Al Habara

**ELECTRO-MECANICAL
CONTRACTING COMPANY**

Al Habara Electro Mechanical company specialized in the provision of installation and after-care services for air conditioning and ventilation systems for the commercial, residential and industrial sectors.

Founded in 2006 we have built a reputation for providing a fast, friendly and professional service, delivering systems which are tailored to optimize project quality, cost and programmed objectives.

We operate throughout the United Arab Emirates, servicing projects of annual maintenance contract (AMC), supplying of units and installation of ranging from single unit to major new-build and refurbishment projects.

Our service is underpinned by close working relationships with valuable client, qualified technicians and supply of quality equipment coupled with detailed knowledge of product performance across the wide range of modern available systems.

Activities

- Annual Maintenance Contract (Residential/Commercial/Industrial)
- Installation of entire system/project
- Refurbishment/Addition of Existing system
- Unit and Spare parts Supply
- Providing MEP maintenance service too..

Objectives

- Provide basic coverage for the parts of your air conditioning system that need frequent service.
- Pre-season inspection to ensure peak performance of your system.
- Four periodical preventive maintenance (PPM) in each quarter AMC period.
- Trouble attending on registered calls.
- Periodical Management evaluation and monitoring and feedback analysis.
- Maintain quality service indicators throughout service period.
- Guaranteed genuine spare parts and consumables usage.
- Management direct supervision in all major work.
- Detailed service reports and recommendations on completion of inspections.

Clientele: _____

PIONEER CEMENT FACTORIES LLC

General Recommendation:

A Planned Preventive Maintenance (PPM) program will safeguard and improve the performance of the air-conditioning equipment. It will not only save energy and saving your money, it will also increase efficiency of the units. It will enhance life of the unit substantially.

An air conditioner system that is regularly maintained will run better and last longer. A poorly maintained air conditioner will be inefficient, use more energy and be prone to breakdown more often. It could also be dirty and unhealthy.

Regular maintenance gives you the confidence of knowing that your air conditioner system can be relied upon and that it will work at its optimum capacity at those times when you need it most.

The usage of genuine spare-parts and consumables has to be as a policy, will enhance the performance of the unit, and life longer forever.
