BASMAT AL TAMYZ METAL
PRODUCTS COATING LLC

Profile...

Specialist in all Kind of
Metal Coating

Welcome to Basmat Metal Coating Company!

We Specialize in Electro Plating and Decorative Metal Finishing Services.

With Over 5 Years' Experience in All Phases of Electroplating and Metal Finishing Services,

BASMAT Metal Coating Company specializes in metal plating, finishing, and polishing. Commercial projects are normally large and time sensitive. Our level of professionalism and understanding makes us the best choice. We provide gold, silver, brass, copper, both electro less and nickel plating.

BASMAT is committed to continual improvement in their plant and process towards higher safety and better working environment for the customers, employees and society at large.

At BASMAT, we view the maintenance and enhancement of quality as our most important responsibility. A well-equipped quality control lab at our Basmat works puts all its experience, knowledge, expertise and analytical resources to meet our stringent specifications for incoming raw materials and outgoing finished products, ensuring that no product leaves the factory until the exactly defined quality norms are fulfilled.

Our research chemists and technical experts work ceaselessly to develop products which increase yield and productivity thus giving the customers more value for their money. The team is well equipped to work on new products based on customer needs and to provide highest performing customized solutions.

We offer competitive quotes to ensure **BASMAT Metal Coating Company** is your company's first and best choice.

Products & Services

- [Architectural](#) Stainless Steel Works & finish
 - [Staircases, Balconies, Balustrades & Handrails](#)
 - [Signage, Railings, Gates, Canopies & Street Furniture](#)
 - Decorative Wall Cladding and Column Cladding
 - [Stainless Steel Electroplating](#)
 - [Doors, Glazed Screens & Cladding](#)
 - [Specialized in Stainless Steel Metal Finishes](#)
 - Metal Furnishing and decors

LOOSE FURNITURES (CUSTOMIZED)

Our Mission

Our mission is to offer our customers a diversity of vacuum metalized and industrial coatings to satisfy any decorative or functional finishing needs. By developing innovative coatings through research and development and continual improvement of our process, we will meet the ever-changing needs of our customers.

Our objectives include:

