VNA Racking System

Customized Solutions

Cantilever Racking System

Cable Racking System

Slotted Angle Shelving System

Mobile Shelving System

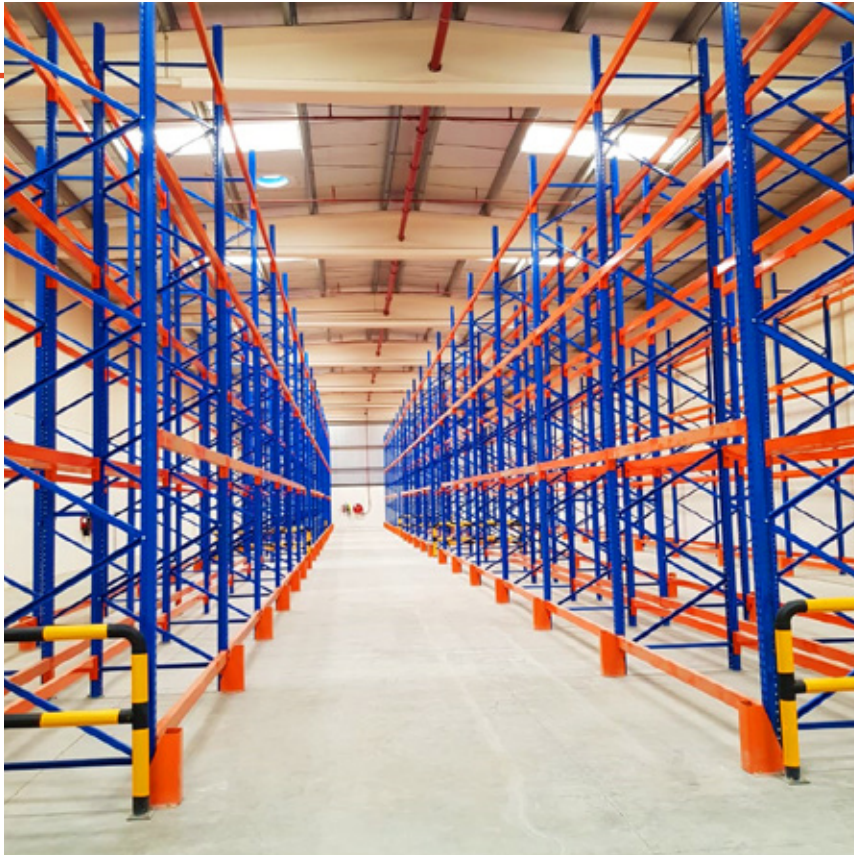

Tyre Racking System

Super Market / Gondola
Shelving System

Small Parts Storage System

Pallets & Accessories

» Selective Pallet Racking System

- Store a wide variety of articles either in pallets or cartoons, decking provisions:- drop over / in panels, wire mesh decking and plywood
- Allows direct access to all stored pallets without moving other pallets.
- Allows storage flexibility in terms of weight and volume.
- Systems are easy to install with simple support arms to hold rails and can be attached to standard pallet rack or special structural designs.
- Pallet racking is a most widely used shelving system. As the most popular and economical racking system, it is safe, convenient and space saving.
- Accessibility for individual items

» Long Span Shelving System

- Fully adjustable good solution for storage of light to medium heavy loads.
- Quick assembly
- Good stability
- Low cost

» Multi Tier Racking System

- Ease of access by balancing the available space and accessibility required
- Optimum storage solution to make most efficient use of available space and maximize the full potential of storage area.
- Designed to ensure the correct balance between storage capacity and operational efficiency.

» Mezzanine Flooring System

- One of the most cost effective methods to dramatically expand available space in your existing premises.
- Extra retail sales area, additional office accommodation, manufacturing, workshop or the need for increased storage space can be solved with the installation of a mezzanine
- Available in terms
 - a) Rack supported mezzanine floors
 - b) Structural mezzanine floor for higher loads

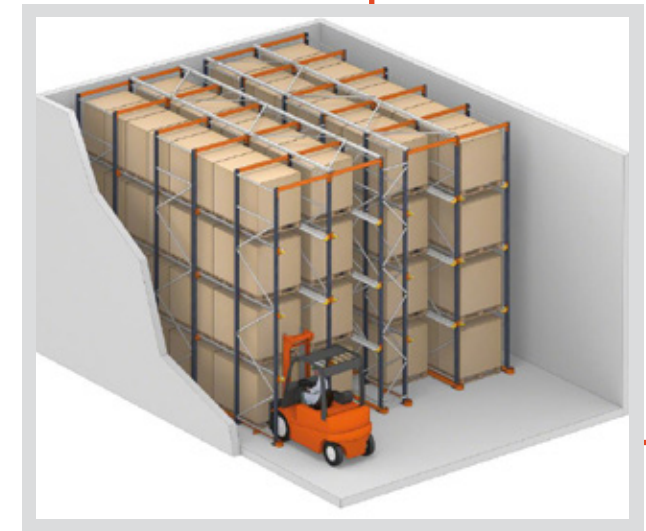

» Bolt Free Shelving System

- Flexible, modular hand loaded shelving system.
- Safe and durable shelving
- Cost effective
- Simple and strong
- Solid shelves can support up to 80kg uniformly distributed loads
- Economy shelving bays come in standard width, height and depth
- Assembles easily and quickly, a shelving system within minutes

