### **Reliable service** **Standard work processes**

From setup to cleanup, every mechanic performs every work process the same way – every time. We work safe and smart, making the most efficient use of time and resources.

## Training

SSE mechanics are the most thoroughly trained in the vertical transportation industry: collectively, they receive technical trainings. Additional computer-based training enables and to become experts on every relevant subject.

## Quality Control

Supervisors check all maintenance procedures, determine whether or not equipment requires replacement or upgrading, and ensure that every system is entirely code-compliant. Regular in-depth interviews are also performed with customers - because your input is not just welcome, but necessary.

While we manufacture, install, modernize and maintain elevators, escalators, and moving walkways, the heart of our business is problem solving. Whether a customer needs a sophisticated elevator system for the tallest building or a simple lift for a two-story home, we are dedicated to providing the safest, most reliable solutions possible.

### Special Design

## Door Operators

An efficient and comprehensive range of three door operating systems covers all market requirements.

- v Two systems controlled by variable frequency meet the needs of medium and high rise commercial buildings.
- v The variable speed system controlled by DC has been specifically designed for residential buildings.

### Door Operator with VF control

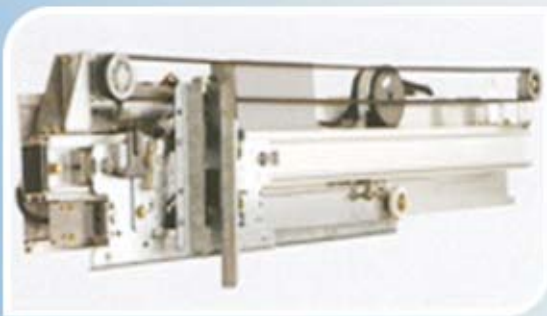

For medium and high rise buildings with high traffic patterns

A result proven technological expertise, the two door operator systems are fitted with AC motors controlled with a closed loop variable frequency drive.

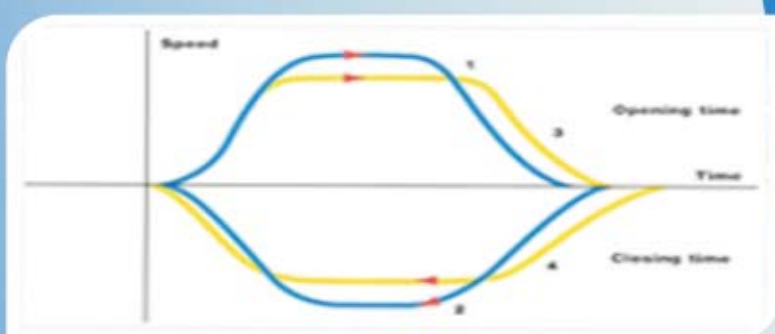

Guaranteeing optimum traffic by considerably reducing passenger waiting time on the landing, the systems also offer quiet operation thanks to the highly efficient door control.

### Door Operator with DC control

For residential and low rise buildings

A belt-driven door operator with DC control offers both improved reliability and reduced noise. Variable speed control ensures smooth door operation.

Opening/closing speed profiles of the door operators

- 1 : Rapid opening
- 2 : Rapid closing
- 3 : Slow opening
- 4 : Slow Closing

## Intercom

To facilitate easy communication with outside personnel

An intercom offers an immediate communication between lift cab and outside personnel when assistance is needed

Effective communication can calm down the nervousness of a trapped passenger

## Escalator Brush Skirt Guard

Ensure passenger's safety

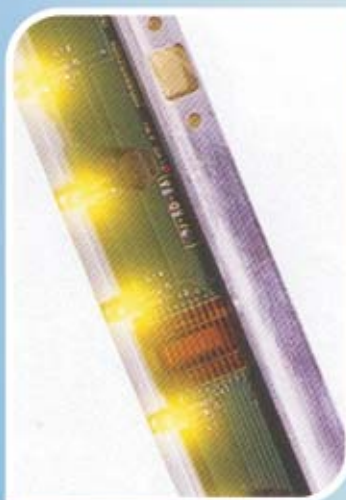

Easy Installation, Short Down Time

Stainless Steel Mounting, Anti-Corrosion, Wide Range of Color

It is always dangerous for passengers to stand too close to the skirt when riding an escalator. By installing escalator brushes, it can alert passengers who stand too close to the skirt to move away from the sides and guides them to stand toward the center of the step which is the safest place on an escalator.

