

RISE & SHINE Group

Firestop & GRP
Division

About Us

Rise and Shine group has been built with a strong foundation and vision of our founder Mr. Ravi Subramanyam a decade before in UAE, Sharjah. Since its inception, the group has shown its tremendous growth and spread its wings in five countries – UAE, Qatar, Oman, India & KSA, operating with a group of expertise and dedicated talents, which made us a number one player in Passive Fire Protection Industry in all these five countries.

OUR PROJECTS

**PALM GATE WAY
TOWERS - DUBAI**

**MASHREQ BANK
HEADQUARTERS
DUBAI**

**IMPERIAL AVENUE
DUBAI**

**FOUNTAIN VIEW
DUBAI**

**DUBAI CRICKET
STADIUM**

**ABU DHABI
GOLF CLUB**

FIRE STOPPING

A firestopping is a fire protection system made of various components used to seal openings and joints in the fire-resistance rated wall and/or floor assemblies. Firestopping are designed to restore the fire-resistance ratings of the wall and/or floor assemblies by impeding the spread of fire by filling the openings with fire-resistant materials. Unprotected openings in fire separations cancel out the fire-resistance ratings of the fire separations, allowing the spread of fire, usually past the limits of the fire safety plan of a building. Firestopping components include intumescent, cementitious mortars, silicone, firestop pillows, mineral fibers, and rubber compounds. Firestopping should be maintained in accordance with the listing, approval use, and compliance. Construction documentation sometimes includes an inventory of all firestopping in a building, with drawings indicating the location and the certification listings of each firestop. Using this, a building owner can meet the requirements of the fire code related to fire barriers during the period of building occupation .

GRP LINING

GRP lining is a best example of modern technology to protect the substrates from Corrosion & Water Leakage with cost-effectiveness. It gives immense strength to structures to face any sort's of pressure. Also acts as the best method of Insulation to protect Water or any liquids from foreign bodies. GRP products are recommended as an alternative because of its flexibility, durability, lightweight, high intensity, aging & corrosion resistance, dimension stability and provides aesthetic look with smooth surface. We at Rise & Shine deal GRP lining from a comprehensive and more unique range of systems by specializing in hand lay-up applications. Our advanced precision moulding facilities enable us to range from small prototypes to high volume production in a multitude of sizes and to intricate shapes.
