**ELECTRICAL AND AUTOMATION  
CUTTING TOOLS SOLUTION BEYOND LIMITS**

The beginning was a normal tea shop story tale, where few engineers shared their views on entrepreneurship and two of them took the challenge and went ahead. A journey which started and continues with the same zeal. We were blessed to receive the goodwill of customers and suppliers' from the early stages itself.

We have made our presence felt in Europe, MENA region and East Asia with facilities around the globe and with skilled employees. We have transformed ourselves for the first look stop for all engineering materials, with more than five years of expertise in the field of electrical automation, instrumentation and machine tool and have established a commanding position in procuring and delivering systems, equipment and spare parts for Oil and Gas Industries, Heavy Industries, Power Plants, Construction field, Aviation and Defence sector. In short if procuring is an art we are the best artists of the trade.
