SPEED HOUSE GROUP OF COMPANIES

Speed House Group of Companies was established in 1974 which today includes a 70,000 sq. m centralized manufacturing facility and 1600 dedicated workforce. The group as a whole offers a complete turnkey offering of various GRP, GRC, Civil Works, Prefab houses, Converted Containers, Bathroom pods, High-End Furniture, and Interior Fit-out solutions to various construction and affiliated industries.

Collaborating with our clients, we resource and supervise the management of each phase of our project, attending your needs with a single point of contact. We work with you to design a program that fits your current and future project needs, schedule and budget.

www.speedhouse.com

OUR VISION

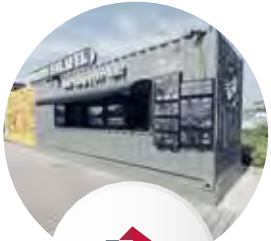

To be the market leader in modular construction utilizing recycled shipping containers as building blocks for various infrastructure needs of the society and create a greener tomorrow

OUR MISSION

To service the need for quick, modular, cost-effective and eco-friendly infrastructure requirements of the community utilizing shipping containers and other modular construction techniques. We achieve this through our consistent R & D Innovation and customer feedback mechanism.

WHY QUBES ?

Qubes exists in a complete synergy with the rest of the Speed House Group companies. The idea of having a common manufacturing facility is to compliment each other's production successfully. Keeping this in mind we offer a complete turnkey solution. The entire synergy brings forth an atmosphere of a single point of contact for the client and also makes quality control economical and easier. A basic project executed by speed house group will look something like this :

QUARTER SOLUTIONS IN A BOX

QUBES - CONTAINER COVERSION

All aspects of concept creation, container conversion, and custom fabrication are handled by Qubes.

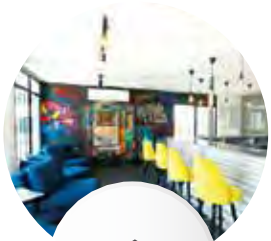

SH CONTRACTING

SHC focuses on providing complete turnkey building solutions right from execution designs and authority approvals to completing civil, foundation and external MEP works, as well as overall project management.

SH INTERIORS

From providing design and concept drawing to complete interior fit-out and soft furnishing, everything required to make a robust structure look spectacular and functional is done here.

THE POD COMPANY - BATHROOM PODS

Specialized in providing optimized kitchen and bathroom pods built for containers, specifically for large-scale projects, ensuring consistency in quality.

SH TRANSPORT

SH transport with its own fleet of trailers and specialized network of shipping agents can handle the delivery of your entire project both locally & globally.

CONTAINER CONVERSION

QUBES can transform all your imaginations into reality using these magic boxes. We utilize 10', 20',40' as well as customized containers to create Offices, Accommodations, Hotels, Ablutions, Industrial Units, Villas, Retail Zones, Cafe's & Kitchen, Mobile Caravans and Mega Camps (for Mining, Military & Rehabilitation Purposes).

CUSTOM FABRICATIONS

We understand that clients can be equally creative or limited by a projects requirement. Hence, we also offer custom fabrication options to suit our valued clients need. We can create unorthodox sized boxes or infrastructure zones as required. Speed House Interiors, our sister company also brings on board the ability to finish these units to specific details required by the client, including soft furnishings.

TRADING / STORAGE

QUBES at any point of time stocks several of these container units for both conversion, trading and leasing purposes. We offer New and Used 20' and 40': Standard, High Cube, Open Top, Reefer, Flat Racks and Tanktainer units for sale and long-term lease.

CONCEPT DESIGNS

Our in-house design team is specialized in developing our client's imagination right from the mood board to an executable layout and achievable design. We believe in bringing out our own flavor and fun to these concepts always keeping the client's requirement at foresight.

CONTAINER BENEFITS

Shipping Containers were first invented and patented by Malcom McLean back in 1956. Since then, they have evolved from 'boxes' we use for goods storage during transit to elements that can be utilized to suit varying needs. Their durability and availability have only served to accelerate this trend. In addition to these benefits, we list here several other advantages of using shipping containers for building solutions.

BESPOKE

Shipping containers can be adapted to many uses and we can work with you to make sure the design suits all your needs and requirements.

TRANSPORT

Containers can be easily transported on the back of a truck, train, plane or a ship enabling flexibility in modes of transport.

MODULAR

There are multiple combinations and design possibilities when using containers.

ADAPTABLE TO LOCATION

Having been designed with a view to optimizing logistics, it can be adapted to practically any location or setting.

COST

Even with their competitive construction cost, shipping container homes will last as long as traditionally built homes or even more. Also making relocating your whole building possible as well as reducing your maintenance budget.

SECURITY

Containers are used globally to ship valuable goods. This makes them a safe box to base your projects on.

ECO-FRIENDLY

A 40ft shipping container weighs over 3,500KG. When upcycling shipping containers, several tons of steel are saved. Also due to minimum foundation requirements, the carbon footprints are greatly reduced.

VERSATILE

Shipping containers are very versatile and can be used for a wide range of applications.

