❑ ***Quality Policies***

As MR SAVER WATERPROOFING only provides the best quality and service to their clients, the company has all the best practices, policies and procedures in place to do so.

Waterproofing:

✓ METAL ROOF

Mr Saver provides full roof solutions. Our *MS Roof Waterproofing Latex Modified Bitumen (LMB)* (with **HIGH Elasticity**) can be applied on the entire roof with **Geo-textile Reinforcement Membrane** to form full roof protection from any leakage.

✓ ROOF RESTORATION SYSTEM (OLD-DAMAGED ROOFS)

Mr Saver Roof Restoration System provides the old-damaged roof new strength and extended life span.

✓ DOUBLE LAYERED SUPPORT ROOFING SYSTEM

Double Layered system provides additional support on the existing roof with extensive waterproofing solution.

✓ WET AREAS

Waterproofing of wet areas such as toilets, bathrooms, kitchens and balconies is critical on account of the constant use of water. The points of leakages are weak areas such as wall joints, joints between cisterns and pipes and faulty piping materials that corrode. If the moisture spreads through the floor or walls to the concrete, it can cause extensive damage to the rebars embedded in the concrete. Thus, it is important to have an impermeable barrier over the concrete to prevent the spread of moisture.

We offer a specially designed system for all kinds of wet areas: bathrooms, kitchens or toilets using our MS Waterproofing System.
