Information and Communication Technology

The constantly growing number of color shades, special color tones and variations make it more and more difficult to find the right shade using conventional methods.

The task is made considerably easier with the help of computer-aided color matching systems and the appropriate software. Our aim is to optimize your processes through the use of modern information and communication systems.

Color Tools

Efficiency in finding the correct color for every repair is a core attribute. Our range of color tools, provide refinishers with efficient equipment to get the desired results quickly and with outstanding accuracy.