## Transmitter And Receiver Detail

### Safety

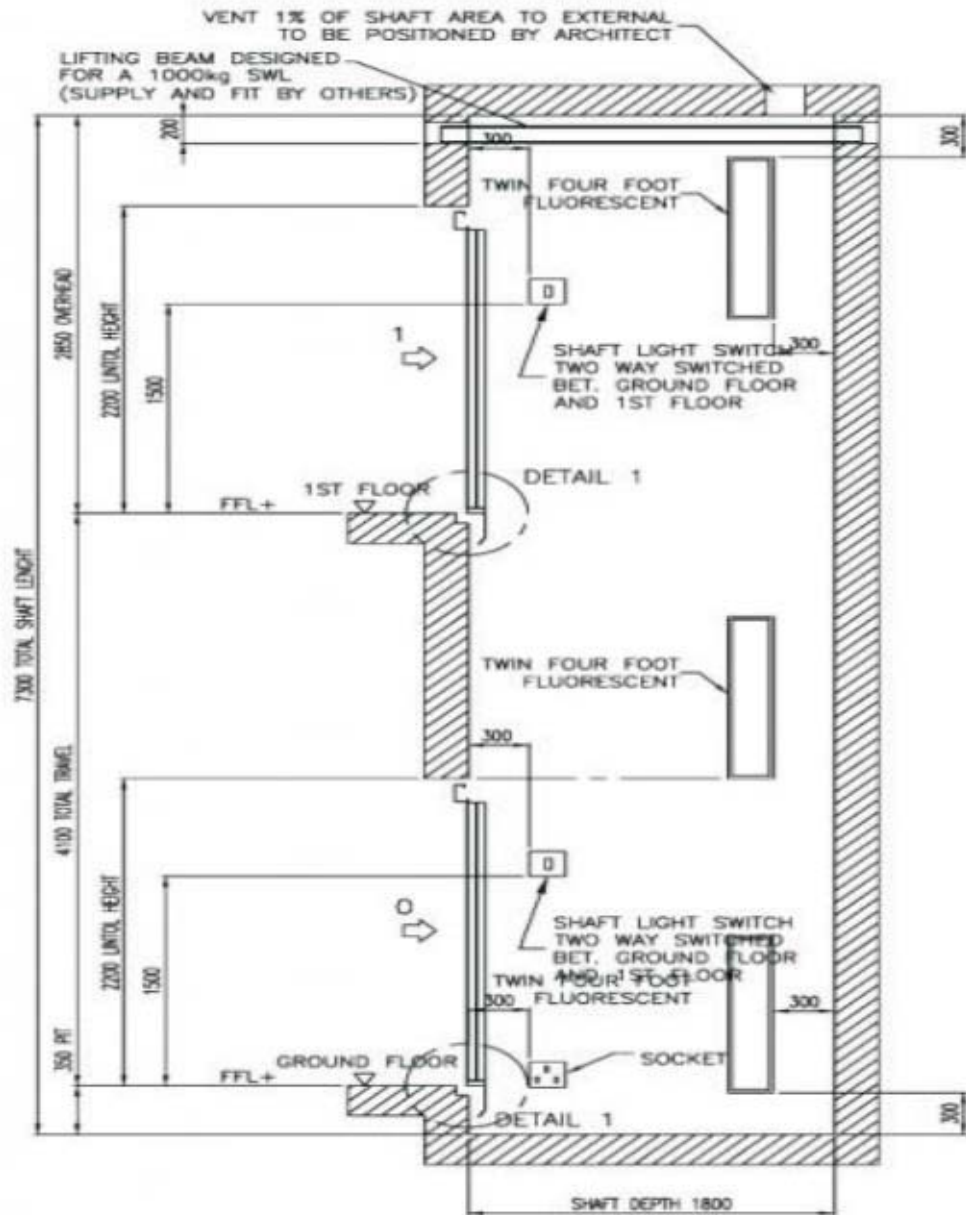

First and foremost, Lambda protects passengers from being struck by the doors.

It is designed to perform efficiently in a dusty environment and is also unaffected by light. Moreover the sensing devices are propositioned in such a way as to avoid not only inadvertent knocks but also international acts of vandalism.

### Reliability

Infra-red technology controlled by intelligent microprocessors provides the key to Lambda's outstanding reliability.

