MISSION

Our purpose is to positively impact lifestyles of the communities we serve through consistent, timely, quality, efficient and value added delivery of engineered, innovative and tailor-made technology solutions that constantly exceed expectations.

VISION

Our aspiration is to become a sustainably growing and profitable MEP & Low Current Engineering & Contracting service provider through building effective and efficient operations in UAE and to consolidate Forza Al Khaleej Electromechanical Works as a recognized quality centric brand in all our fields of activities.

CORE VALUES

Integrity: We trust and can be trusted.

Quality: We always strive for the best.

Human Capital: We believe in our team.

Innovation: We will always find a way.

Sustainability: We respect our environment and community.

WE EXPERTISE

LV Electrical System Design & Consultation

LV electrical installation, testing & Commissioning

Electrical authority approvals

Third party testing & Commissioning

All Services from Shop drawing approvals till Power Release

Liaison work with Etisalat

Permanent & Temporary Electrical & water connection from authority.

Liaison work with ADDC (Electricity and Water)

“We bring buildings to life”

Imagine yourself in the most fabulous building in the world without lighting, heating, ventilation, plumbing. Then, you are left in a hot, dark, uninhabitable shell. Strategic MEP team really brings buildings to life.

We consult with developers/architects to ensure full understanding of the requirements and strive the demands of the people using it. In doing so, we ensure that a building can breath and its occupants can relax in an environmentally sustainable, safe, and comfortable zone. ***Our company promotes the installation and operation of safe electricity wiring systems in premises and are based on the general principles defined in British Standard BS 7671 / IEC60364.*** We work on all types of buildings from single domestic dwellings to large facilities. Each building offers a different challenge which is met by our experienced, qualified and friendly team of engineers.

WHAT WE DO?

ELECTRICAL

Electrical systems are generally associated with the lighting and power to a building. We offer electrical systems, providing you with the complete package of Quality. **From Design - Installation - T&C - Maintenance.** Our services are carried out by qualified electricians and ensuring that your company meets all electrical health and safety regulations in compliance with local authority. We are mainly offering Supply and installation of following services.

DESIGN, SUPPLY AND INSTALLATION OF
SWITCHGEAR,
CONTROL CENTRES, SPECIALISED PANELS
POWER DISTRIBUTION SYSTEM
LIGHTING & LIGHTING CONTROL SYSTEM
LIGHTNING PROTECTION & EARTHING
BUILDING MANAGEMENT SYSTEM
HOME AUTOMATION SYSTEM
ACCESS CONTROL CCTV, MATV & SMATV
STRUCTURED CABLING SYSTEM
COMMUNICATION & P.A SYSTEM AUDIO VIDEO,
INTERCOM SYSTEM
ELECTRICAL CAR CHARGING SYSTEM
SOLAR PANELS (PVS SYSTEM)

MECHANICAL

Mechanical systems most commonly relate to heating, ventilation and air conditioning systems (HVAC). HVAC's goal is to provide thermal comfort and acceptable indoor air quality. HVAC is an important part of residential structures such as single family homes, apartment buildings, hotels and senior living facilities, medium to large industrial and office buildings such as skyscrapers and hospitals, where safe and healthy building conditions are regulated with respect to temperature and humidity, using fresh air from outdoors.

Ventilation system replaces air in any space to provide high indoor air quality which involves temperature control, oxygen replenishment, and removal of moisture, odour, smoke, heat, dust, airborne bacteria, carbon dioxide, and other gases. Ventilation removes unpleasant smells and excessive moisture, introduces outside air, keeps interior building air circulating, and prevents stagnation of the interior air.

