Is an energy solutions provider with an ultimate wide range of expertise that exceed the 25 years in energy field. Our energy solutions are designed and manufactured to give our customers more value for money as we take excellent care of the quality of components, the customer requirements according to the working environment, the future operation & maintenance easiness and of course the ultimate real warranty.

A remarkable business success story, Alefy FZE started from one man's vision to transform the face of traditional sales into a reliable, trustworthy & efficient Solution Provider. It has grown into region's most respected and successful businesses and achieving the highest respect among the Generator supplier fraternity. Alefy works with its clients through a combination of deep-level business and technical expertise, an extensive knowledge of today's technologies, and a mature, highly capable delivery and services infrastructure. This brings Alefy among the leading energy solution companies in UAE. Alefy offerings help our customers improve reliability, reduce owning and operating costs, and enhance top-line revenue. Our business approach is based on establishing long-term partnerships that encourage success through mutual benefit.

## Mission

We believe great ideas carry an organization forward in a way that sheer effort or access to resource cannot. Our goal is to constantly develop and enhance our business, our product range and our customer experience by providing an innovative and comprehensive energy solution with high quality, reliable, competitive products and consistent services levels that meet and exceed our customer's expectations

## Vision

To get excellence in every business we do. We want to be market leader by providing most innovative and value products to our customers around the world

## Value

Strong Commitment to customers to provide unparalleled services, Build strong relationships with our suppliers and partners and We believe strength lies in diversity. We are committed to identify and recruiting talent from diverse back grounds whose varied perspectives positively impact the way we do business. They also reflect the multi-cultural background of our customers

**Dependable, Quality-conscious and Value for Money  
supplier of heavy duty Engine parts**

Originally a sealing products manufacturer for the automotive industry, AFA Industries, Inc. early on recognized the need for a dependable, quality-conscious and reasonably priced supplier of heavy duty engine parts. Since 1987 They have grown our domestic and international business, adding new and extending existing product lines to meet the needs of these specialized markets.

Due to the demanding nature of commercial and industrial diesel applications, our industry has always been aware of the need for the best technology, most durable materials and highest quality precision manufacturing. AFA, from the outset, determined that these three factors would drive every aspect of the company's operations. The ultimate test of their parts is NOT sales volume or lowest price, it is performance in the field.

Starting with sealing products, They developed an all pervasive system of quality control and inspection that is second to none. Technology is always state of the art. Materials are always OE Quality or better. Manufacturing methods are constantly monitored for consistency and efficiency. The result is a product that will meet or exceed the expected life

cycle of any heavy duty diesel engine in any application – guaranteed.

As They have diversified into other product lines, They have kept their eyes trained on the same fundamentals that have made them one of the most respected sealing products suppliers in the industry. They earn that respect every day with every part. From the smallest "O" Ring to the largest Cylinder Liner they are aware that their reputation is on the line where it counts – driving commerce and industry.

Currently AFA specializes in replacement parts for Cummins®, Detroit Diesel®, Navistar® and Caterpillar® engines.

AFA has many years of experience supplying domestic and diverse international markets. Frequently their parts are in service in remote locations under harsh operating conditions, demanding superior quality and durability. Whether applications take your equipment to snow capped mountains, wind swept deserts or corrosive salt water environments, field proven **AFA parts meet the challenge.**