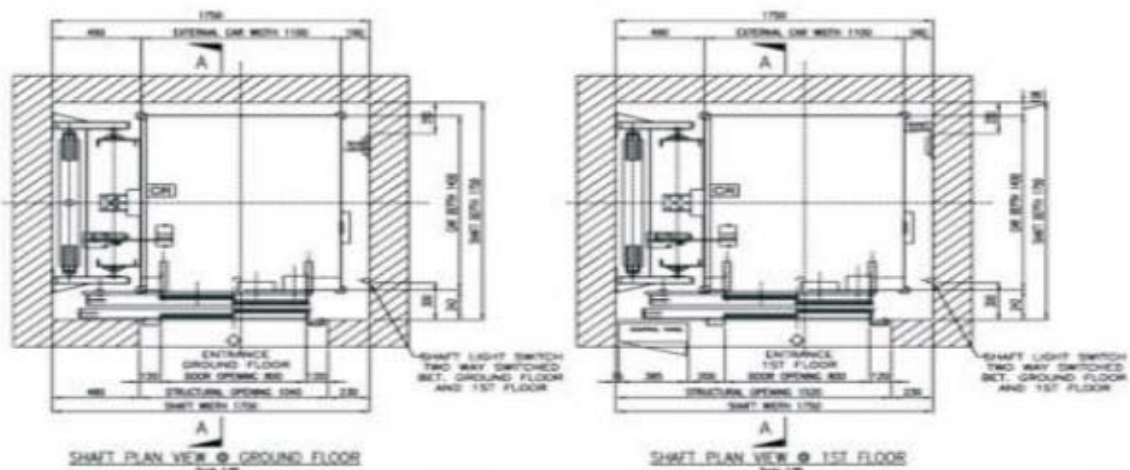

The beams themselves are automatically checked to ensure accurate functioning.

Plan View

We will take every action to ensure our products are safe for you and each passenger. We will be ambassadors of safety. We'll take every action to ensure the safety of our products, our job site, the riding public and our employees.

We will provide the highest quality of service to our customers. There are no exceptions. We'll stand behind what we deliver each and every time