DESIGN, SUPPLY AND INSTALLATION OF
AIR CONDITIONING & VENTILATION
CHILLERS, AHUS AND FCUS
SPLIT SYSTEM & PACKAGE UNITS
HEAT RECOVERY UNITS
AIR FILTRATION & TREATMENT HUMIDITY CONTROL
DUCTING - GI, STAINLESS STEEL, ALUMINIUM,
STEEL & PRE INSULATED REFRIGERATION
COLD STORES
PLANT MANAGEMENT SYSTEMS

WE BELIEVE

■ **TIMELY COMMITMENT**

Our highly qualified and technically competent managers, engineers and technicians, allow us to complete multiple ongoing projects within the committed timeline.

■ **QUALITY ORIENTED WORK**

We have experienced persons employed with us who has been taken onboard to point out our shortcoming of any projects. This enables us to deliver high Quality work with best Service.

PLUMBING

Plumbing typically involving pipes, valves, plumbing fixtures, tanks and other apparatus. Plumbing engineering is typically carried out in the forms of a domestic water services and above ground drainage. All of which require careful consideration to ensure relevant regulations are met and water demand / disposal is achieved. Our team of qualified Engineers bring together enormous Electromechanical Engineering knowledge and experience that enable us to offer a full-scale MEP Engineering solutions portfolio.

DESIGN, SUPPLY AND INSTALLATION OF
SANITARY WARE INSTALLATIONS
COLD & HOT WATER PIPING
PRESSURISED WATER
DISTRIBUTION SYSTEMS
WATER TREATMENT PLANTS
WATER STORAGE TANKS
SEWAGE TREATMENT PLANTS
DRAINAGE & RAIN WATER PIPING
WATER COOLING SYSTEMS
PUMPS & PUMPING STATION
CENTRAL & SOLAR WATER HEATER SYSTEMS

No matter how complex a project may be, we undertake its full design and execution from concept to construction, testing & commissioning, handover, and maintenance.

LAND SURVEY SERVICES

PROVIDING FOLLOWING SERVICES

LAND SURVEYING & LEVELING
ALL TYPE OF TOPOGRAPHIC SURVEYS
CORRIDOR ALIGNMENTS (HORIZONTAL & VERTICAL) AND
PROFILE
CADASTRAL SURVEYS
DEMARICATION SERVICES

HIRING OF SURVEY CREWS
AERIAL CONTROL MAPPING
LASER / 3D SCANNING

INTERIOR FIT OUT WORKS

SHOP DRAWINGS FOR INTERIOR FIT OUT WORKS
FALSE CEILING WORKS (GYPSUM, ALUMINUM, WOODEN, GRC, ACOUSTIC, ETC.)
PARTITION WORKS (GYPSUM, WOODEN, SOUNDPROOF, GLASS, ETC.)
CARPENTRY WORKS (DOORS, SHELF'S, COUNTERS, ETC.)
PAINTING WORKS (INTERIOR WALLS & CEILING)
PLUMBING AND ELECTRICAL WORKS
AC AND DUCTING WORK
WALLPAPER AND CLADDING WORK
CIVIL WORK BRICK, PLASTERING AND TILES

Engineers over 15 years' experience in Middle East

Quality and safe installation

Economical and budget friendly

ADDC approval services

Electromechanical drawing services

QUALIFIED ENGINEERING TEAMS

Our Engineering Management team brings together enormous managerial experience obtained through projects executed in the entire united arab emirates

Our qualified and experienced Engineering team, comprising of Electrical and Mechanical Engineers, is well versed in applying relevant standards ensuring that the end result surpasses client's expectations, both in terms of quality and performance.

Our Engineers are continuously trained and attend seminars and specialized courses to stay abreast of the most recent codes and standards and technological developments in our field.

MEP we are implementing Benchmarking Performance Assessment, by applying best industry practices, to continuously improve our organizational processes and achieve superior Performance and Quality levels.

Our combined MEP Engineering knowledge and experience render Forza Alkhlaeej as a qualified specialist firm in the sector guaranteeing the delivery of the most suitable and economical solutions to our client.