20-30%

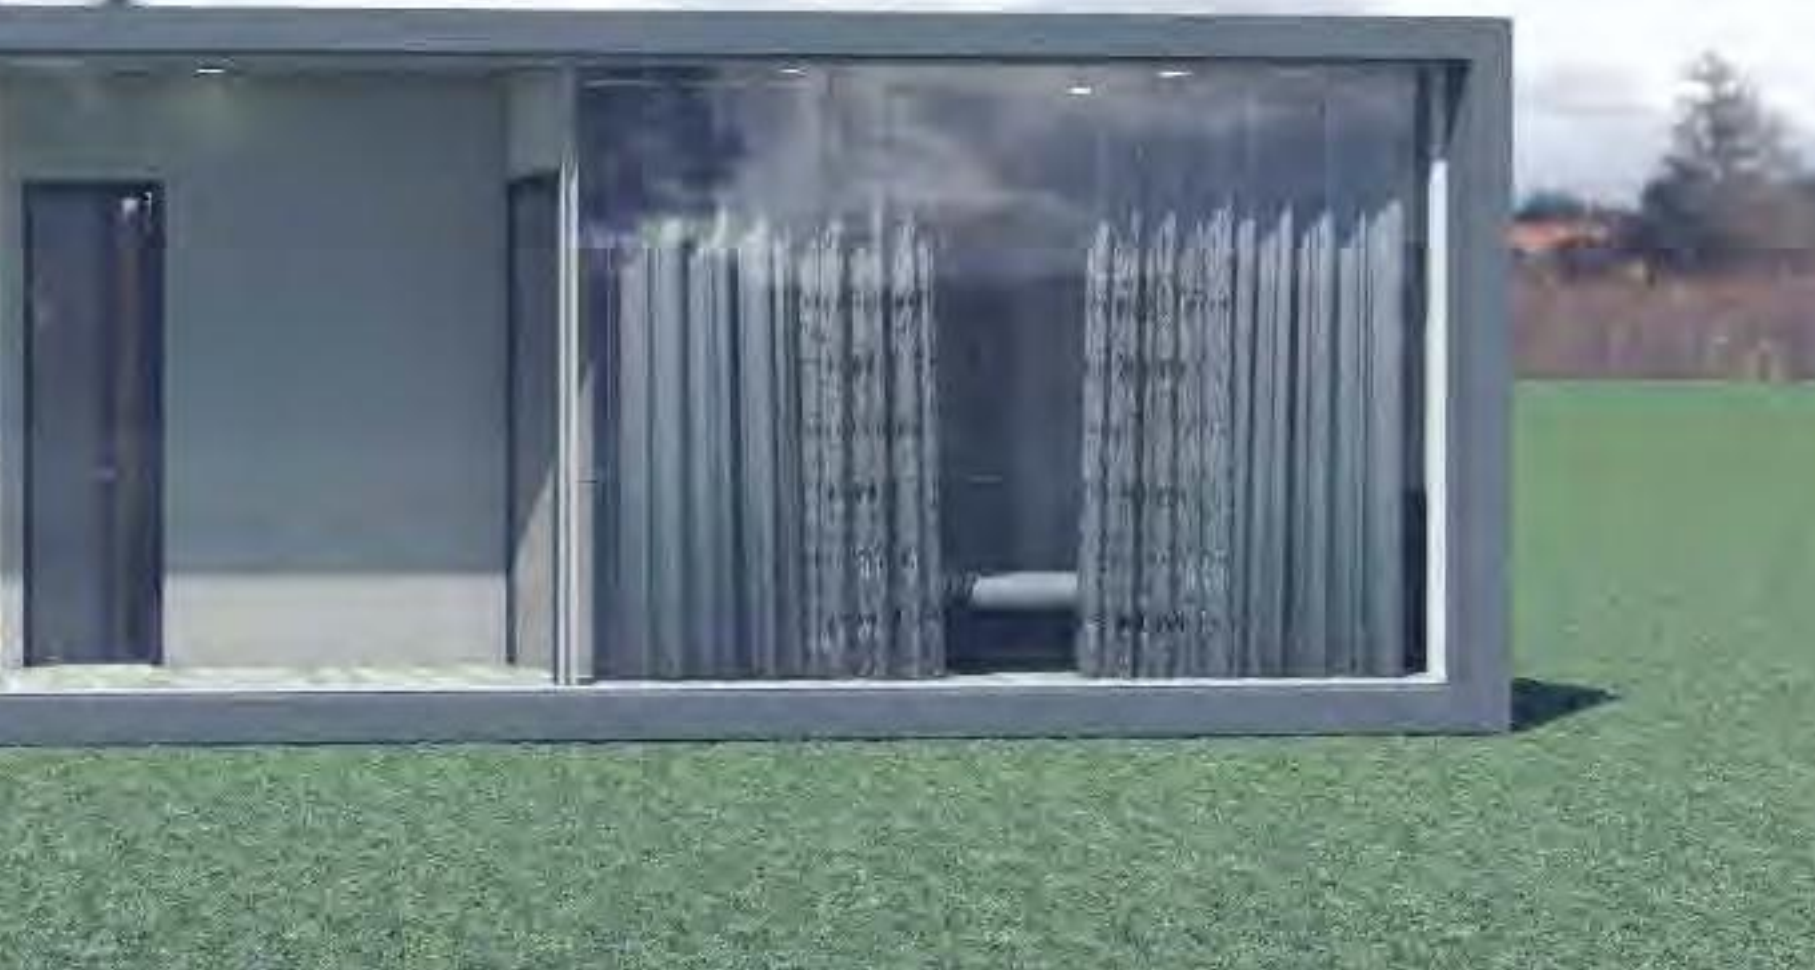

Cheaper Than Conventional Construction

*Depending upon material selection and time management.
