- ✓ Automated mail & SMS option
- ✓ Client to client web login for order process
- ✓ Mobile ERP Solutions

ERP MODULES

Inventory Management

Our ERP Inventory Management module offers effective features to minimize warehousing costs and to optimize storage needs in line with the requirements at hand.

Order Management

The order management module streamlines order processing, tracking, and fulfillment while enhancing operational efficiency.

Procurement & Purchase

The procurement and purchase module facilitates streamlined procurement processes, including supplier management, purchase requisitions, purchase orders, vendor selection, invoice processing, and inventory control, optimizing procurement efficiency and cost savings.

Production

This module enables efficient planning, scheduling, and control of manufacturing processes, including resource allocation, material requirements planning (MRP), work order management, production tracking, optimizing production efficiency and ensuring timely delivery of products.

Quality Control

The quality control module provides tools for defining quality standards, conducting inspections, managing non-conformances, tracking corrective actions, and generating quality reports, ensuring adherence to quality requirements and continuous improvement of product and process quality.

Point of Sale

The point of sale (POS) module enables seamless sales transactions, including inventory lookup, pricing, discounts, payment processing, and receipt generation, while providing real-time data integration for accurate sales reporting and analysis. It streamlines the sales process .

Sales

The sales module in an ERP system streamlines sales processes, from lead management to invoicing, while providing real-time data insights for effective sales tracking and customer relationship management.

Finance

The finance module in an ERP system handles financial transactions, budgeting, and reporting, enabling effective financial management and informed decision-making.

CRM-Marketing & Customer Support

Generate reports to find pre sales and post sales service time.
