Automatic Sliding & Swing Doors

Using Daihatsu microprocessors and running gear, our sliding door operators are technically advanced, extremely reliable and offer our clients a host of inbuilt features. Commonly seen in thousands of high use applications such as hotels, shops, hospitals and airports worldwide, our sliding door operators offer simplicity, reliability and longevity.

Swing Gates Automation

Depending on the size and weight of the gates, a choice of hydraulic or mechanical operators will ensure that the installation is efficient and trouble free. We also supply a range of exceptional gates that can be installed at the same time. Control options range from radio transmitters to intercoms, keypads and numerous other methods. Your surveyor will help you create a system that is tailored to your needs.

Sliding Gates Automation

Sliding gates offer an extremely secure and reliable method of controlling the entrance to any property. Normally used in commercial situations, sliding gates are also suitable for domestic operations. In common with swing gates, we offer a host of operating and control options to ensure the system that is installed is suitable for your project.

Automatic Sliding & Curved Doors

Sliding doors present a very impressive entrance to any building. They also offer numerous benefits in terms of energy saving and security as well as exceptional style. Aesthetically, door sets can be manufactured to suit virtually any space and can even include glass display showcases that can provide a rental income. An interesting development is the use of curved sliding doors which can mimic the look of a revolving door, but at a more competitive price.

Traffic Control Barriers

We manufacture the Unibar range of traffic control barriers. Developed for use in high specification car parking environments, these barriers are rated for 100% duty cycles. They have the ability to work around the clock to continuously support your operations. Seen throughout Germany, Europe and Unibar barriers are available in Standard, Fast and Heavy Duty versions in a wide range of colors.

SECTIONAL OVERHEAD DOOR

Combine top quality and advanced technology with high insulation requirements maximum vision and elegance can also be ached.

The doors are made up mm thickness, insulated panels with 0.7mm Aluminum.

Vision panels are available in a variety of size and patterns, Sectional overhead doors provide solutions for many different applications.

Rolling Shutter

Strong and efficient roller shutter are suitable for a wide range of application from small security shutters to large industrial uses

Operate can be manual and automatic through electric motors.

ACESS CONTROL SYSTEM

ACESS CONTROL SYSTEM - CCTV - INTERCOM

Today's business environment demands tight control. Health and safety legislation insists that you restrict people from dangerous areas, proper stock control is only possible when access is limited to authorized personnel, and productivity increases when visitors have restricted movements. You need to control who is able to enter and leave your premises, at what point, and during specific times. You may also want to analyses staff movements and confirm where people are. A sophisticated access control system can do all this plus more. Some of the many features can include control and monitoring of doors, remote card activation/deactivation by day/month/ year with numerous access levels. Video Imaging and Card

CCTV systems have achieved a significant reduction in crime and antisocial behavior by providing 24-hour surveillance of vulnerable areas. The CCTV system acts as both a tool to investigate an incident and also becomes a deterrent in its own right, reducing the risk of an incident occurring in the first place.

CAR PARKING SHED

Innovative Automatic doors offers the best designs in commercial and residential car parking shade structures suited to the specific requirements of the customers. These shade structures are manufactured with premium quality materials and available for competitive prices. Car Parking Shade Structures are available in various customized sizes and designs which are installed under the supervision of qualified site supervisors and engineers. Car parking shade structures are designed to offer maximum protection, aesthetic look and also it is environment friendly.

TURNSTILE, Automatic Bollard & Road Blockers

Turnstiles are compact and cost-effective entrance solutions. The body is made of brushed stainless steel which is robust, rigid, anti-rust and durable. It can be integrated with any kind of access controller system (e.g.: RFID device, Push button, Fingerprint and Biometric device).

In case of emergency, the turnstile horizontal arm will drop down to allow free passage when power off.

It is suitable for areas with high traffic.

All Kinds of Glass Work & Shower door Partition

Custom showers are our cup of tea. Whether you simply want a new shower door, a fresh divider, or an entirely new glass enclosure, we've got you covered. Our beautiful art glass has been helping our customers build exquisite custom showers for decades. Regardless of the level of privacy you want or the design you prefer, we'll help bring your dreams to reality.

All shower glass will be tempered for safety and vary in thickness depending on the effect you choose; any configuration and size is possible. All our glass ships worldwide at reasonable prices

Innovative Automatic Door and Glass offers aluminum building products for the architect and general contractor. Renovation or new construction, Innovative Automatic doors supports its customers' success by embracing the highest quality products and service solutions.
