QUALITY CONTROL

Quality control is the most essential aspect in production. There are Multiple points for each of the stages of production where the fabric/garments gets checked in our industrial unit. Each member of our team at their own level makes sure that the order is processed appropriately. At **Kamani Textiles Trading**, Quality means to produce as per the requirement and to meet and exceed the satisfaction of the customer by all means. Quality is never jeopardized at any cost when a product is developed and delivered. We have two separate checking departments where the order is processed after completing the whole cycle of production. Highly trained and experienced staff is used in the checking department. We put great effort in training and education our checking staff on regular basis to follow all the guidelines of the order and company.

"We aim to be one of the finest Vertically integrated garment Producers specializing in knitted and woven, and also home textile products while providing the best possible service, value and quality to all our customers

Kamani Textiles TRADING

Quality is an integral part of Kamani Textiles!

CUTTING, PRESSING & PACKING

In cutting, pressing & packing, the human resources that we use, work on their duties very sincerely and they have been with the company for a long time. In cutting dead cotton, holes, unevenness, dyeing faults, shade variation needles marks from knitting get reported and are rectified in the first instance. Our pressing and packing department is well managed and is always in line with the overall production cycle.

STITCHING

Stitching is one of the most important phases in production where skilled people are required to work on quality machines to give required output. In our stitching department there are over 200 machines with the combination of overlocks, flatlocks, juki and other special machines having brands like juki, pegasus, yamatu and siruba. which are well known brands in the industry.
