# ABOUT US

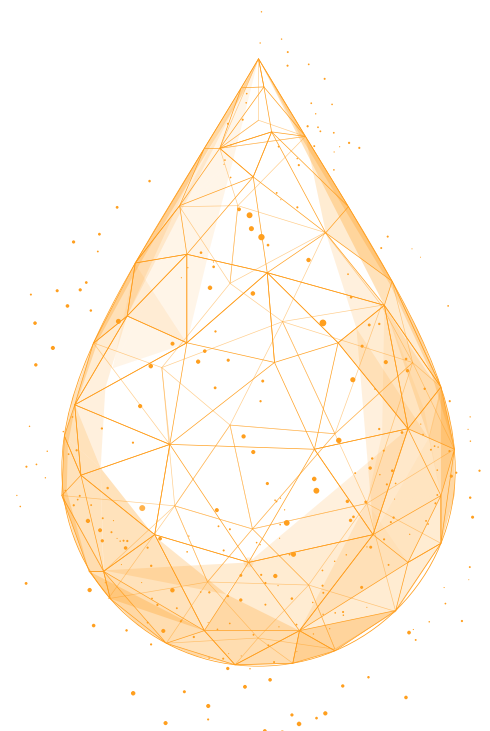

For more than 12 years, Alphine Oil has consistently proven itself to be a dependable supplier of top-quality Petrochemical products. Our network of fully integrated companies operates across the energy supply chain, helping to meet the needs of an ever-changing energy market responsibly. Our focus is heavily oriented towards building large-scale offshore international trading and collaborating with renowned global companies. Over the years, we've established ourselves as a modern, technically sophisticated, and experienced supplier of Petrochemical and Petroleum products to clients across the Middle East, Southeast Asia, Africa, and beyond.

Our company is headed by an experienced board of directors, leading a skilled group of individuals committed to providing profitable and sustainable growth to the company and exceptional service to the clients. They have extensive knowledge and expertise to drive our company towards new objectives in the short and long term. We're proud of our human resources, who have demonstrated excellent dedication, skill, and initiative to propel the group to higher achievements.

Alphine Oil's success is driven by its long-standing relationships with its shareholders, suppliers, and customers – those we've always nurtured. With our state-of-the-art processes and customer-centric work culture, Alphine Oil holds an excellent reputation. Our knowledge and expertise in overcoming regulatory, market, and supply chain hurdles are unrivaled. Most importantly, we believe that investment in innovation and people will continue to power our growth in the years to come.

Today, we are one of the leading providers of downstream petroleum products such as Crude Oil, Bitumen, Fuel Oil, Base Oil, Diesel, Naphtha, RPO, Grease, and Lubricants. Our experience in trading petroleum products in the region over the last several years has helped us understand the requirements and preferences of our customers. We value our commitment to providing the best service to our clients.

We wish all the stakeholders, local governments, financial institutions, suppliers, and, most notably, millions of our loyal customers, peace and prosperity in the years to come.

# WHY CHOOSE US

Our Motto “Fueling the Future” rightly captures the ever-growing spirit of Alphine Oil.

Our vision of being the most trusted manufacturer of petrochemical products has helped us achieve leadership in the region. We have evolved over the years to establish our market presence worldwide. The petrochemical and petroleum trading division of Alphine Oil started in 2011 to leverage its well-established distribution network and since then we have seen immense growth. Today, we are one of the leading providers of downstream petroleum products such as Crude Oil, Bitumen, Fuel Oil, Base Oil, Diesel, Naphtha, RPO, Grease and Lubricant. We make sure our products touch people’s lives across social and economic spectrums.

## WORLD CLASS QUALITY

Our efforts in trading petroleum products in the region are channeled towards providing quality products and services; earning the respect and goodwill of scores of customers.

## COMMITMENT

We are pledged to conduct business with extraordinary zeal and commitment. This has already yielded long term loyalty and admiration from our current list of esteemed clients.

## INTEGRITY

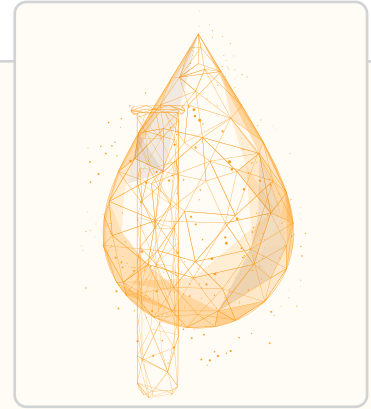

Our industry presence and business endeavors are ethical, socially responsible and environmentally sustainable. Integrity is synonymous with all our aspirations for quantifiable and viable outcomes.