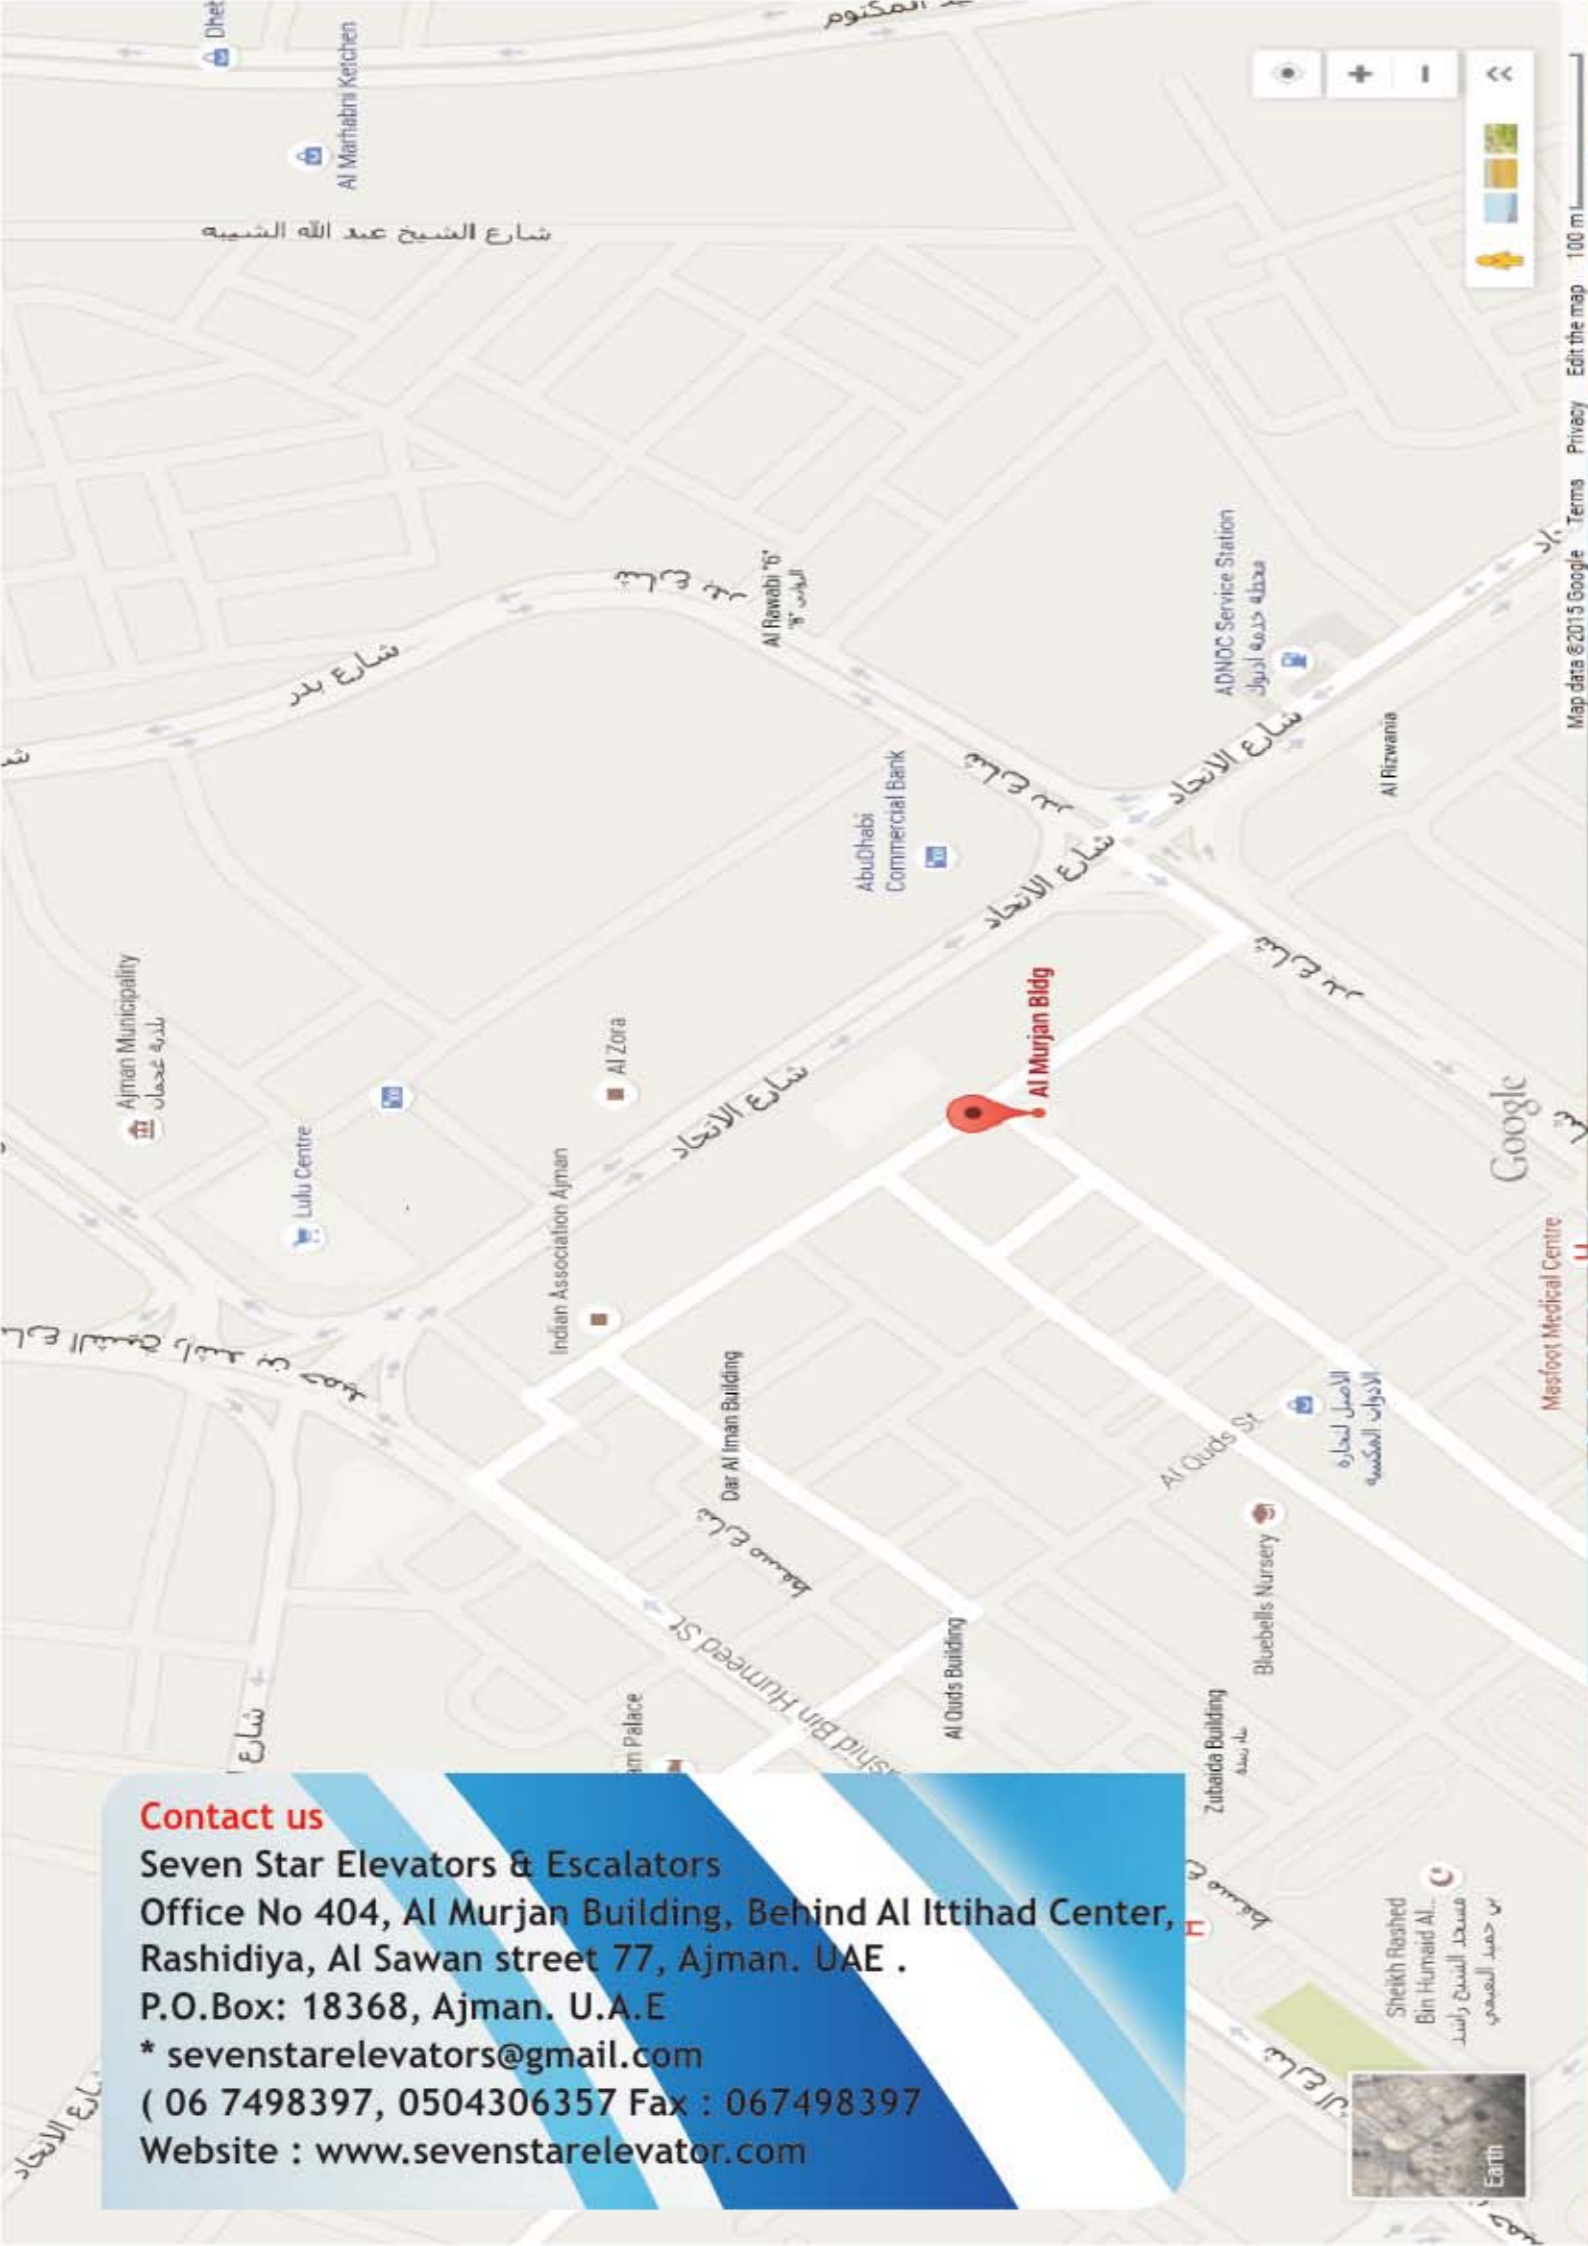

We will take ownership of any issues and address them in a timely manner. We will assume full responsibility for every project. We won't ignore any problems or issues that come up. Instead we'll track and solve them until we've fulfilled the request and satisfied the customer.

We will deliver what we promise, on time, with no exceptions. We will do what we say we're going to do. We won't promise more than we can deliver. If circumstances arise that prevent us from keeping a promise on time, we'll let the customer know immediately. We will act with integrity.

We will anticipate your needs and be proactive in meeting them. We will consider ourselves part of the customer's team. We'll anticipate our customers' needs, whether to solve an unnoticed problem or offer solutions to improve how their equipment works. Every customer interaction will give us an opportunity to think creatively and provide effective solutions. If we don't know how to solve a problem, we'll find out.

We will respond promptly to your requests and keep you updated on our progress. We will reply to every customer phone call or email as soon as possible. We'll provide our service in a safe and timely manner, treating every issue with urgency and communicating our progress to our customers. We will wait for our customers, but our customers will never wait for us.
