We ensure clients get help & desired service within 24 hrs.

We offer best prices for quality products.

We provide complete support till the project ends & costumer gets satisfied.

We offer prompt solutions to queries addressed to us.

Our expertise lies in offering a wide range of Landscaping Solutions in both standard and customized specifications.

Xeriscaping

Water shortages have become increasingly common across the globe, populations grow and development increases. However, altering our everyday behavior can conserve these precious water resources. One area where this is particularly true is in the design and maintenance of our lawn and garden.

With a little extra planning and consideration by Green City Premier Landscaping LLC, xeriscaping can help conserve water supplies while providing an aesthetically pleasing landscape.

Green Energy can lead to stability and development of Nation. This new approach is called as the "green economy", based on the foundations of sustainable development that ensure the permanent supply of clean energy and raw materials necessary for growth — by preserving available natural resources without harming the environment and reducing the negative impact of climate change on development.

What is Xeriscaping?

Xeriscaping literally means dry landscaping. It is a relatively new method of landscape design and maintenance that uses less water than traditional techniques. The goal of this technique is to create visually attractive landscapes that use plants selected for their natural water efficiency. In many cases this involves the use of native species. Along with a reduction in water use, xeriscaping results in less yard maintenance and often a decrease in chemical use.

Xeriscape Benefits

- **Saves Water.** Xeriscape can reduce landscape water use by 50 - 75%.
- **Less Maintenance.** Aside from occasional pruning and weeding, maintenance is minimal. Watering requirements are low, and can be met with simple irrigation systems.
- **No Fertilizers or Pesticides.** Using plants native to your area will eliminate the need for chemical supplements. Sufficient nutrients are provided by healthy organic soil.
- **Improves Property Value.** A good Xeriscape can raise property values which more than offset the cost of installation. Protect your landscaping investment by drought-proofing it.
- **Pollution Free.** Fuel consumption from gas mowers is minimized or eliminated with minimal turf areas. Small turf areas can be maintained with a reel mower.

Landscaping

"Make a difference today for tomorrow's comfort"

Green City Premier Landscaping LLC offers quality landscape solutions. Our landscape designers are constantly challenged to find something wonderful, new and different in their landscaping designs.

Once you seek our landscaping services, we begin the process of determining your landscape needs whether it is new landscaping designs or Landscaping Enhancements/renovation solution.

During the landscape site consultation we will discuss in detail how you want to use your outdoor space. The landscape design procedure begins by measuring the site and taking digital photographs. A plan is required to determine property lines and to confirm existing features. Landscape design will be developed to scale, including existing features and will incorporate the concepts discussed during the landscaping site consultation.

Once the landscape design is complete, a presentation will be scheduled with you, to review the landscape design. A contract will be included that proposes the installation cost of your landscape project. Proposals can be broken into predetermined phases based on your established budget for the landscape project.

Landscaping Execution & Development

Our organization work with our client right from inception to execution. This means our landscape designers will work with you from the initial landscaping design to the completion of the project. They are on site to ensure your landscape is completed properly. Our Company provides the ultimate value in professional landscaping. Our company strives to deliver true value for our client's investment.

Our expertise lies in offering a wide range of Landscaping Solutions in both standard and customized specifications. Some of the areas that include Residential Villas Landscaping Projects; Commercial Landscaping Projects; Hotels & resorts; Hospitals; Shopping Malls; Contractors & Builders; Developers and Architects.

Indoor Plants

GCP Presents Indoor Plant for Your Office, Home or Event

Creating inspiring interior nature spaces has never been more important. GCP indoor plants improve and create greener, natural indoor environments that inspire people to feel great and be more productive. We offer an impressive range of healthy indoor plants nurtured in leading nurseries until ready for indoor use.
