We provide breakdown service, annual maintenance contracts, installations and dismantling, quality check and electrical safety analysis of your instruments. All our service engineers got training from famous medical instrumentation companies like Siemens, GE, Schiller, A sorta, Philips, Merk, etc.

We have specialist engineers for imaging instruments such as Ultrasound scanners, X-Ray equipments, CT Scanners etc. We provide annual maintenance contracts for hospitals and clinics at competitive pricing. We have dedicated team for Electrical Safety Testing for instruments. Which is essential for HAAD & DHA approvals for clinics, hospitals and labs in United Arab Emirates.

SONOSCAPE ULTRASOUND

More than a decade ago, with the goal of setting new Standards in Price and Performance, SonoScape specialized itself in ultrasound diagnostic systems and transducers. In 2004 SonoScape released the world's first 15 inch LCD portable color Doppler Ultrasound System. Shortly afterwards SonoScape's product received FDA approval and CE certification and started to be serviced all over the world.

Motivated by our goal, we have established a global R&D team with research centers in china and abroad to make the innovative medical technologies accessible and affordable. To reach this goal, SonoScape has continuously introduced new medical products and technologies into the market every year.

Consequently SonoScape has expanded into the fields of Endoscopy, Electrocardiography and In-Vitro Diagnostics to continue providing better healthcare solutions to the world for the purpose of meeting the diagnostic needs of our worldwide customer base.

ECG MACHINE

IE12 is a new type of - 12 channel ECG which has made a lot of improvement in the key ECG technologies of quickness, accuracy and stability as well as the streamlined workflow. It applies a new platform for ECG signal acquisition, which can well perform in interference reduction, fast waveform display and right-level of filtering. It caters for the hospitals and busy clinics where ECG volume is high, speedy and quality-demanding.

MEDICAL WEIGHING SCALE

Work-Life Balance that's the new magic phrase synonymous with quality of life. Vitality, health and physical wellbeing play a particularly important role in this regard. The new generation of ADE Germany Medical scales pays tribute to our customers growing health awareness. It meets the need for wellness and harmony on a level which fulfils the most stringent requirements.

X-RAY MACHINES

DIGITAL DIAGNOSTIC X-RAY

X-RAY or conventional radiography is a simple, painless procedure that enables that radiologist to analyze the bony and soft tissue anatomy for diagnosis. It is a familiar exam to most patients and remains one of the most significant advances in all medical diagnosis.

Pictures generated by standard x-ray are frequently used to diagnose fractures and pneumonias. A very low dose of radiation is used, which make x-rays extremely safe diagnostic tests.

PORTABLE X-RAY MACHINES

The drawback of early portable x-ray equipment was that it shared the same danger of radiation exposure as the non-portable x-ray system, and also required the same harmful chemicals and inconvenient darkroom facilities as stationary x-ray machines. They were also rather heavy.

Digital technology suggests that modern portable x-ray machines need no film and no establishing. Images taken with a portable digital x-ray machine can easily be moved to any COMPUTER geared up with DICOM software application and stored, e-mailed, enhanced and/or archived.

FETAL MONITOR

GYNECOLOGY COUCH

The GynaecologyTable is designed for gynaecology, examination, urology and minor surgical operations. The chair consists with 3 main parts. Back rest, seat part and leg rest. The chair makes back up & down, chair up & down and trendelenburg & reverse trendelenburg movements by 3 DC motors with using hand control. Height adjustment is used with hand control and it makes movements vertical. Steel construction is painted with electrostatic powder coating and protected with galvanize against corrosion. And the construction is covered with anti- bacterial and easy cleanable ABS plastic. So that, the chairs seems more better. ABS covering designed to keep itself in the upholstery and it blocks the dust which goes into the upholstery. Drain pan does not effect to table movements during the trendelenburg and reverse trendelenburg movements. There are stainless steel rails at the two sides of the table.

With this rails, all accessories can be moved to all directions easily (up/down/right/left). Leg supports are easy removable and surgeons can get the supports manually to all positions they want.

COLPOSCOPE

Colposcope is used for gynecology inspection. A colposcopy provides a magnified view of the areas, allowing the colposcopist to visually distinguish normal from abnormal appearing tissue and take directed biopsies for further pathological examination.

FETAL DOPPLER

A Doppler fetal monitor is a hand-held ultrasound transducer used to detect the fetal heartbeat for prenatal care. It uses the Doppler Effect to provide an audible simulation of the heartbeat. Doppler fetal monitors provide information about the fetus similar to that provided by a fetal stethoscope.

