About Us..

AGV Technical Services LLC was established in the year of 2009 to offer technical assistance to the industrial sector in the field of mechanical works. Basic idea behind the formation of the company is to serve its prospective clients by providing services for fabrication, welding and installation requirements.

We have developed a company, which is characterized by intense motivation, ambitious professionalism and committed quality consciousness to our customers through professional and skilled technicians working around the clock for achieving our goal as one company and one team.

We understand the importance of meeting client need and that is the reason why we are committed to completing every project on time and within budget. We thrive to work with owners and engineers to help get projects.

Tools

We are preparing all kinds of special tools in our workshop.

Machinery

Lathe Machines
Gear Shaper

Hobbing Machine
Surface Grinding Machine
Cylindrical Grinding Machine
Universal Vertical Milling Machine

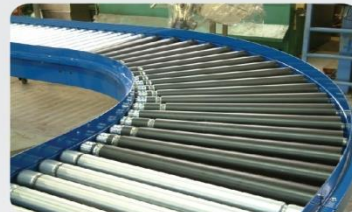

District Cooling

District Cooling is a reliable and convenient source of cooling energy Saving in electrical utility connection costs due to reduced electrical load of the building. Monthly consumption cost is confined to consumption. Noise, vibration and structure born sounds are removed. Environmentally friendly.

Solution

AGV is a complete turnkey operation – building and operating strategically placed district cooling plant and networks. End-users benefit from PDC's cost-efficient and environmentally friendly air conditioning solutions, while our back-up plants are just one example of how we deliver total reliability to developers.

Fabrication

- Fabricate all types of conveyors (S.S & M/S)
- Manufacturing, Fabrication & installation.
- Steel Structure.
- Fabrication of crane booms
- Plate Works
- Piping Works
- Tanks & Vessels
- Sheet Rolling
- Angle Rolling
- Pipe Rolling
- Display Racks & Trolleys

Foundry

- Ferrous and non Ferrous.
- Metals.
- Casting of copper alloys i.e. Brass, Bronze, Gun Metal, Zinc, Anode etc, for industrial and marine.
- We have capacity to cast a single piece weight up to 500 kg.

Pattern

All types of wooden, metal pattern & cores.

18

AGV OFFERS

We specialize in Chilled Water Network, Plant Building and All Types of Technical works and infrastructure and have continuously met the challenging demands of mechanical engineering projects that cover all aspects of the construction industry value chain in the following fields.

- Plants and chilled water networking.
- Chilled water cladding work.
- Under ground piping network, fabrication, welding and installation.

Pump and Hydraulic Jack Repairing

We are specialized in repair & Maintenance of all types of pumps,

Dewatering Pumps, Feed Water Pumps, Oil Pumps

All Types of Hydraulic Jack Repairing etc.,

16

Electro - Mechanical

- Fabrication & Erection of Chilled Water Pipes
- Complete Welding Of MS Pipes
- Fit-up, Laying & Welding of underground chilled pipes for district cooling services
- Complete Mechanical works for ETS including Hydro Test, Flushing & Chemical Treatment
- Installation of Chillers, Pumps & Associated Equipments
- Fabrication & Installation of Storage Tanks, Silos, Process Vessel, Chemical Reactors, Stock Chest in CS Material
- Erection of fire fighting pipes
- Fabrication & Erection of Steel Structures, Grating & Cable Trays in SS, CS & GI Materials
- Fabrication & Erection of water & waste water treatment equipments
- Steel Fabrication - Tanks, Handrails, Vessels etc..
- Fabrication & Laying of Pipelines (Carbon, Steel & SS)
- Tank Cleaning & Maintenance of Fuel Tanks & Water Tanks
- Installation & Overhaul of all types of valves
- Installation & Overhaul of diesel generators, pumps & compressors

5

Machining

- We have fully equipped modern machine shop to undertake the light, medium & heavy duty machine jobs. i.e,
- All types of gears (Spur, helical, bevel worm, worm gear)
- Common and general milling work etc.,
- All types of machine jobs (Lathe, Milling, Boring, Shaping, Drilling, Planing)
- Manufacturing and repairing of all types of dies and moulds etc.,

14

Piping and support work of chilled water plant, ETS Rooms and installation of chillers Heat Exchanger and valves.

7

Steel Structure Works

The demand for STEEL as a building material is growing within the construction industry. Steel's high strength, ductility, adaptation to prefabrication, speed of erection, etc., have always been attractive characteristics to consultants and developers. In today's "fast tracked" construction

projects where time and schedule are of essence, these qualities become decisive in choosing the type of structure to be built. At present, Structural Steel Works, Inc. offers all of the advantages of steel as a building material at the most competitive prices without sacrificing quality control.

- Lightweight for easy handling & economical shipping.
- Superior Strength & Durability
- Precise Measurements & Perfect Angles
- Resistant to termites & pests
- Great protection against worst weather conditions
- Lower premiums on insurance
- Minimal Material Waste
- Fast & Easy Installations
- Low Labor Costs
- Recyclable
- Cost Effective & Competitive

8

We are preparing all kinds of structure, fitting, tank in our workshop.

13

Work Shop

We are preparing in Workshop.

- Puddle Flange
- Hot Tapping Saddle
- Tee of Different Dia
- Pipe Reducers different Dia
- Road Ramp

Ducting

Air duct cleaning improves indoor air quality by removing dust and many hazardous contaminants such as fungi, bacteria and microbes etc. which are related to many allergy-related illness as proven in the recent studies

- H Fans & Air Filters
- Coil & Drainage Cleaning
- Visual Inspections
- Area Clean Up
- Equipment & Workmanship
- Ductwork Cleaning
- Duct Access Openings
- Grills & Registers.