# PRODUCTS

## BASE OIL

Base oils are used to manufacture products including lubricating greases, motor oil and metal processing fluids. Base oil is typically defined as oil with a boiling point range between 550 and 1050 F, consisting of hydrocarbons with 18 to 40 carbon atoms. This oil can be either paraffinic or naphthenic in nature depending on the chemical structure of the molecules.

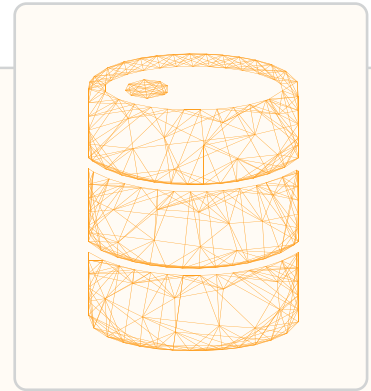

Base oils are the building blocks used to manufacture motor oils and other lubricants like grease, lube oils. etc.

## BITUMEN

Bitumen is a sticky, black and highly viscous liquid or semi-solid form of petroleum. It may be found in natural deposits or may be a refined product.

Bitumen is used in Road Construction & maintenance, Quarrying, Water proofing, Line making and pavement coating.

## FUEL OIL

Fuel oil is used commonly for burning in furnaces, boilers, stoves and lanterns to generate heat. It comprises of long hydrocarbon chains, such as alkanes, aromatics and cycloalkanes. Fuel oil has many different names but the most commonly used terms are: Diesel fuel.

## GAS OIL

Gas Oil in general is any liquid fuel used in diesel engines, whose fuel ignition takes place, without spark, as a result of compression of the inlet air mixture and then injection of fuel.

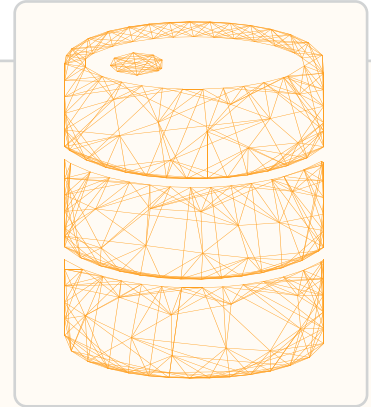

Diesel fuel is widely used in most types of transportation. Also used in Generators, Agriculture motors, etc.

# GREASE

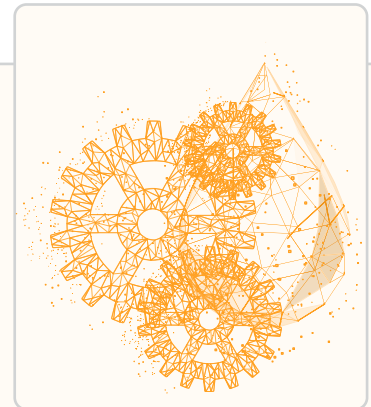

Grease is a semisolid lubricant. It generally consists of a soap emulsified with mineral or vegetable oil. The characteristic feature of greases is that they possess a high initial viscosity, which upon the application of shear, drops to give the effect of an oil-lubricated bearing of approximately the same viscosity as the base oil used in the grease.

Grease is used as a friction removing lubricant in all motor engines.

# HYDROCARBON OIL

Mixed Hydro carbon oil is a petroleum based product, having density of 0.79-0.82. It is a low density low viscosity product which is used as a raw material. It is a mixer of various Oils which contains lighter fraction and heavier oil. It is very useful for distillation and we can get various products from it.

# NAPHTHA

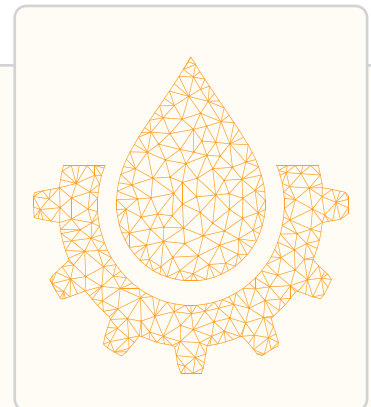

Petroleum Naptha is a general term that refers to flammable liquid hydrocarbon mixtures. It is produced from natural gas condensates, petroleum distillates, and the distillation of coal tar and peat.

It is used in the production of industrial solvents, gasoline, thinners, oil painting medium, and as an ingredient in shoe polish.