ELECTRO SURGERY

Electro surgery is the application of a high-frequency (radio frequency) alternating polarity, electrical current to biological tissue as a means to cut, coagulate, desiccate, or fulgurate tissue. Its benefits include the ability to make precise cuts with limited blood loss.

CARDIOLOGY

Cardiology is a branch of medicine dealing with disorders of the heart as well as parts of the circulatory system. The field includes medical diagnosis and treatment of congenital heart defects, coronary artery disease, heart failure, valvular heart disease and electrophysiology. Physicians who specialize in this field of medicine are called cardiologists, a specialty of internal medicine. Pediatric cardiologists are pediatricians who specialize in pediatric cardiology. Physicians who specialize in cardiac surgery are called cardiothoracic surgeons or cardiac surgeons, a specialty of general surgery.

OPHTHALMOLOGY PRODUCTS

Comprehensive range of ophthalmology products

We provide comprehensive connectivity solutions to help increase efficiency and productivity with electronic workflow. We offer clinic applications training and a broad range of service and support options. All with the goal of helping our customers overcome their day-to-day challenges so they can focus on delivering the best possible patient care.

Eyes have a complex and delicate structure. It is therefore essential to have precise and detailed examination data and accuracy surgical equipment. Many years of research & development have yielded various products that use cutting edge technology such as laser and ultrasound.

OUR PARTNERS

ANNUAL MAINTENANCE CONTRACT

Quality is a prime factor. Quality output from any machine depends on machine's repeat performance. To get repeat performance machine maintenance is a key factor. Maintenance of machines with Computerized Numerical Controls requires special skills. Every organisation may not have specialized Al Sahel Medical Supplies Trading team to take care of all variety of medical equipment machines. Al Sahel Medical Supplies Trading are the best people to support in maintaining these machines as total technology is available with them. In order to help our customers in getting the best throughput from the machine.

PLANNED PREVENTIVE MAINTENANCE

Sahel Medical will ensure that the medical equipment operates in accordance with its design and manufacture parameters and safe working conditions. A regular PPM inspection and equipment calibration will be performed in accordance with ISO, JCI, AAMI, ECRI, accepted standards and to confirm with MOH & HAAD regulatory requirements. The asset PM frequency will be in accordance with the manufacturer's recommendation or internationally accepted protocols.

CORRECTIVE MAINTENANCE

Sahel Medical will restore the equipment to its specified condition when it fails. This includes normal equipment breakdown maintenance, Routine/Scheduled maintenance, Emergency response, and On-Call service maintenance activities. Sahel Medical will make sure of the provision of required spare parts.

ELECTRICAL SAFETY TESTING

Sahel Medical will carry out electrical safety test after every planned preventive maintenance and whenever necessary for all medical equipment.

USER TRAINING AND DEVELOPMENT PROGRAMME

This is an essential tool to minimize equipment breakdown which largely contributes to its maintenance cost. Al Sahel Medical will assess the training need requirements by the end-users and will prioritize on those equipment categories with high failure rate of user related errors. Al Sahel Medical will prepare yearly training schedules for approval by the health care authority before execution. Under this program information on hazards, equipment operation overview, user errors, equipment use, as well as electrical safety will be shared and discussed. Users will be trained on the proper and correct usage and operation of the equipment.

ULTRASOUND PROBE REPAIR

Ultrasound Transducer Repair and Service from AL SAHEL MEDICAL SUPPLIES

AL SAHEL MEDICAL SUPPLIES offers probe repair and refurbishment for a variety of ultrasound probes, including convex, phased array, linear, and TEE for a wide variety of manufacturers.

In many cases, repairs on damaged or broken probes can be made for a replacement new or used ultrasound transducer.

While some repairs are relatively easy and cost-effective, our expert technicians will evaluate your transducer for repair, replace, or keep your transducer. Different pricing options are available for some repairs, and sometimes you'll find there's a relatively simple fix that can extend the life of your ultrasound probe and you can put off the potentially expensive fix.

We offer repair and replacement for nearly every ultrasound manufacturer, including GE, siemens, ATL, Acuson, Philips, SonoScape, Chison, SIUI, SonoSite, HP, Biosound Esaote, and many others.

Our most common problems and repairs include:

- Strain Relief
- Image "Dropout"
- Broken Locking Mechanism
- Worn, Cracked, or Holes in Membrane
- 3D/4D Probe Leakage or Motor Repair
