# Products and Services

## ***Road & Highway Lighting***

Technopole offers high quality steel and aluminum poles used in a wide variety of applications ranging from small street lighting poles. Choose from tapered and non tapered poles designs and heights of up to 18 meters. Many of our poles and brackets can also accommodate multiple luminaries mounting, thus giving you greater flexibility in your outdoor lighting design. Although the standard product offerings in this catalog are comprehensive and should meet your project requirements, we also offer custom-designed products which will meet any of your special needs or applications.

## ***Airport Lighting***

Our exterior lighting Poles can be designed to meet specific design standards such as Federal Aviation Administration (FAA) and Civil Aviation Authority (CAA) regulations and have been previously supplied to Dubai Airport, Doha Airport & Command Military Work bases.

## ***Port Lighting***

We specialize in minimizing the number of masts required to ensure the area is maximized for container space and container handling. With our raising and lowering system maintenance can be completed easily with minimal staff therefore reducing maintenance time and costs. We have previously supplied to Umm Qasr Port (Iraq), Khorfakkan Port (UAE) among others.

## ***Oil & Gas***

Technopole Industries Lighting pole can be specifically customized for oil and gas facilities and nuclear plants. We have previously supplied to Oils field in areas where specifically Explosion proof system are required including light fitting and high mast. We have previously supplied to ADCO, WOQOD, EMAL, Weatherford, Baraka Nuclear Power Plant etc.

## ***High Masts***

Technopole produces a complete high mast lighting system for illuminating large outdoor areas including highways, ports, commercial parking lots, industrial plants, airports, power plant and sports yards. High mast lighting being preferred over conventional lighting poles, especially where large areas are to be illuminated without the need for numerous lighting columns. Our high mast offer ease of maintenance with a simple and effective winching system which allows the lighting ring to be lowered to a ground level for lantern maintenance.

## ***Mid Hinged Columns***

Mid hinged columns and masts are ideal in areas where space is limited. The light fittings at the top of the column can be easily maintained at ground level through the use of a simple tool. Ideally for use on CCTV, gas detectors, highways and sports grounds.

## ***Traffic Signal Pole***

These poles are produce using Steel and are designed by our engineering team according to the number and dimensions of traffic signals and place of installation.

## ***Monopole***

A variety of monopole can be produced of heights upto 40 meters, complying to the relevant international standards and are supplied complete with all necessary accessories and are generally used for antenna and electric transmission.
