Hose Assembly

Hydraulic fittings

Hydraulic Valve

Hose Clamps

## Products we deal

- \*All Types of Hydraulic fittings & Pneumatic Fittings
- \*Brass Fittings
- \*GI Fittings
- \*Hose Clamp and coupling
- \*Ac Hoses and Fittings
- \*Hydraulic Valves
- \* Hydraulic Pump Repairing
- \*Hydraulic Jack Rep

HYDRAULIC HOSE

## Products

PNEUMATIC  
FITTINGS

HYDRAULIC  
FITTINGS

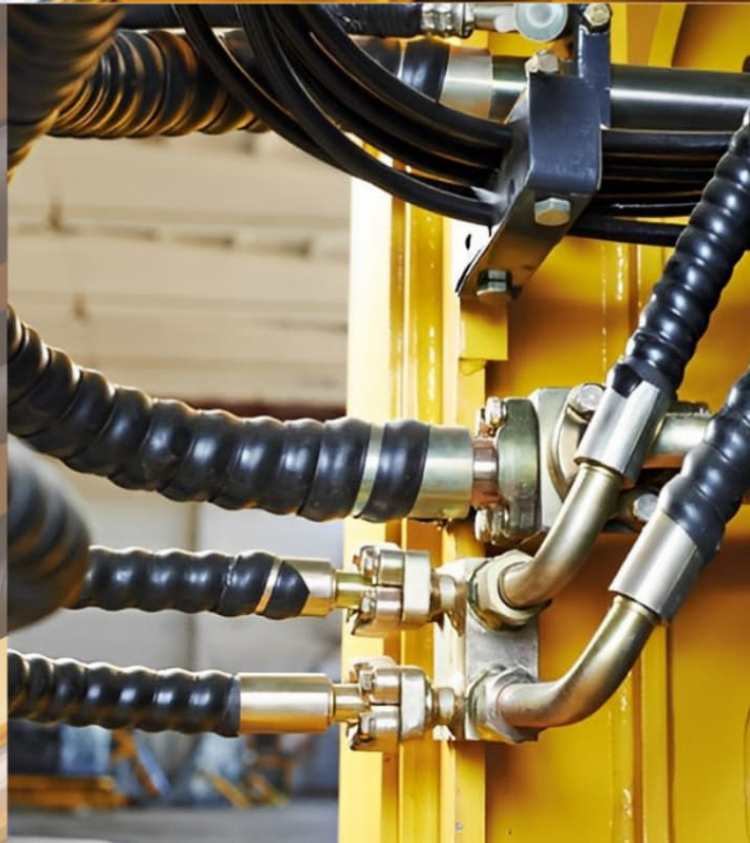

BRASS FITTINGS

**Your Hydraulic Solution**

## **Our Vision**

To be a leader in our industry, respected for our commitment to go above and beyond for our customers and our employees.

**R6**  
**QUICK OVERVIEW**

R6 hydraulic hose is made as per the specification SAE type 100 R6. It is suitable for delivering petroleum or water-based hydraulic fluids and is mainly used in low-pressure conditions. Hose has low pressure and low impulse hydraulic lines 20 to 35 bar.

**4SP**  
**QUICK OVERVIEW**

Hydraulic Rubber Hose 4SP has very high-pressure Hydraulic Lines 165 to 450 Bar and hydrostatic transmission lines for petroleum, synthetic, or water-based fluids. Suitable for Earthmoving, Material handling equipment, and machinery/systems

**R5**  
**QUICK OVERVIEW**

SAE 100 R5 steel wire reinforced hydraulic hose is suitable for impacted medium pressure hydraulic petroleum-based oils. Also, the best choice for lubricating oils, overheating lubricating oil, and water & air piping, such as air brake, power steering, fuel filter, turbocharger, and oil cylinder of heavy commercial vehicles.

## **1SN** **QUICK OVERVIEW**

Hydrowash 1SN – steel wire reinforced hydraulic hose is mainly used in high pressure hydraulic systems. It is resistant to abrasion, corrosion and high pressure. It is composed of three parts: tube, reinforcement and cover. It is resistant to abrasion and corrosion due to the tube. And it can work well in high pressure environment thanks to its high tensile steel wire reinforcement. Besides, it is resistant to weather, ozone, aging and sunlight because of the cover with the cloth impression.

## **2SN** **QUICK OVERVIEW**

EN 853 2SN steel wire reinforced hydraulic hose is suitable for delivering water and petroleum-based hydraulic fluids in the working temperature of  $-40^{\circ}\text{C}$  to  $+100^{\circ}\text{C}$ . This hose has high-pressure hydraulic lines 80 to 415 bar and requires compact outer dia. It is also suitable for agricultural, earthmoving, material handling equipment and machinery/systems.