STRENGTHS

FORZA AL KHALEEJ's continued success and value-added design contributions to all of its projects have won it numerous repeat businesses and an ever-expanding number of satisfied clients.

QUALITY SERVICES

FORZA'S continued success can be attributed to the high standards it sets for itself with regards quality of work and performance. FORZA has instilled values in its employees and created a culture where quality takes dominance over every other activity. As a result, FORZA is highly recognized as providing its clients with maintenance free projects and delivering high quality projects before the set deadlines. This has led to satisfied customers who choose FORZA as their preferred partners in the electro-mechanical sector.

FORZA practices "Quality in Construction" methods that ensure all its work is done right, complete and free of defects, the first time. This in-house program is its way of making sure that projects go beyond being just "good enough" and exceed the expectations of its customers. This is achieved by holding pre-installation meetings and conducting inspections during the critical path of projects including: first delivery of materials, first equipment installations, mock-ups, benchmarks for each new type of work, and closure of utility systems.

"Quality" is FORZA's single-minded pursuit in the application of new technologies. The FORZA project team has joint construction and design backgrounds which include significant time in project inspections and quality control. The project management team meticulously prepares project specific plans and schedules. Detailed method of statements and integrating and sequencing of all activities from order to hand-over along with continuous progress monitoring, ensures an effective and productive management system.

Practicing standards include IEE, BSI, ASHRAE, ASME, ASTM, SMACNA, DW -144, ARI, NFPA, API, LPGA, DIN, UL etc.

RISK MANAGEMENT

Control is key to any FORZA project. From the initial project meeting and continuing through the life of the project costs, schedule, quality and safety are monitored and managed.

Costs are controlled through planning, tender, accounts and the MIS departments reporting procedures for budget compliance. Detailed monthly profit and loss statements and labor rate analysis reports are generated to ensure that costs are within budget giving us enhanced financial control of the project. This also serves as an end benefit for the clients since FORZA's control on costs leads to competitive pricing of projects. Time schedule is consistently monitored and updated to ensure compliance and to seek ways to save additional project time. Likewise, the design is monitored to prevent construction delays due to sequencing of operations or equipment / material availability under prevailing market conditions.

STRENGTHS

FINANCE MANAGEMENT

FORZA AL KHALEEDJ, maintains an excellent relationship with all its partners, which includes its bankers, suppliers, sub-contractors and various other supporting businesses. No project has ever been delayed due to financial issues caused by unforeseen circumstances, delays of payments or variation of works. With the existing bank facilities and the available resources, FORZA is capable of executing projects worth at least Dhs. 5 million.

Bank facilities are monitored and renewed periodically due to the enviable performance track record and its ability to deliver more than it promises. Finance and accounting activities are centralized at the corporate office which provides complete control over every project activity. The activities are closely monitored to ensure a strong liquidity position. FORZA also has its own debts recovery department which takes care of any outstanding payments and thus helps improve cash flow of its companies.

Complete project feasibility reports as well as fund management reports for each of the projects are prepared in advance of the actual execution of any project. With these reports, the viability of the project is analyzed and corrective actions are taken for smooth running of projects. Bank facilities are arranged well in advance of the actual starting of any project which allows for uninterrupted execution of projects without any delays. The resources committed to the projects are not reallocated to other projects at any time during project execution.

Due to its financial strength and excellence in quality, FORZA AL KHALEEDJ has maintained its position in the industry as one of the most trust worthy businesses in the country for over past Years.

HEALTH AND SAFETY

Safety has always been FORZA's top priority. FORZA believes that every accident is preventable and this philosophy has been embedded in every FORZA project through a combination of technical field procedures, safety gear and ongoing training programs. Safety efforts are based on the belief that every individual is entitled to a safe place to work.

FORZA has established an award-winning Accident Prevention Program that includes formal safety training, inspections, audits and a formalized system of reporting. We recognize that accident prevention is a line management responsibility. That responsibility is shared at every level of our organization, from the Chairman all the way through to the work force. FORZA trains its managers, supervisors and employees to identify and correct unsafe conditions and more importantly unsafe work practices.

