RALLY STEEL WORKSHOPS

An ISO Certified Company

About us

Rally Steel Workshops a new division of Rally Industries Group started with the blessings of our chairman Mr.V.Lakshmanan in the emirate of AJMAN during the year 2018. Our parent company is well known for its POST TENSION works in the field of construction since 2006.

We are proud to introduce ourselves as one of the reputed company to execute prominent projects in UAE.

Our product range contains various items in different designs and sizes. All our products are designed in AUTOCAD and SOLID WORKS to ensure accuracy and quality of the products.

Our factory is equipped with modern computer numerical controlled machines for cutting and bending. Our factory is also endowed with various welding units and powder coating facility to produce quality products at international standards.

We also joined our hands with one of the most well developed manufactures of various advanced computer numerical controlled machineries like fiber laser, hydraulic press break, shearing, rolling and power press machines.

Our Policy

Rally Steel Workshops an ISO company offers superior laser cutting, bending, welding and powder coating services that can operate on a wide range of materials from mild steel, stainless steel, aluminum, brass and copper.

Our aim is to achieve supreme degree of technical competence to the most demanding market requirements and serving a wide range of products with competitive price and high quality.

We are skilled in all kinds of steel fabrications mainly in the field of power transformers, automobiles, oil & gas, steel structural works.

Vision

To be the number one Job Processing Centre and Contract Manufacturer for Fabrication & Machining Jobs that can supply products with top most quality and precision.

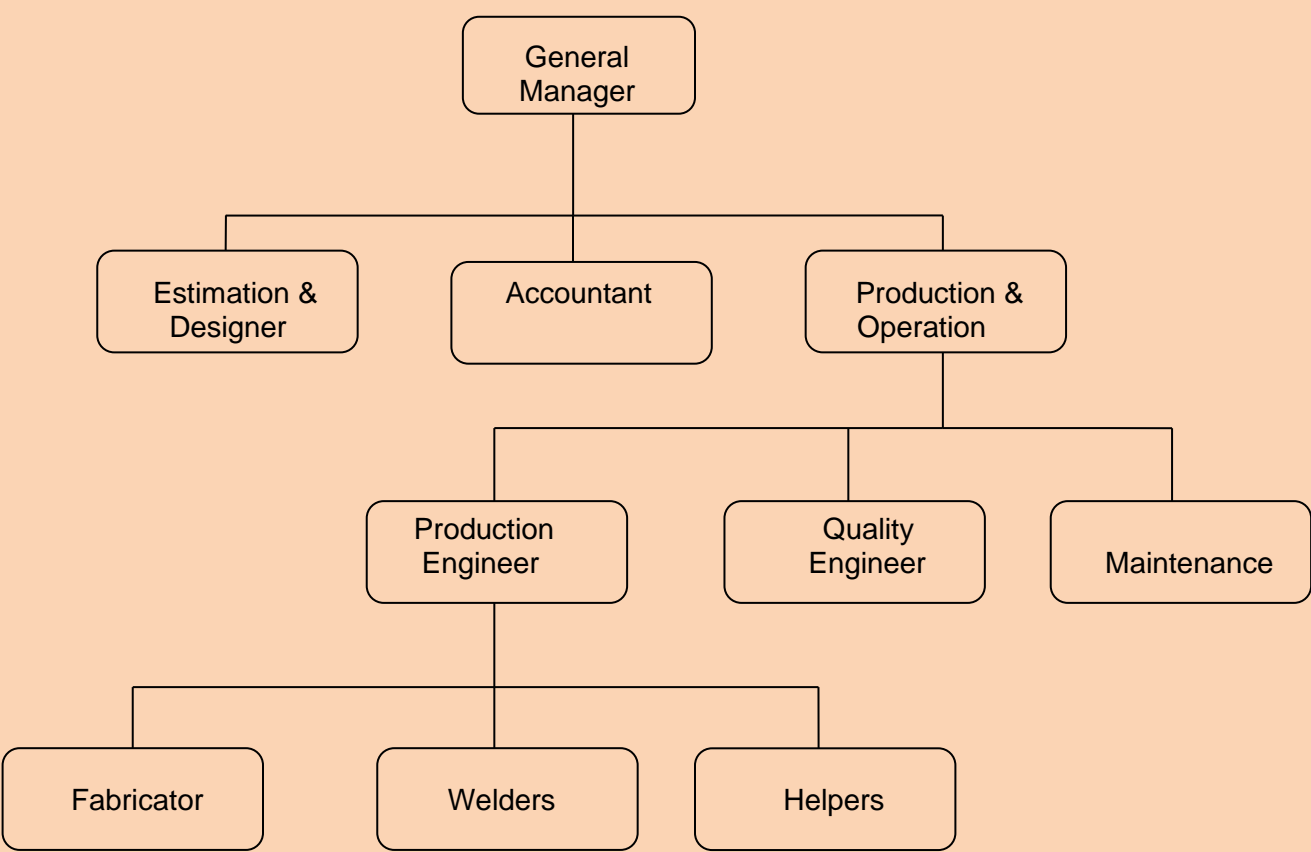

Mission

To provide Design, Engineering and Manufacturing support to the various customers in the field of Power Generation, Defense, Oil & Gas, Aerospace, Steel Construction and Food Processing Industries with high quality.

Certification

ISO 9001:2015 – Quality Management System.

Organization Chart

Workforce:-

Category	Nos
Mechanical Engineer	01
Workshop Controller	01
Quality Engineer	01
Foreman	01
Fabricator	03
Welders	02
Turner / Machinist	02
Helpers	04

Scope of work

- * All kinds of sheet metal fabrications.
- * Laser Cutting Works
- * Ballistic material cutting services.
- * Water Jet Cutting Works.
- * Wire Drawing.
- * Sand blasting, Painting and Powder Coating works.
- * CNC machining services.
- * Interior decorations.
- * Home Appliances (OEM)
- * We also deal with the sales of advanced computer numerical controlled machines.

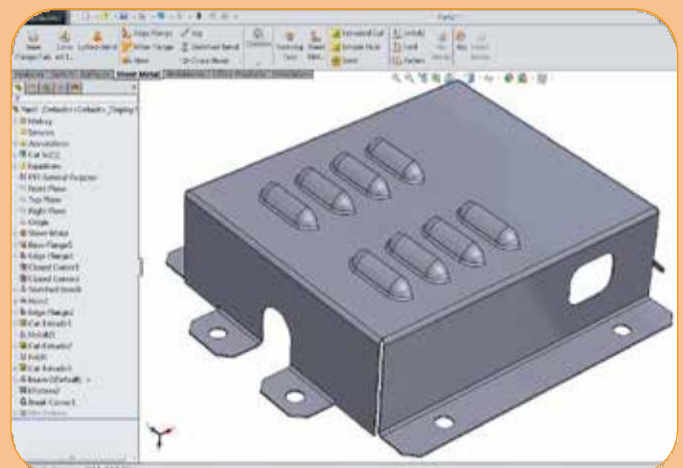

In-house Facilities

- In-house Facilities
- CNC Laser cutting machine 1.5 X 3 m bed size.
- 200 Ton hydraulic press break with 3 m length.
- MIG welding machine.
- SMAW welding machine.
- Drilling machine.
- Hand Saw machine.
- Powder coating.

Special Services

Well qualified designers are available with us to work on the following tools.

- Autocad
- Solid Works
- Creo
- NX
