

Delta Water®

magnetic water treatment

Magnetic water treatment for treating soil and water salinity

Do you want to deal with the salinity problems of your irrigation water or your soil?

Do you want to increase your crops and improve its quality?

Do you want to save irrigation water and fertilizers?

Do you seek maintaining a good irrigation network and avoid the clogging of the sprinklers?

All this and much more advantages will be guaranteed if you start using **Delta water device**.

The technology of agriculture has improved a lot lately. It has also spread all over the world with the aim of solving various problems that face farmers of grain, vegetables and fruits. Problems such as weakness of productivity, decrease of quality, or others that are caused by excessive water and soil salinity.

Agricultural technology now offers .. Technical magnetism for curing fresh water, brackish water or high salinity water. Scientist discovered the new magnetic treatment for water which results in maintaining the vitality, properties and natural elements of water positively affecting the plants and the soil too.

A device that lasts for a life time. It pays back its cost during the first month of use and without any need for maintenance.
