

# MEPPROX

## Total Solution

- Pipe Supporting System
- Floor Drain System
- Roof Drain System

## INTRODUCTION

Mepprox inception in 2015, as a trading company in Dubai, U. A. E., was conceived to serve Contractors, Traders and the individual customers with the supply of materials required for the Infrastructure, Mechanical & Plumbing, Landscape, Irrigation, Horticulture and Pool segments of the construction industries with quality materials and competitive pricing by direct import from reputed manufacturers and trusted partners worldwide.

Mepprox also strengthened its position as a reliable supplier and solution provider in a timely and efficient manner with its own production units in India manufacturing pipe support systems and Stainless Steel drain use in plumbing sanitary, storm drain and waste, the made to specification/order fabrication unit in Dubai for the PVC/Polyethylene products, its subsidiaries and partners in Qatar and China in in-house fabrication, procurement and trading.

The Workshops in Dubai, the production facility in India, the procurement subsidiary in China all have a work force of trained engineers with more than fifteen years experience in working with plastic and metal products.

Principals : Our reputed partners are fully comply with strict industry standards, reputation for quality products, innovation and in providing on-site technical support worldwide and can assist to install technical products.

## SOUND PROOF PIPES & FITTINGS

Skolan db is top quality pipe system Made of Mineral-reinforced polypropylen It is this material that provides the Skolan db sound proof pipe system with its excellent sound - insulation properties thus creating ideal Pre-requisites for forward looking use in any area of building construction. (House, Flats, Hospitals, Hotels & Industrial Buildings. etc.) The Complete range of Pipes DN 56 to DN 200 together with an extensive fittings Program.

17 dB (A) according to DIN 4109 and VDI 4100

**Made in Germany**

Polypropylene (PP) Produced according to DIN EN 1451 - 1, respectively DIN 19560 - 10 resistant to hot water, permanent low inflammability as per DIN 4102 B1.

### Application

- Building Drainage as
- Waste Water Pipes
- Rain Water Pipes
- Ventilation Pipes

26 dB (A) according to DIN EN 14366

CONNECT TO BETTER

## PVC PIPES & FITTINGS

### OSMA Soil and Waste

#### Comprehensive choice

The Osma soil & vent range offers an exceptional choice of pipe and fittings including brackets, bends, junctions, access fittings, terminations and problem solvers.

- ⌚ Ring-Seal (push-fit) pipe and fittings are available in 82/110/160mm sizes

OsmaSoil pipe and fittings have seals that always stay where they should; fittings via an innovative co-moulded seal and cap (captive seal), ensuring the seals do not dislodge and retain airtight. Socketed pipes have a co-moulded rubber and polypropylene ring which is retained inside the socket.

**Made in UK**

The PVC gravity sewer systems are suitable for drain and underground sewer applications. The easy pushfit rubber ring jointing system is durable, corrosion free and light weight.

The PVC sewer systems are plastic drainage systems designed for both foul and surface water applications in housing, industrial, commercial and highway drainage. The smallest size from these ranges (e.g. 82 - 200mm).
