical disciplin.

Back swing doors & other equipment.

Side & overhead cabinetry sufficiently accommodate all equipment.

ADVANCE LIFE SUPPORT (ALS) AMBULANCES

The Interior design allows maximum working convenience with medical discipline. All cabinetry, shelves, side walls and ceiling are made of molded ABS/GRP material which keeps the interior easily washable hence disinfected. A wide range of life saving medical equipment is available.

ABS/GRP molded cabinetry with lock & key and door lights

Utility Panel contains O2 flow meters, O2 cylinder changeover switch, touch panel for all switches & digital display.

Side Bench can also accommodate an extra patient & have storage beneath, stretcher area reinforced with S/S sheet.

Conveniently located paramedic revolving seat, side & overhead cabinetry sufficiently accommodate all equipment.

BASIC LIFE SUPPORT (BLS) AMBULANCES

We follow international practices while fabricating an ambulance hence our focus remains in delivering maximum comfort to the patient, convenience to the paramedics, durability of installed material & systems and ease of maintainance for the end user. Ultimately this results in producing cost-effective solutions without compromising quality standards.

Installation of suction device, pulse oximeter, spine board, kits for resuscitation & advanced first-aid makes an ambulance ready for basic life support (BLS). Other equipment may be added as per requirement.

Auto Loading stretcher lands on special platform which accomodates spine board underneath.

ABS/GRP molded cabinry with lock & key and customized revolving seat.

Utility Panel contains O2 flow meters, O2 cylinder changeover switch, Pulse Oximeter & etc.

Side Bench can accommodate an extra patient and has underneath storage for folding stretcher & other items.

Professionally designed interior gives easy access to equipment and enough space for paramedics to perform well.