FORZA's commitment to zero accidents extends to every aspect of a project from planning to completion and from the board room to the field crew. For clients, the most tangible benefit of FORZA's safety efforts is better performance on the project and a clear reduction of unanticipated costs. FORZA also requests that its subcontractors and partners to adopt its commitment to health and safety. The result is exceptional safety performance.

STRENGTHS

PROJECT MANAGEMENT

FORZA is reputed for providing high quality work on time and within budget and this is possible due to our in-house capabilities and project management skills which have developed over the years. Our planning department commences its involvement with projects early at the pre-qualification stage. It is proactive in developing diverse solutions to assemble and compile a competent technical submittal tailored to suit each particular job. FORZA fosters engineering knowledge by training employees and adding value at every step of the project.

The project management team provides the entire range of services such as initial project planning (tasks, resources, and schedule), task oversight, tracking, and reporting and change management. Construction and target programs are prepared using Primavera and each program contains a well-defined critical path, starting and finishing milestones, man power planning for each activity, equipment planning for each activity, S-Curves, material schedules and delivery schedules for long lead items.

To ensure successful completion of projects within budget, MIS reports are generated on a continuous basis and crash programs are created in the case of delays due to constraints or unforeseen circumstances. MIS meetings, weekly and monthly meetings are held which results in proactive decisions being made at every step in order to manage unexpected challenges and immediate actions are taken on issues of concern.

Even after the project is complete and handed-over. FORZA conducts a quality evaluation of its work over the years after completion by sending its team of engineers to check the condition of projects. The feedback collected from these visits is evaluated and corrective actions are taken accordingly. FORZA has a team of QA/QC engineers employed on every site to ensure that electro-mechanical works are carried-out as per the company's quality policies and methodologies.

QUALITY & HSE

QUALITY MANAGEMENT SYSTEM

Forza Al Khaleej's Quality Management System has been established by the use of the Company's management instructions produced to comply with ISO 9001:2015, ISO 14001:2015 & ISO 45001:2018 QMS requirements which cover all aspects of the company's activities.

Forza Al Khaleej Electromechanical Sole Proprietorship LLC has developed a Management System best suited for the effective control of all aspects of construction work. All departments within the company operate in accordance with these management instructions in the form of system procedures. These procedures are followed by the personnel in the execution of their duties and provide a framework designed to assist the staff in achieving specified standards.

These management instructions will provide documentary assurance and certification for specific agreed activities and test results. The extent to which documentation is necessary will depend upon the nature of activities. All matters will be carefully reviewed with the management team and defined in the "Project Quality Plan" which is the principal management instruction to be activated for all projects.

The Project Quality Plan has been developed to suit the requirements of the project and is a working document which will be maintained by the Project Team. Its principal functions are as follows:

1. To define the nature and scope of the contract work wherein the document will be updated as the pre- construction phase develops.
2. To set out administrative procedures, management structure and reporting documentation control.
3. To identify which company's management instructions will be operated on the project and allocate specific responsibilities to staff for their implementation.
4. To define and detail the degree and extent of inspection and testing which shall be required and the documents necessary to undertake these operations.

The plan will be subject to regular reviews by the Quality Control department to check that the procedures are working and are being adhered to. There is a specific review sheet which will identify any amendments made to the project quality plan.

In addition to the reviews there will be internal audits carried out by the company's internal auditor's team supervised by Quality Manager and annual external audits by certification body.