» Drive In / Drive Thru Racking System

- Cost-effective solution to high-density storage.
- This static system has rails running the depth of the rack for pallet placement

» VNA Pallet Racking System

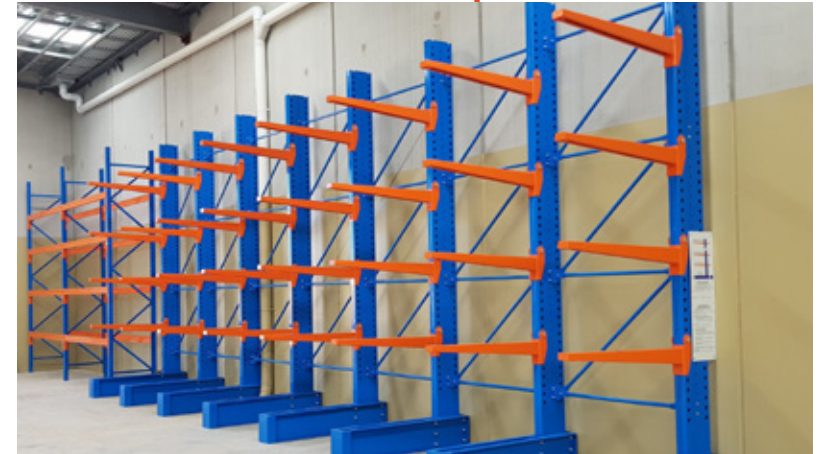

- Very Narrow Aisle (VNA) racking is similar to selective racking but decreases the aisle widths by 50% for greater storage capacity.

- Ideal choice for the optimal use of floor space and anywhere that has a narrow aisle access and high density storage needs.

» Cantilever Racking System

- Ideal solution for long or heavy items such as pipe storage, tubing storage or lumber storage. Furniture rack, carpet rack or lumber rack perfectly stores long products and allows them to be removed without damage due to Excessive maneuvering around vertical or horizontal obstructions
- Columns are pre-punched on both sides for conversion from single-sided to double- sided cantilever layouts.
- Easy assembly, adjustable, easily relocated as product needs change.

» Cable Racking System

- Ideal solution for storing cable reels
- Storing the reels horizontally on racking maximizes the use of storage space and also provides for easy stock identification.
- We design the system to suit customer exact needs

» Slotted Angle Shelving System

- Nut and bolt construction specifically designed for industrial applications where fast, simple erection, versatility, maximum strength and low cost are of prime importance..
- The shelving is assembled into units to form rows of virtually any length, depth and height and is of sufficient strength to support mezzanine floors

» Mobile Shelving System

- The principle of mobile shelving is straightforward and simple. Shelves that move and that do not require several access aisles, with floor space at a premium cost
- Deal applications as office filing systems (think architectural offices, a dentist or doctor's office), archive box or document storage, or even in schools, but they are flexible enough to have their benefits realized in any business, regardless of industry, whether an office setting or a store room.

» Tyre Racking System

» Small Parts Storage, System

No	Product Code	Product Measurements
1	Plastic Bins -2	Size-165 mm L x 102 mm W x 76 mm H
2	Plastic Bins -3	Size -241 mm L X 152 mm W x 127 mm H
3	Plastic Bins -4	Size -356 mm L x 203 mm W x 127 mm H
4	Plastic Bins -5	Size -356 mm L x 203 mm W x 178 mm H
5	Plastic Bins -6	Size -381 mm L x 419 mm W x 178 mm H
6	Plastic Bins -7	Size-508 mm L x 305 mm W x 203 mm H

* Brand: Arcoma

* Country of Origin: Saudi Arabia

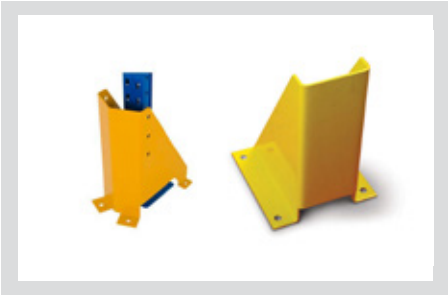

* Available Colors RED & BLUE (Special colors available up on request)