# RUBBER PROCESS OIL

Rubber process oil is an oil composition which has a kinematic viscosity at 100 °C from 25 to 50 CST and which contains less than 3%. Polynuclear aromatic compounds are employed as a process oil for rubber compounds, especially aromatic rubbers. Rubber process oil is used throughout a mix of rubber compounds.

# MISSION & VISION

For the past 12 years, Alphine Oil's story has always been about innovation. We deliver consistently with precision, pace, and passion, keeping quality, safety, and sustainability at the forefront. Today, we're a recognized force operating in the entire UAE and Asia, offering top-quality Petrochemical products and services. Since the beginning, Alphine Oil has been committed to growing clients' businesses and adapting advanced solutions to meet their needs. Scores of companies in the region count on Alphine Oil owing to our well-established logistics and supply network. We proactively recognize business opportunities and implement the best practices to deliver top notch products and services to our customers ensuring their satisfaction.

## VISION

To be the leading manufacturer and trader of Petroleum products, recognized for our quality, commitment, and reliability.

## MISSION

We seek to display integrity and innovation in everything we do, whilst striving for mutual growth and progress.

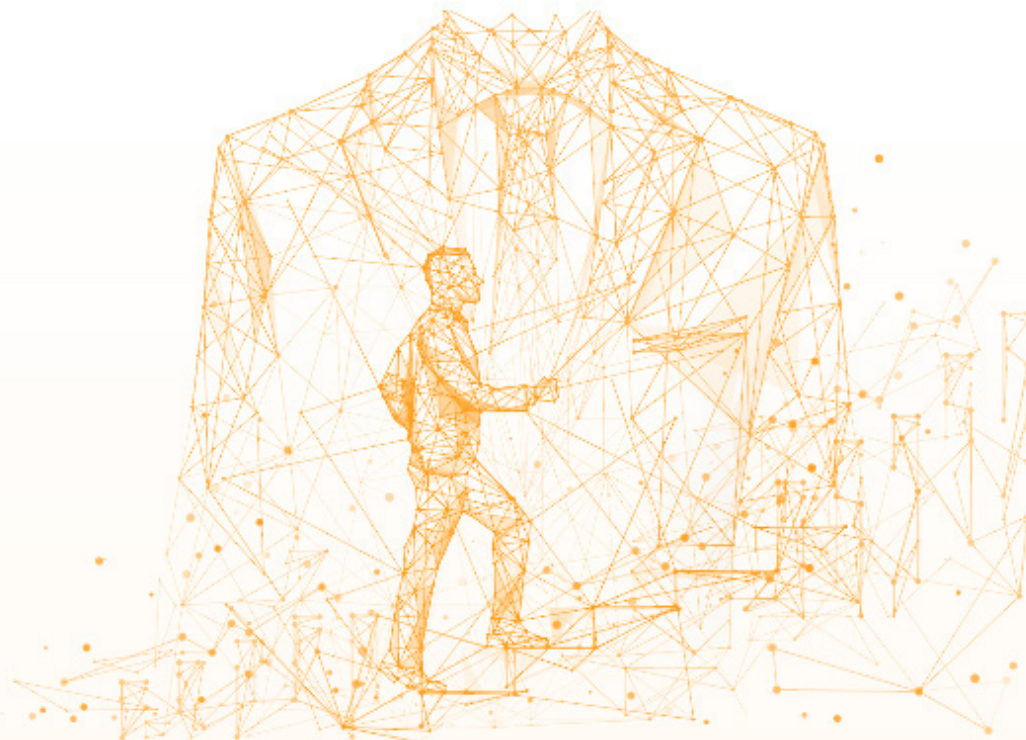

## VALUES

We think big, insist on the highest standards, operate with integrity and believe in building trust with utmost transparency.

# START YOUR CAREER WITH ALPHINE OIL

Have you ever dreamt of working in one of the leading Petrochemical companies in Asia with unlimited opportunities? Do you have the skills and passion to take your career to the next level? Alphine Oil is always looking for highly talented individuals with the potential and determination to succeed.

We're a performance-driven organization powered by our exceptional workforce. Investing in our company's human capital will make sure that Alphine Oil continues to contribute to the UAE's social and economic development for decades to come. We share ideas, overcome complicated challenges, and bring innovation to future-proof our business.

## LIVE AND WORK IN A WORLD-CLASS ENVIRONMENT

The United Arab Emirates attracts top talent from across the globe. You'll not only get to join a global network of passionate people who deliver top-notch customer service but also state-of-the-art facilities.

Personal growth, mentoring, and teamwork are just a few benefits of building a career at Alphine Oil.