As part of Forza Al Khaleej Electromechanical Sole Proprietorship LLC Quality Management Procedure all suppliers sub-contractors are vetted for competence, financial stability and

QUALITY & HSE

previous performance. In addition, any supplier/sub-contractor with a design responsibility is assessed for their design competence and resources. This assessment covers safety procedures, training, knowledge, communication procedures, experience and resources and includes general capabilities and job specific abilities

HEALTH, SAFETY & ENVIRONMENTAL MANAGEMENT SYSTEM

Forza Al Khaleej Electromechanical Sole Proprietorship LLC firmly believes that no part of its business objectives can be carried out effectively and successfully if not performed safely while conserving the environment. The prevention of accidents and incidents, either relating to personal injury and/or loss of company assets is recognized as being essential to the safe and efficient operation of the company. To this effect, it is essential that an HSE plan be designed to suit the working conditions of the project.

The HSE manual shall form the basis of the Project HSE Plan and covers the HSE philosophy of the company, client's requirements and applicable regulatory requirements. It shall further cover the safe methods and systems of work to be adopted within the project in accordance with the provisions of contract and government regulations.

The HSE Policy Manual has been compiled mainly from the following source material:

- Abu Dhabi EHSMS Guidelines & Code Of Practices
- OHSAS 18001:2007 Requirements
- ISO 14001:2004 EMS Requirements
- UAE Federal Law 8, Chapter V, Article 91 of 1978.
- UAE Ministerial Order 32.
- Health and Safety at Work Act 1974.
- The Management of Health and Safety at Work Regulations 1992.
- The Work Place (Health, Safety and Welfare) Regulations 1992.
- The Provision and Use of Work Equipment Regulations 1998.
- The Manual Handling Operations Regulations 1992.
- Health and Safety Executive Guidance Notes.

This HSE plan shall provide a framework in which to ensure the safety of people, equipment, materials and to protect the environment. It is considered the minimum standard necessary to achieve this goal and will specify any major or unusual risks and the associated precautions required against those risks, established for HSE compliance.

QUALITY & HSE

A detailed pre-tender HSE plan will be drawn up by the HSE department in association with the client, consultant and main contractor. The plan will identify and assess any principle design hazards, and the Project Manager will be responsible for the implementation of the HSE Plan within his area of responsibility.

Any person who considers additional safety procedures necessary or has an improved system of work, will forward his suggestions through the Project Manager and Operation Manager, to the HSE Manager for review and inclusion in the project safety plan.

The primary and continuing concern of the Health and Safety Policy of the company is that in the conduct and action of its activities, it will act reasonably and positively to protect the health and safety of its personnel and others who may be affected by these activities including the protection of environment and conservation of natural resources.

THE HSE PLAN SHALL INCLUDE

- Description of Works
- Principal Parties
- Organizational Flow Chart
- General Statement of Intent from Managing Partners
- HSE Organization
- Specific Arrangements
- General Arrangements

The HSE department takes the lead in organizing HSE on the project and shall be responsible for directing the HSE program in such a manner to ensure that all potential accidents which may cause injuries, damage or loss are prevented.

Forza Al Khaleej HSE policy shall be posted in public notice board and implemented at all levels on all the projects.

The Project Manager shall co-ordinate the HSE policy with the client, main contractor, company management and the designated Site Safety Officer, to ensure compliance with established standards and procedures on the project.

All safety matters will be monitored by HSE department. HSE manager shall liaise closely with the Project Management Team and provide advice on incident prevention methods to be adopted at site. Any deficiencies in the performance of the work, or established standards, shall be reported by the designated Safety Officer to the site Project Manager for the necessary corrective action.

QUALITY & HSE

Regular meetings shall be held on site to discuss typical and relevant HSE matters and will provide a forum for the distribution of safety information related to the prevention of accidents, which will be distributed to each project to increase HSE awareness by the management and employees. Participants in the meeting shall include but not limited to the Project Manager, Safety Officer, Site Engineers, members of the supervisory team on site, consultants, clients representative and sub-contractor representatives.

The company's HSE system is developed based upon OHSAS 18001, ISO 14001 & Abu Dhabi EHSMS requirements. The system is certified by reputed certification agency and is audited as a mandatory requirements.
