Decorative Panels

Green PVC

By common definition PVC is not green, but were close. We use post-industrial content in our products, offer low VOC adhesives for installation and all our products are certified OEKO-TEX Standard 100. This means over the life cycle of our products installation we have a relatively small environmental impact.

*Non-EDC (Endocrine Disrupting Chemicals) *Non-VOCs (Volatile Organic Compounds) *RoHs/Lead free * Heavy metal free *Chemical adhesive free

Anti-Bacteria

By developing Global shade we were once again able to put our progress and safety drive to the test. Indeed, DW contain an anti-bac terial affect in certified SGS ASTM G21, 22. The exponential spread of the most common germs in hospitals, (Klebsiella pneumonia, Staphylococcus aureus) is stopped, thereby setting first and for most new benchmarks in healthcare as regards room hygiene.

*Better quality and efficiency in room hygiene

*Permanent protection against the formation and transmission of bacteria

*Bacteria, such as no socomial germs, will not be able to spread with drapilux bioaktiv

*No environmental pollution from chlororganic compounds

*Improved safety at work with the processing of bio-active fibers and tissues

Energy Saving

Global shade blocks more than 80% of solar heat, 98% of harmful UV and reduces 25-40 energy consumption in winter and provides and excellent conservation of warmed indoor air in winter while normal fabric curtains block only 20-30% of the solar heat and 15-30% of UV. This result in considerable saving on the costs of energy (air-conditioning, heating etc) but it also reduce the amount of CO2 emissions.

- *Reduced CO2 emissions
- *Reduced radiation heat
- *Better temperature control
- *no downdraught near windows

Indoor air quality

Global shade fabric have been awarded US Green guard and Green guard(Children& School) certification which proves they have no harmful substances to the human body and are safe to use in any environment. In doing so, DW combines the highest level of aesthetics with safety and cleanliness for fresh and clean air around the clock.

- *Noticeably cleaner and fresher air round the clock
- *Reduces the risk of allergies, particularly among elderly people or
- those with weak immune systems
- *Breaks down pollutants and odours

Fire & smoke classification

DW is a technical fabric manufacture based in south korea and well-known in the world market for its strict quality standard and control, Also our chemical unit developed many eco friendly & high technology plasticizers. Consequently, there is very little chance of smoke gas developing in the event of fire. The excellent safety factor has been testified by general test certificates in accordance with all national and international standard-for the highest safety standard in all living and working environments.

- *No afterglow
- *No pollutants
- *Does not rot or mildew

^{*}In the case of fire very little smoke is emitted

Hospital Cubicles & Curtains

HOSPITAL CURTAINS

Al Zairah offers the best selection of high quality privacy, cubicle and hospital curtains for all of your applications that require privacy and seclusion. Privacy curtains are commonly used in the medical and commercial industries where they serve as hospital privacy curtains, doctor's office privacy curtains, dressing room curtains and even to give privacy to cubicles in offices. The curtain fabrics we offer combine safety, style, ease of care and affordability. The construction of these privacy curtains ensures the look that is desired coupled with long curtain life, resulting in value for the customer.

衫 🛛 FLAME RETARDANT CURTAINS

All cubicle curtains are fabricated using fabrics that pass NFPA 701 testing, the most stringent national standard. Please consider all local codes however, to ensure you meet all requirements (e.g. some areas require the use of drops in lieu of mesh to ensure appropriate coverage of sprinkler systems.

Over the years, as the medical privacy laws are becoming more stringent and patients demanded more privacy, hospital cubicle curtains have been designed with more and more assets to make their use more efficient. Hospital cubicle curtains are used as privacy curtains ,ideal for patients in hospital rooms , clinics , nursing homes, educational and other facility environments.

SPECIFICATIONS OF OUR CUBICLE CURTAINS

- Our fabrics are therapeutically beneficial, comfortable and effective for use in healthcare facilities.
- All our fabrics are strong, durable, antimicrobial, antistatic and flame resistant.
- Our mesh provides maximum ventilation, you can choose between white and colour options
- Attractive profiles combines mechanical strength and flexibility with the smoothest performance.
- The design details gives rigidity and strength with great flexibility in layout whilst achieving a clean unbroken line in hospital wards
