Moreover, we study about customer requirements and provide better solutions in the following fields: Telecom and Unified Communication , CCTV and Security Surveillance System, Call Center, Biometric and Access Control System, Gate Barrier and Parking System, Fiber and Cat6 Structured Cabling Solutions, Networking and Switching Solutions, Data Center Services, Business Software and Web solution, AMC and after sales support.

About us

I-PNS was founded on a very basic principle " providing business of all size with high-performance digital system at affordable price to run a company effectively". We pride ourselves to be innovators in the Telecommunication / Data Field and are committed to the continuous evolution of technology and providing our clients with state-of-the-art solutions for Voice, Data and Security. Our primary objective is to faithfully meet and exceed the present and future expectations of the Company's most valuable asset - our Customers.

We are experts in PC networking and can help plan and review wiring infrastructure and create a stable and efficient foundation for your network and phone system. We customize structured cabling plans with the ability to expand, upgrade and reconfigure your wiring needs to meet current and future business demands. Our expertise in designing reliable networks for voice, video, data, VoIP and security applications have earned us trust and respect throughout the telecommunications and Network industry.

Our Vision

Is to provide our client with innovative IT Solutions and services, turning their IT challenges into business advantages. We are focused on the complete, on-going satisfaction of our clients, providing a comprehensive array of services on a national scale, utilizing the latest and most effective technologies available, and becoming a single-source provider for all our clients IT needs.

Our Mission

Our mission is focused on strengthening our position as the leading IT and security solutions provider in the region. Our experience and integrity has earned us a reputation for quality and reliability, which are the pillars of customer satisfaction when it comes to the security industry.

Our mission is to provide outstanding solutions and services for our client by applying the latest engineering techniques and ensuring we meet the highest international standards in the industry. Using the creativity and talent of our employees, our aim is to build long term relationship with our customers through competitive prices and high-quality products and services.

IP TELEPHONY

We provide consistent, state of the art communication and solutions to your enterprise. Our IP and Digital telephony solutions leverage your existing data network and provide highly redundant and customized solutions to accelerate your business. With expert consultant and design engineers, we ensure that we you the best and the most cost effective solution available in the market today. Backed up with our strong telephony services and support group, we ensure that your solution is available always.

SECURITY SURVEILLANCE SOLUTIONS

IPNS is a direct supplier of security cameras (CCTV, network IP, and HD-SDI), video surveillance systems, and CCTV equipment (Closed Circuit Television) for home, business and government. In addition to CCTV cameras and systems, we also sell network IP cameras, HD-SDI cameras, and hundreds of video surveillance accessories. Surveillance cameras and DVR systems with remote Internet viewing is our specialty. Most of our surveillance systems include DVR viewer software for Windows and Mac PCs, as well as mobile surveillance viewer apps for iPhone, iPad, and Android devices. We sell many complete systems that are pre-configured and easy to install

AUDIO VISUAL INTEGRATION SOLUTION
