CCTV SURVEILLANCE SYSTEM

Corvis Electronics LLC - provides the complete system consultancy, design, supply, implementation and maintenance of CCTV System with our high end state of the art technology products. Now, CCTV is finding increasing use in law-enforcement, productivity, surveillance monitoring etc. We provide both analog and IP based high definition cameras with DVR and NVR solutions where the data can be stored and retrieved at a later stage.
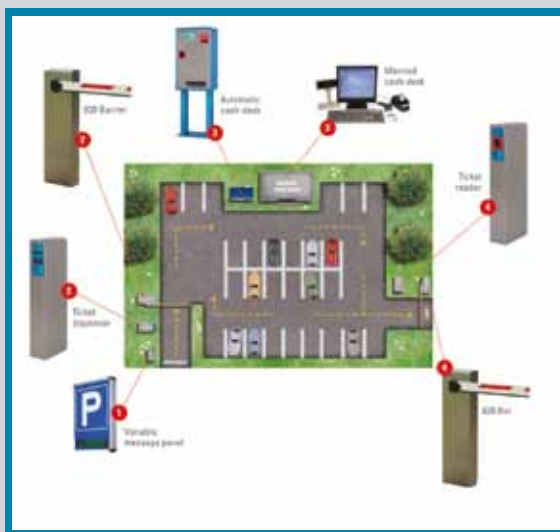

INTRUDER ALARM

A security alarm is a system designed to detect intrusion – unauthorized entry – into a building or area. Security alarms are used in residential, commercial, industrial, and military properties for protection against burglary (theft) or property damage, as well as personal protection against intruders.

T&A / ACCESS CONTROL

Time and attendance is a system designed to track and optimize the hours that employees spend on the job and keep records of wages and salaries paid. Hence it is very useful in small scale & large scale industries, MNCs, Government institutions, educational institutions, Malls, retail etc.

Access control is a way of limiting access to a system or to physical resources. In access control systems, users must present credentials like Finger Print / Face / Palm / Card / PIN etc before they can be granted access.

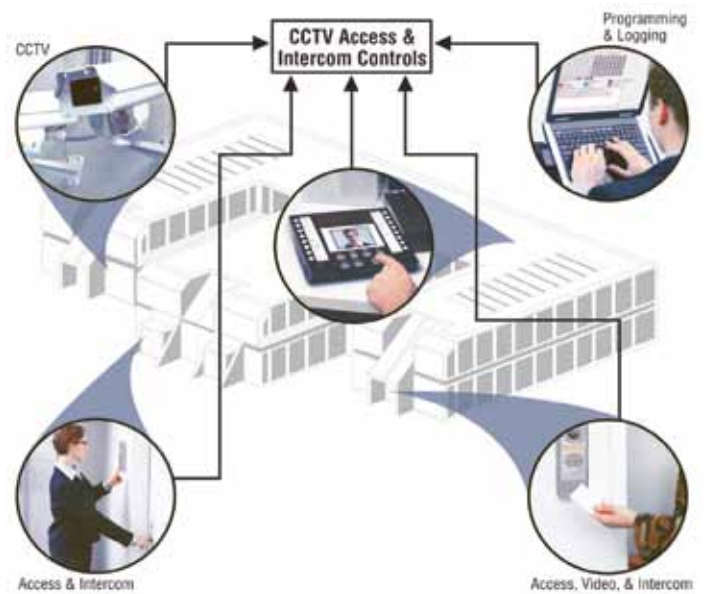

GATE AUTOMATION / PARKING MANAGEMENT

Electric gates are an easy way to ensure the security of private premises and can be used for all sized properties. For those who find the security of their premises (be it residential or commercial) important, electric gates are the way to go.

INTERCOM SYSTEM

An intercom is a stand-alone voice communications system for use within a building or small collection of buildings, functioning independently. There are simple house intercoms and intercoms developed for collective apartments with audio and video, The last generations are even compatible with computers and some models include TCP/IP.

AUDIO VISUAL SYSTEMS

Audiovisual (AV) means possessing both a sound and a visual component. AV services offer web streaming, video conferencing and live broadcasting, interactive whiteboard technology.

AV Automation specializes in reliable, simple to operate, high performance electronic systems for your home or office designed and installed to the highest standards of quality and service. Keenly aware of design and architecture, the goal is maximizing comfort, simplicity, and entertainment.

PABX SYSTEM

PABX / IP PBX telephone network is commonly used by all the organizations. PABX allows a single access number to offer multiple lines to outside callers while providing a range of external lines to internal callers or staff. An IP telephone (VoIP) to transmit telephone calls over the Internet
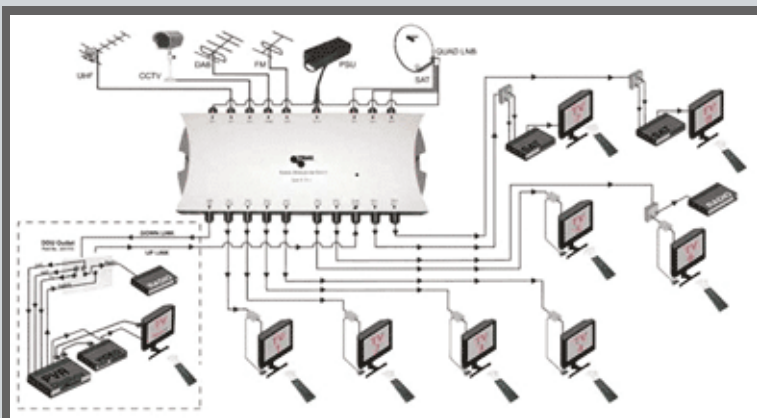

QUE MANAGEMENT

SMATV / IPTV SYSTEM

SMATV is for supplying and controlling the number and type of channels to multiple televisions. Not only TV channels but FM channels as well.

IPTV is a system through which television services are delivered using the Internet protocol suite over a packet-switched network such as a LAN or the Internet, instead of being delivered through traditional terrestrial, satellite signal, and cable television formats.

It provides Reception of TV/FM channels for hotels, motels, dormitories, hospitals and commercial properties with multiple tenants, schools.
