TRANSPOR SYSTEM

# RESTORATION | MAINTENANCE | CONCRETE

Marble Masters Gulf have developed a high Profile approach to the maintenance, restoration, and care of all forms of flooring material throughout the United Arab Emirates.

In line with International standards we have designed and implemented systems to maintenance and restoration challenges for all forms of stonework, including the use and supply of a wide range of leading edge cleaning, restorative and sealing products, to tackle most stonework problems.

Having an international and highly skilled team has enabled us to address the restoration, repair, sealing and maintenance challenges of a wide variety of flooring types such as Marble, Granite, Limestone, Terrazzo, Slate, Manmade stone and Porcelain, Concrete, Walls, Kitchen units, Vanity units and Facades, Internal and External.

## CONSULTATIVE SERVICES

Marble Masters Gulf will undertake to inspect your facilities at any stage in the construction and handover process to ensure that the quality you require is what you have been provided. We can also undertake problem solving and rectification advice on all surface types and identify any potential future issues.

# Slip Resistance Measurement

Marble Masters Gulf offer a service that measures the slip resistance of floor surfaces providing a printed record of the results and identifying if it is within international safety standards. We measure both the static and dynamic coefficient of friction using the BOT - 300E slip resistance meter in both wet and dry conditions.

This service provides you with an indication of any slip issues and can provide evidence of compliance or requirements to address any ongoing issues.

# Slip Resistance Treatment

We have a range of anti-slip treatments which are effective on almost any surface including natural stone, marble, granite, travertine, ceramics, acrylic, porcelain, stainless steel and polished concrete. The treatment is used on many different areas including, receptions, restaurants, kitchens, hotel rooms, schools, leisure centers, spas, washrooms and showers. The treatment can be done to new and existing floors and all works carried out will be issued a certificate of conformity to confirm the floor meets International recognized standards slip resistant regulations.

Baths and showers can also be treated ensuring guest's safety and with certificates issued showing the baths and showers meet the HSE's regulation for 'low potential for slip' - your due diligence can be clearly seen should it be called into question.

# Types of Slip resistance Treatment

- Chemical Application
- Mechanical Treatment
- Mechanical-Chemical Treatment
- Anti-slip tapes and metal strips

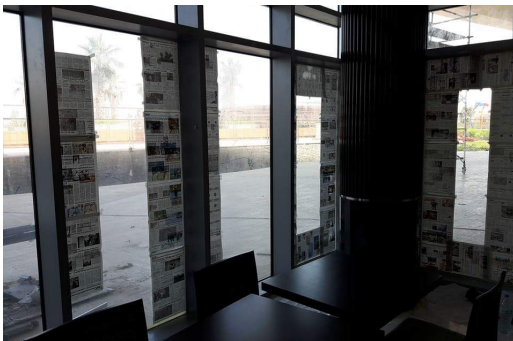

# Stain Removal

We Offer a wide range of deep cleaning and stain removal services including the removal of the following:

- 🔧 Grime
- 🔧 Algae & Moss
- 🔧 Cementitious debris
- 🔧 Efflorescence (Water staining)
- 🔧 Iron Staining
- 🔧 Glue Epoxy
- 🔧 Chemical Spill

## Aluminum Frame Repairs

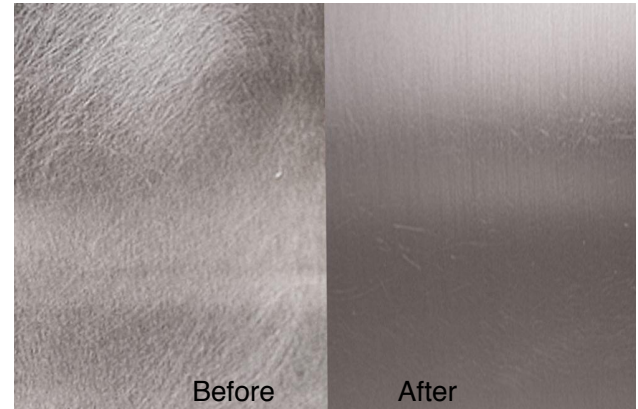

As one of the UAE well established restoration companies, we are able to offer our customers a comprehensive aluminum frame repair service that could save you hassle and money.

One of our experienced technicians can be dispatched to your property/ project sites to access the work that needs to be completed and then we will gladly carry out the necessary repairs officially and at your convenience

# Stainless Steel Repairs

We offers services in restoring, preserving, polishing, maintaining, repairing and refinishing stainless steel extrusions and stainless steel clad panels. We have stainless steel scratch and rust removal, metal surface preservation refinishing programs and stainless steel protective coating for the cleaning, repairing, restoring, polishing of damaged stainless steel. We remove corrosive and damaging dried lime residue deposits on stainless steel and remove milky white acid etching surface contaminants from stainless steel finishes.

# Glass Restoration and Repairs

We have extensive experience in removing all types of damage to glass, and we utilize the latest tools and techniques in glass scratch repair to completely remove minor to deep scratches on almost any glass surface. Our professional glass scratch removal services provide building and home owners with a simple timely, cost effective and greener alternative to glass replacement.

# French Polishing & Leather Repair

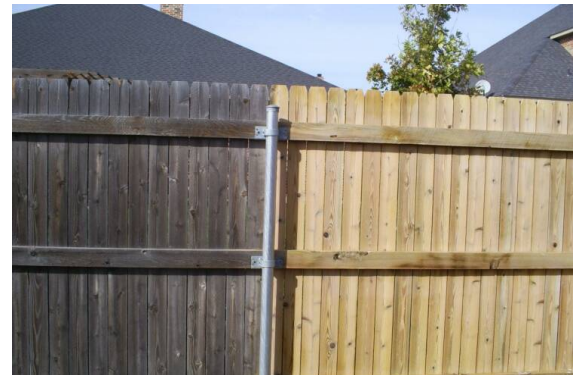

We can carry out undetectable repairs and renovation work on damaged wood and leather, returning the look and luster of the original, avoiding costly replacement. Using the traditional skill of French polishing we can prepare and treat wood in order to give it a smooth finish and enhance its appearance.

We combine traditional polishing methods with the latest technology to provide heat and water resistant finishes for all wood surfaces.

We can work on a variety of old or new large or small pieces of furniture including dining and bedroom tables, staircases and doors etc. Working on site or off-site depending on the nature of the project.

## Wood & Joinery Repairs

We specialize in wood and furniture repair for paneling, banisters, cabinetry, mantels hardwood floors and some upholstery. Other services include cabinet refacing, furniture repair repair of wood surfaces, color blending and image enhancement, as well as furniture refinishing and polishing.
