➤ Reinforced Concrete Cutting:

- ❑ Concrete Core Cutting.
- ❑ Concrete Saw Cutting.
- ❑ Concrete Wire Saw Cutting.
- ❑ Chemical Anchor Fixing.
- ❑ Controlled Demolition.

➤ Our Vision.

Concrete Core Cutting

As the name defines its work to make a cylinder opening in slabs & walls (concrete, block, precast etc.) along with steel with very fine finishing. Also the opening can be opened with different angles required.

We can open holes of different diameters (From 15mm to above than 2 meters). It can also open to any depth required.

Concrete Saw Cutting

We can cut concrete columns, beams, slabs as well as stairs etc. of different depths using concrete diamond blades. With Concrete Saw Cutter, we cut concrete up to the limited depth. This machine is operated through remote control and having a wide range of safety system.

Concrete Wire Saw Cutter

We can cut concrete columns, beams, slabs as well as stairs etc. of different depths using concrete diamond wire. With Concrete wire Cutter we cut concrete up to the infinite depth. This machine is operated through remote control and having a wide range of safety system. The heads of both the machines: Saw Cutter and Wire Saw Cutter are changed. Rest of the unit remains same.

All the cut pieces are carried out with so many different techniques. According to the situations.

Chemical Anchor fixing

Fixing of anchor with or without into reinforced concrete structure

Chemical bolt and anchor fixing is mostly used for hanging steel or increasing steel in columns as well as beams etc. for extensional work.

Controlled Demolition

In controlled Demolition we can demolish concrete, block structure according to the site & the situation.

According to the demand, we can demolish concrete without cutting steel bars. We can also remove debris to the related dumping yard.

Our Vision

Our Company “Al Jouhara al Raea General Contracting” is one of the most recognized companies in the United Arab Emirates. Our company is based on certified technicians along with the machinery of modern age.

Our vision, to get the peak in the related field, is based on the foundation of more than 10 years of experience and our strong leadership in our related industry. Our commitment, "Built by us for you", now extends globally with strictly maintaining high standards in ethics and technical excellence, and encouraging timely environmental and social responsibility.