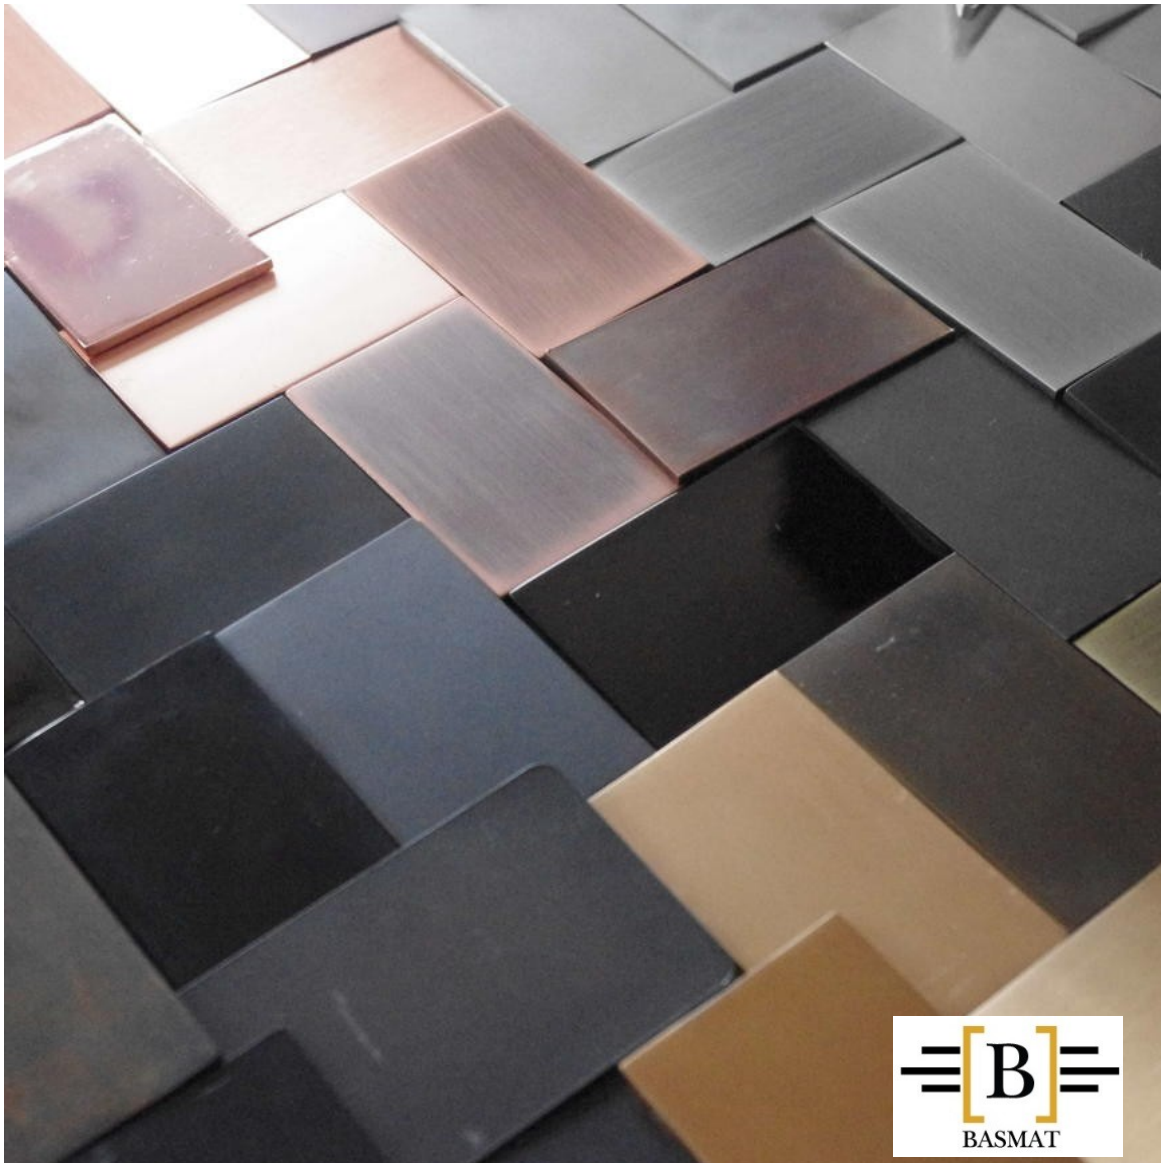

100% on-time delivery

Regular monitoring of Customer Satisfaction

Maintaining an average fallout rate of 2% or less

Evaluate and make continual improvements to our process

Maintaining our goals to ensure continuous improvement in limiting our impact on the environment

plating process at BASMAT Metal Coating

At Basmat Metal Coating Company, we do our best to make the plating process appear as simple as possible. In actuality there is a lot of work that goes into each item that we plate. Unexpected complications make the task of plating even more time consuming.

One of the first things we do for a new project is disassemble it as best we can. This gives us access to surfaces that would otherwise be left un-plated. Now we can identify and eliminate points of vulnerability where oxidation or non-conductivity would likely occur.

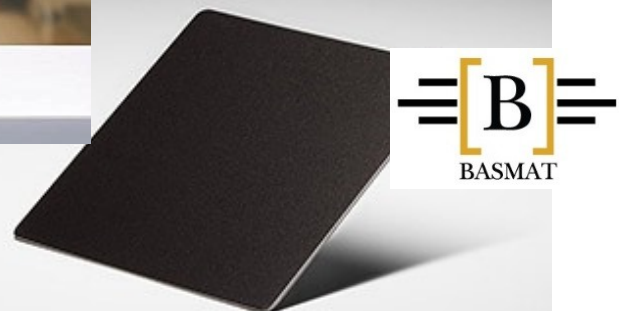

Second step is the stripping and polishing process to remove any dirt, grease, oily residue, old layers and rust. Even the smallest particles left on the surface can have a disastrous effect on the plating process for example, blistering and flaking of a plate-layer.

We dip every object first into a specially formulated cleaning bath. With a clean base metal surface, the object may finally be ready for plating. This process involves much more than simply dipping the object in a solution and running an electrical current through it. Calculating voltage precisely and setting timers help apply an appropriate coating thickness over the clean surface. Plating only a portion of the surface in some cases, requires additional preparation, for example protecting the areas with special tape.

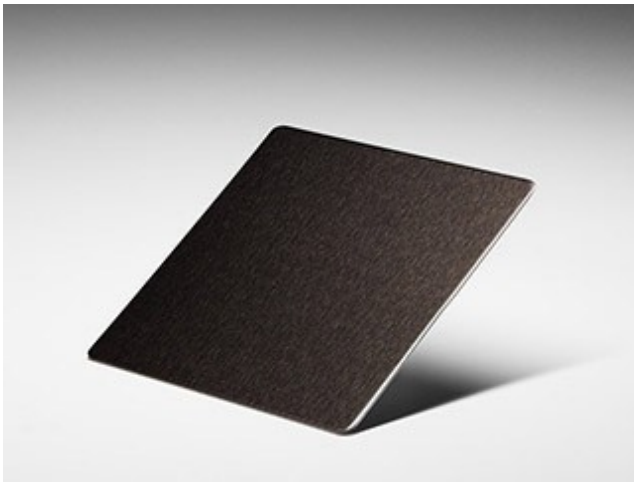

Many manufactured components used in the optics industry require the application of a specialized metal coating to help prevent against corrosion, increase surface hardness and enhance lubricity. We offer a variety of reliable optical grade plating services that can be customized to meet your specific manufacturing requirements.
